(5) Each operator of a natural gas distribution system that is a utility subject to the jurisdiction of the Commission pursuant to Texas Utilities Code, Chapters 101 - 105, shall file a generally applicable tariff for its surcharge in conformance with the requirements of 7.315 of this title (relating to Filing of Tariffs).
(6) Amounts recovered from customers under this subsection by an investor-owned natural gas distribution system or a cooperatively owned natural gas distribution system shall not be included in the revenue or gross receipts of the system for the purpose of calculating municipal franchise fees or any tax imposed under Subchapter B, Chapter 182, Tax Code, or under Chapter 122, nor shall such amounts be subject to a sales and use tax imposed by Chapter 151, Tax Code, or Subtitle C, Title 3,

	Tax Code. (c) Natural gas master meter systems. The Commission hereby assesses each natural gas master meter system an annual pipeline safety and regulatory program fee of $100 per master meter system. (1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of $100 per master meter system no later than June 30 of each year. (2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year. (3) Each operator of a natural gas master meter system shall recover as a surcharge to its existing rates the amounts paid to the Commission under paragraph (1) of this subsection. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each natural gas master meter system operator shall file with the Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. (d) Late payment penalty. If the operator of a natural gas distribution system or a natural gas master meter system does not remit payment of the annual pipeline safety and regulatory program fee to the Commission within 30 days of the due date, the Commission shall assess a late payment penalty of 10 percent of the total assessment due under subsection (b) or (c) of this section, as applicable, and shall notify the operator of the total amount due to the Commission. RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	B. DEFINITIONS 1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees (including franchise fees) and taxes. 2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year. 3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall also include the cost of gas withdrawn from storage and shall include gains and losses from the utilization of natural gas financial instruments that are executed by the Company for the purpose of mitigating price volatility. Companies affiliated with, or sharing services with, the Company shall not be allowed to charge fees for transactions related to natural gas financial instruments utilized for purposes in this Cost of Gas Clause and hence cannot realize a profit in this regard. 4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule, which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7). 5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit. 6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees (including franchise fees) and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.
7. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12-month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority.
8. RNG is the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas.
9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees (including franchise fees) and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s), (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.
10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

C. COST OF GAS In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS Concurrently with the Reconciliation Audit, the Company shall

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; (f) the revenue associated fees (including franchise fees) and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

H. ANNUAL RECONCILIATION REPORT The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:
1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30.
2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date. 4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period. 5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period. 6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date. 7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority thereafter determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination. COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of $594.55 plus
Interim Rate Adjustments (IRA) $151.60 per month (Footnote 1)
Total Customer Charge $746.15 per month

All Ccf per monthly billing period @ $0.07817 per Ccf

OTHER ADJUSTMENTS

Cost of Gas Component: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-INC.
Pipeline Integrity Testing Rider: The billing shall reflect adjustments in accordance with provisions of the Pipeline Integrity Testing Rider, Rate Schedule PIT and PIT-Rider, if applicable.
Pipeline Safety and Regulatory Program Fees: The billing shall reflect adjustments in accordance with provisions of the Pipeline Safety and Regulatory Program Fees Rider, Rate Schedule PSF, if applicable.
Rate Case Expense Rider: The billing shall reflect adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider, Rate Schedule RCE.
Taxes: Plus applicable taxes and fees (including franchise fees) related to above.

CONDITIONS

Subject to all applicable laws and orders and the Companys rules and regulations on file with the regulatory authority. The Company`s Average Payment Plan, also known as the Average Payment Plan (APP Plan), is not available to customers served on this rate schedule. This rate does not include any road use fees, permits, or taxes etc. It provides for the delivery of uncompressed natural gas only. Customer must provide affidavit to the Company certifying that the gas delivered will be compressed for use as motor fuel. The Customers compressor station is subject to inspection by Company engineers.

CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

QUALITY OF SERVICE

QUAL_SERVICE_ID	DESCRIPTION
CGSA-c	Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued) f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law. 9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference. A. TERMS AND CONDITIONS 1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing. 2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due. 3. Service is not available under this Plan for a term of less than twelve (12) months. B. AVERAGE PAYMENT AMOUNT 1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment amount. 2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay. 3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis. SECTION 10 ` FACILITIES AND EQUIPMENT 10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical. 10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not

be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company.
b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required

to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.
c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater

than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73 Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.

b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.

c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.

13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:

a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.

b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.

15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.

15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.

a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

collection of payment from Customer. $18.00
h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00
i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00
j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00
k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00
l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses
m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00
n) Meter Removal Fee $25.00
o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00
p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost
q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

SECTION 1 ` GENERAL STATEMENT AND DEFINITIONS

1.1 TARIFF APPLICABILITY Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative Tolerance Limit.

Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.

Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.

Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.

Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup

power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss, claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for

operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.
b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting

more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.

h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in

subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15 of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.

7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.

7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:

a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;

b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;

c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;

d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;

e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;

f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;

g) For Customers on transportation service, the Company may discontinue service upon request of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

following reasons:
a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.
b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.
c) Delinquency in payment for service by a previous occupant of the premises.
d) Failure to pay for merchandise or charges for non-utility service by the Company.
e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.
f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.
g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.
h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.
i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.
j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.
k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.
7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Classification System Violation Factors Factor Value (1-4) Points Tally Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this Section for 24 hours or more 4 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for less than 24 hours, but more than 12 hours 3 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for 12 hours or less 2 Demand for collection of full payment of bills due is made during an extreme weather emergency 3 The temperature is 10 degrees or less during the period of disconnection 4 The temperature is more than 10 degrees but less than or equal to 20 degrees during the period of disconnection 3 The temperature is more than 20 degrees but less than or equal to 32 degrees during the period of disconnection 2 Repeat violations based on Company`s history of compliance 3 Good faith effort to remedy violation -2 No effort to remedy violation during the extreme weather emergency 4 Total Penalty maximum per violation 10 points or more = Class A violation 7-9 points = Class B violation 4-6 points = Class C violation 1-3 points = Class D violation More than $5,000 $5,000.00 $4,000.00 $3,000.00 The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills. Beginning in the September or October billing periods, the Company shall give notice as follows:

a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.

b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.

c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.

7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In

the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.

7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.

7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS

8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.

8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.

8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:

a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;

b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or

c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.

d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.

e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.

8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.

8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.

8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.

8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.

8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.

8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12) consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section

15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.
8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.
8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.
8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.
8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.
9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.
a) if the meter is read by the utility, the date and reading of the meter at the beginning and end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the

meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.

9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.

9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.

9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.

9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.

9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:

a) Every deferred payment plan entered into due to the Customers inability to pay the outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.

b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.

c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

TARIFF CODE: DS **RRC TARIFF NO:** 34255

		schedules an appointment but fails to appear. $18.00 n) Meter Removal Fee $25.00 o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00 p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00 15.7 DEPOSIT AMOUNTS a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost b) Residential Customer Deposit Minimum $75.00 c) Non-Residential Deposit Minimum $250.00
328148	CGSA -1a	Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 SERVICE FEES AND DEPOSIT AMOUNTS 15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc. 15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS
The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST
A Customer may request an expedited service, upon availability. Charges may apply.

328149 CGSA -1b

Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 (Continued)

15.5 SPECIFIC SERVICE TIME REQUEST
A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES
All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00
b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00
c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34255

additional fee will be charged and must agree to pay such charge.
Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00
Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

CRR-All-ISOS	

Texas Gas Service Company, a Division of ONE Gas, Inc.
Rate Schedule CRR
Central-Gulf Service Area, Rio Grande Valley Service Area
North Texas Service Area and Borger/Skellytown Service Area

CUSTOMER RATE RELIEF RATE SCHEDULE

Applicable to all Sales Customers for the purpose of collecting and remitting customer rate relief charges as authorized by the Railroad Commission of Texas (Commission) in accordance with Chapter 104, Subchapter I of the Texas Utilities Code and the Commission Financing Order issued in Docket No. OS-21-00007061.

A. ABBREVIATIONS AND DEFINITIONS

1) Authority - The Texas Public Finance Authority, together with any successor to its duties and functions.
2) Bonds or Customer Rate Relief (CRR) Bonds - The Texas Natural Gas Securitization Finance Corporation Customer Rate Relief Bonds, Series 2023 and any additional or different designation or title by which each series of Bonds shall be known as determined by the Issuer Entity.
3) Ccf and Mcf - For Ccf, one hundred (100) standard cubic feet of gas, where one (1) standard cubic foot of gas is the amount of gas contained in one (1) cubic foot of space at a standard pressure of fourteen point sixty-five (14.65) pounds per square inch, absolute and a standard temperature of sixty (60) degrees Fahrenheit; and, for Mcf, 1,000 standard cubic feet of gas.
4) Central Servicer - The entity engaged in accordance with the terms of the Financing Order to, amongst other things, engage the Participating Gas Utilities as collection agents for the purposes of facilitating collection and remittance of CRR Charges by Participating Gas Utilities, and perform the other services required of it under the Servicing Agreement (as defined in the Financing Order).
5) Commission - The Railroad Commission of Texas, including its staff or delegate.
6) CRR Charge True-Up Adjustment - A True-Up Adjustment (as defined in the Financing Order).
7) CRR Charge True-Up Charge Adjustment Letter - A true-up adjustment letter substantially in the form of Exhibit 3 to the Financing Order.
8) CRR Scheduled Adjustment Date - January 1 and July 1 of each applicable year, provided that the CRR Scheduled Adjustment Date and any other deadlines or target dates related thereto, shall be subject to modification prior to the date the Bonds so as to reflect the terms of the Servicing Agreement.
9) Customer Rate Relief (CRR) Charge - A nonbypassable charge as defined in Tex. Util. Code Section 104.362(7).

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	10) Financing Order - The order adopted under Tex. Util. Code Section 104.366 approving the issuance of CRR Bonds and the creation of Customer Rate Relief Property and associated CRR Charges for the recovery of regulatory assets, including extraordinary costs, related financing costs, and other costs authorized by the Financing Order. 11) Gas Utility - Texas Gas Service Company, a Division of ONE Gas, Inc. and its successors and assignees, an operator of natural gas distribution pipelines that delivers and sells natural gas to the public and that is subject to the Commission's jurisdiction under Tex. Util. Code Section 102.001, or an operator that transmits, transports, delivers, or sells natural gas or synthetic natural gas to operators of natural gas distribution pipelines and whose rates for those services are established by the Commission in a rate proceeding filed under Chapter 104 of the Utilities Code, within the service area.? 12) Irrevocable - The Financing Order, together with the Customer Rate Relief Property as defined by Tex. Util. Code Section 104.362(8) and the CRR Charges authorized by the Financing Order, are irrevocable and not subject to reduction, impairment, or adjustment by further action of the Commission, except in connection with true-ups authorized by the Financing Order. 13) Issuer Entity - Texas Natural Gas Securitization Finance Corporation, a Texas nonprofit public corporation established by the Authority, or any successor created pursuant to Tex. Gov't Code Section 1232.1072. 14) Large Participating Gas Utility - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and any Participating Gas Utility or Successor Utility (as defined in the Financing Order) each of whose Normalized Sales Volumes exceed 2.0% of the total aggregate Normalized Sales Volumes among all Participating Gas Utilities. Any calculation performed in connection with the preceding sentence shall be made on the basis of the most recently reported Normalized Sales Volumes and such calculation shall be performed by the Central Servicer annually no later than one (1) month after Normalized Sales Volumes are reported as regularly scheduled under Paragraph H hereof; provided that the Commission and/or Central Servicer may perform such calculation without any limitation in order to give effect to any merger, acquisition, disposition, divesture, spin-off or other transaction that would impact a Participating Gas Utility's share of the total aggregate Normalized Sales Volumes. The Commission or the Central Servicer shall promptly thereafter provide written notice to a Participating Gas Utility that subsequently becomes a Large Participating Gas Utility, which change shall take effective beginning on January 1 of the following calendar year. 15) Nonbypassable - CRR Charges must be paid by all existing or future customers receiving service from a Participating Gas Utility or such gas utility's successors or assigns. 16) Normalized Sales Volumes - a) For Large Participating Gas Utilities: All natural gas volumes projected to be billed for the upcoming twelve (12) month period in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

collection of natural gas costs. For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated to calculate the CRR Charges. b) For other Participating Gas Utilities: All natural gas volumes billed in the preceding calendar year in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs and normalized according to the methodology utilized in each Participating Gas Utility's application filed in Docket No. OS-21- 00007061, Consolidated Applications For Customer Rate Relief and Related Regulatory Asset Determinations In Connection With The February 2021 Winter Storm. ? For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated in order to calculate the CRR Charges.
17) Participating Gas Utilities - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; Rockin' M Gas LLC d/b/a Bluebonnet Natural Gas LLC; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Corix Utilities (Texas) Inc.; EPCOR Gas Texas Inc.; SiEnergy, LP; Summit Utilities Arkansas, Inc. , Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and Universal Natural Gas, LLC d/b/a Universal Natural Gas, Inc. or any Successor Utility (as defined in the Financing Order).
18) Sales Customer(s) - All active customers taking service under a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs.

B. APPLICABILITY
This rate schedule sets out the rate, terms and conditions under which the CRR Charge shall be billed and collected by Texas Gas Service Company, a Division of ONE Gas, Inc. as a Participating Gas Utility for all Incorporated and Unincorporated Areas of the Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area under the terms of the Financing Order. Each individual Sales Customer is responsible for paying the CRR Charge billed to it in accordance with the terms of this rate schedule. Payment is to be made by an individual Sales Customer to the Participating Gas Utility of which it is a customer. The Participating Gas Utility is obligated to apply amounts collected from customers to pay any outstanding CRR Charges prior to applying such amounts for any other purpose. The Participating Gas Utility, as collection agent, shall remit collections of the CRR Charges to the Indenture Trustee in accordance with the terms of the Financing Order and any servicing or other similar agreement that is contemplated by the Financing Order.

C. TERM
This rate schedule shall remain in effect until the CRR Charges have been collected and remitted to the Indenture Trustee in an amount sufficient to satisfy all obligations in regard to paying principal and interest on the CRR Bonds together with all other financing costs, bond administrative expenses and other costs as provided in the Financing Order. This rate schedule and the CRR Charge are irrevocable and nonbypassable.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

D. SALES CUSTOMERS
For the purposes of billing the CRR Charges, all Sales Customers of the Participating Gas Utility's Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area shall be assessed the uniform volumetric charge identified below.

E. CRR CHARGE
The CRR Charge will be a monthly volumetric rate of $0.118/Ccf. The CRR Charge is calculated in accordance with and subject to the provisions set forth in the Financing Order and will be adjusted at least annually based upon the CRR Charge true- up adjustment procedure. The CRR Charge shall be included in the Participating Gas Utility's Purchase Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. Participating Gas Utilities may reflect the CRR Charge according to the delivery pressures defined in Participating Gas Utilities' applicable tariffs. Such delivery pressure specific charges shall be equivalent to the CRR Charge as determined below at 14.65 per square inch, as defined above.

F. DETERMINATION OF CUSTOMER RATE RELIEF CHARGE
The CRR Charge will be adjusted no less frequently than annually, in accordance with the terms of the Servicing Agreement (as defined in the Financing Order), to ensure that the expected collection of CRR Charges is adequate to pay when due, pursuant to the expected amortization schedule, principal and interest on the CRR Bonds and together with all other financing costs, bond administrative expenses and other costs, as provided in the Financing Order, on a timely basis. The CRR Charge shall be computed according to the formula described below.

Step 1: Determination of Normalized Sales Volumes

(A) Total Large Participating Gas Utility Normalized Sales Volumes (Mcf)

(B) Assumed % of uncollectible sales
(C) Total Normalized Sales Volumes Billed and Collected: (A * (1 - B)) For the avoidance of doubt, Normalized Sales Volumes are assumed to be calculated without giving effect to volumes anticipated from Participating Gas Utilities making up less than two percent (2.0%) of the total Normalized Sales Volumes of all Participating Gas Utilities.

Step 2: Determination of CRR Charge
(D) Total CRR Charge Rate Revenue Requirement for Applicable Period

(E) CRR Charge per Normalized Sales Volumes (Mcf): (D / C)

Thereof: CRR Charge for Sales Customers

G. CRR CHARGE TRUE-UP

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Changes to the CRR Charge will be effected through the filing of CRR Charge True-Up Adjustment Letters by the Central Servicer to the Commission as authorized by the Financing Order and in accordance with the Servicing Agreement. Not less than fifteen (15) days prior to each CRR Scheduled Adjustment Date and more frequently as required by the Central Servicer, the Central Servicer will submit the CRR Charge True-Up Adjustment Letter in the form of Exhibit 3 to the Financing Order to ensure that CRR Charge collections are sufficient to make all scheduled payments of CRR Bond principal and interest and meet other Ongoing Financing Costs (as defined in the Financing Order) on a timely basis during the payment period. In addition to the foregoing, the Central Servicer shall be authorized to file CRR Charge True-Up Adjustment Letters with the Commission that adjust the CRR Charge more frequently (but not more often than quarterly) as required under the provisions of the Servicing Agreement (as defined in the Financing Order).

H. CRR CHARGE TRUE-UP PROCEDURE
Texas Gas Service Company, a Division of ONE Gas, Inc. shall annually file with the Commission and the Central Servicer by June 1 of each year its Normalized Sales Volumes; each Large Participating Gas Utility shall include projected volumes for each of the future twelve (12) months beginning July 1, and each other Participating Gas Utility shall include its Normalized Sales Volumes for the prior calendar year. Such filing and/or reporting may be more frequent to the extent required under the Servicing Agreement and applicable Collection and Reporting Arrangements. If Texas Gas Service Company, a Division of ONE Gas, Inc. is a Large Participating Gas Utility, the Participating Gas Utility shall, upon the request of the Central Servicer, provide the Commission and the Central Servicer updated Normalized Sales Volumes for the succeeding twelve (12) month period no later than the fifteenth (15th) day following such request to allow the Central Servicer to make Interim True-Up Adjustments. Each Participating Gas Utility shall have the right to provide the foregoing information to the Central Servicer on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). The Central Servicer shall submit to the Commission and the Participating Gas Utilities, not less than fifteen (15) days prior to the CRR Scheduled Adjustment Date, a CRR Charge True-Up Adjustment Letter applying the CRR Charge True-Up Adjustment based on Normalized Sales Volumes and other mathematical factors and requesting administrative approval from the Commission as provided for in the Servicing Agreement. The Commission's review and approval of the True-Up Adjustment Letter shall be as set forth in the Servicing Agreement (it being understood such review is limited to determining if any mathematical or clerical errors are present in the application of the CRR Charge True-Up Adjustment relating to the appropriate amount of any over-collection or under-collection of CRR Charges and the amount of an adjustment). If any CRR Charge True-Up Adjustment that is an Interim True-Up Adjustment is necessary, (i) the Central Servicer may request and the Large Participating Gas Utilities shall provide revised Normalized Sales Volumes for each of the immediately succeeding twelve (12) months and related data

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	and (ii) within fifteen (15) days of receipt of such data, the Central Servicer shall file a revision to the CRR Rate Schedule in a True-Up Charge Adjustment Letter setting forth the adjusted CRR Charge to be effective for the upcoming period, in accordance with the Servicing Agreement. Texas Gas Service Company, a Division of ONE Gas, Inc. shall have the right to provide such information on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). A CRR Charge resulting from a true-up adjustment will become effective on the first (1st) billing cycle that is not less than fifteen (15) days following the making of the CRR Charge True-Up Adjustment filing. I. TAXABILITY The receipt of CRR Charges by a Participating Gas Utility is exempt from state and local sales and use taxes and utility gross receipts taxes and assessments and is excluded from revenue for purposes of franchise tax under Tex. Tax Code Section 171.1011. Meters Read On and After September 25, 2024 Supersedes Rate Schedule Dated September 26, 2023
PIT-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE PIT Central-Gulf Service Area PIPELINE INTEGRITY TESTING (PIT) RIDER PURPOSE The purpose of this Pipeline Integrity Testing Rider is to promote the public interest in pipeline safety by enabling Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) to recover the reasonable and necessary Pipeline Integrity Safety Testing expenses incurred by the Company during the prior year (including contractor costs but excluding the labor cost of Texas Gas Service Company employees). These legally mandated operating and maintenance expenses shall be recovered through a separate monthly volumetric charge (the Pipeline Integrity Testing or PIT Surcharge) that shall be shown as a separate line item on the customers monthly bill and calculated for each customer class as described below. Capital expenditures associated with the Pipeline Integrity Program shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Texas Utilities Code. APPLICABILITY This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

TERRITORY
This Rider shall apply to the following gas sales and standard transportation rate schedules of the Company`s Central-Gulf Service Area (CGSA) within the incorporated and unincorporated areas of Austin, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Georgetown, Gonzales, Hutto, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nixon, Pflugerville, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas and in the environs area of Bastrop, Texas: 10, 15, 20, 25, 30, 40, C-1, CNG-1, 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV.

QUALIFYING EXPENSES
This Rider applies only to the legally mandated safety testing of the Companys transmission lines in the CGSA under the Pipeline Integrity Safety Testing Program. The operating and maintenance expense items that qualify for recovery under this Rider shall include the contractor costs associated with land and leak survey, permitting, and job order preparation and completion; the clearing of right-of-way; any needed notifications to adjacent businesses and residences; traffic control equipment and personnel; Direct Current Voltage Gradient (DCVG), Close Interval (CI), and other surveys to ensure the integrity of the pipeline system; any required rigid bypasses; flushing of the lines and testing and disposal of the flush water; hydrostatic testing of the lines and analysis and disposal of the test water; any required pigging of the lines in connection with safety testing; any required x-ray welding; metallurgical testing of the pipeline or components thereof; site restoration, painting, and clean-up; expenses associated with providing a supply of compressed natural gas (CNG) to ensure uninterrupted service to customers during testing; and any other operating and maintenance expenses reasonably necessary to safely and effectively perform required safety testing of the Companys pipelines in the CGSA. Neither capital expenditures by the Company, nor the labor cost of Company employees, shall be recovered under this Rider.

CALCULATION OF PIT SURCHARGES
The Pipeline Integrity Testing Surcharges established under this Rider shall be designed so as to recover the Total Testing Expense incurred in the prior year for Pipeline Integrity Safety Testing, and shall be calculated as follows:
The Total Annual Testing Expense shall be divided by the estimated average annual usage to produce the annual PIT Surcharge.

$$\text{PIT Surcharge} = \frac{\text{Total Annual Testing Expense}}{\text{Estimated Annual Usage}}$$

Based upon customer data for the prior calendar year and any other relevant factors, the estimated annual usage may be revised annually to account for customer growth, and the resulting revised PIT Surcharge shall be applied to each class for the ensuing 12-month recovery period.

ANNUAL RECONCILIATION

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

After completion of each annual recovery period, the total revenues collected under this Rider for that year shall be reconciled against the revenues previously calculated to be collected for that year, and the PIT Surcharge for each class shall be adjusted upward or downward so that the Company recovers any underrecoveries or refunds any overrecoveries that may have accrued under the Rider, plus monthly interest on those underrecoveries or overrecoveries at the cost of long-term debt approved in the Companys most recent general rate case in which rates were set for application to customers in the CGSA. The reconciliation shall be filed with the regulatory authority on or before February 21st of each year, and the regulatory authority shall complete its review of the reconciliation on or before March 21st of each year, so that the Company can implement the reconciled PIT Surcharges beginning with the first billing cycle for April of each succeeding year.

DEFERRED ACCOUNTING
The Company is authorized and directed to defer, as a regulatory asset, all Pipeline Integrity Safety Testing expenses incurred during the testing cycle starting on January 1, 2016 and all revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Companys invested capital (rate base) for ratemaking purposes.

ANNUAL REPORT & APPLICABLE PSCC
On or before February 21st after each calendar year, the Company shall file a report with the Commission and the CGSA Cities showing all Pipeline Integrity Safety Testing expenses incurred during the previous calendar year and verifying the prior years collections and any underrecoveries or overrecoveries accruing to date under this Rider. The report shall separately identify and list such expenses by account number and project number. Prior to the effective date of this Rider and on or before February 21st of each succeeding year while this Rider is in effect, the Company shall also file an Addendum to this Rider with the Commission and the CGSA Cities (a) identifying the PIT Surcharges that will be applied during the ensuing 12-month recovery period from April through March billing cycles, and (b) providing the underlying data and calculations on which each PIT Surcharge for that period is based.

The Company shall file the report with the Commission electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Director of Oversight and Safety Division
Gas Services Department
Railroad Commission of Texas
P.O. Box 12967
Austin, TX 78711-2967

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	In addition to the annual report and Addendum to this Rider required above, the Company shall provide, on or before March 31st after each calendar year, written notice to each affected customer of (a) the PIT Surcharge that will be applied during the ensuing 12-month period from April through March billing cycles, and (b) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in both English and Spanish, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Companys monthly billing statements, including electronic billing statements. The Company shall also electronically file an affidavit annually with the Commission and the CGSA Cities certifying that notice has been provided to customers in this manner. The notice shall be presumed to be complete three calendar days after the date the separate mailing or billing statement is deposited in a postage-paid, properly addressed wrapper in a post office or official depository under care of the United States Postal Service. The initial notice shall be filed with, reviewed, and approved by the regulatory authority, and each subsequent notice shall follow the same format as that of the approved initial notice. PSF-All-ISOS-PipeFee	Texas Gas Service Company, a Division of ONE Gas, Inc. All Service Areas RATE SCHEDULE PSF PIPELINE SAFETY AND REGULATORY PROGRAM FEES TEXAS ADMINISTRATIVE CODE TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 8 PIPELINE SAFETY REGULATIONS SUBCHAPTER C REQUIREMENTS FOR GAS PIPELINES ONLY Rule Section8.201 Pipeline Safety and Regulatory Program Fees (a) Application of fees. Pursuant to Texas Utilities Code, 121.211, the Commission establishes a pipeline safety and regulatory program fee, to be assessed annually against operators of natural gas distribution pipelines and pipeline facilities and natural gas master metered pipelines and pipeline facilities subject to the Commission`s jurisdiction under Texas Utilities Code, Title 3. The total amount of revenue estimated to be collected under this section does not exceed the amount the Commission estimates to be necessary to recover the costs of administering the pipeline safety and regulatory programs under Texas Utilities Code, Title 3, excluding costs that are fully funded by federal sources for any fiscal year. (b) Natural gas distribution systems. The Commission hereby assesses each operator of a natural gas distribution system an annual pipeline safety and regulatory program fee of $1.00 for each service (service line) in service at the end of each calendar year as reported by each system operator on the U.S. Department of Transportation (DOT) Gas Distribution Annual Report, Form PHMSA F7100.1-1 due on March 15 of each year. (1) Each operator of a natural gas distribution system shall calculate the annual pipeline safety and regulatory program total to be paid to the Commission by multiplying the $1.00 fee by the number of services listed in Part B, Section 3, of Form PHMSA F7100.1-1, due on March 15 of each year. (2) Each operator of a natural gas distribution system shall remit to the Commission on March 15 of each year the amount calculated under paragraph (1) of

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	this subsection. (3) Each operator of a natural gas distribution system shall recover, by a surcharge to its existing rates, the amount the operator paid to the Commission under paragraph (1) of this subsection. The surcharge: (A) shall be a flat rate, one-time surcharge; (B) shall not be billed before the operator remits the pipeline safety and regulatory program fee to the Commission; (C) shall be applied in the billing cycle or cycles immediately following the date on which the operator paid the Commission; (D) shall not exceed $1.00 per service or service line (For the calendar year 2024 annual pipeline safety and regulatory program fee, billed effective with meters read on and after March 27, 2025, Texas Gas Service Company, a Division of ONE Gas, Inc. will bill all customers a one-time customer charge per bill of $1.00, based on $1.00 per service line); and (E) shall not be billed to a state agency, as that term is defined in Texas Utilities Code, 101.003. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each operator of a natural gas distribution system shall file with the Commission`s Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. Reports for the Commission shall be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address: Compliance Filing Director of Oversight and Safety Division Gas Services Department Railroad Commission of Texas P.O. Box 12967 Austin, Texas 78711-2967 (5) Each operator of a natural gas distribution system that is a utility subject to the jurisdiction of the Commission pursuant to Texas Utilities Code, Chapters 101 - 105, shall file a generally applicable tariff for its surcharge in conformance with the requirements of 7.315 of this title (relating to Filing of Tariffs). (6) Amounts recovered from customers under this subsection by an investor-owned natural gas distribution system or a cooperatively owned natural gas distribution system shall not be included in the revenue or gross receipts of the system for the purpose of calculating municipal franchise fees or any tax imposed under Subchapter B, Chapter 182, Tax Code, or under Chapter 122, nor shall such amounts be subject to a sales and use tax imposed by Chapter 151, Tax Code, or Subtitle C, Title 3,

	Tax Code. (c) Natural gas master meter systems. The Commission hereby assesses each natural gas master meter system an annual pipeline safety and regulatory program fee of $100 per master meter system. (1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of $100 per master meter system no later than June 30 of each year. (2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year. (3) Each operator of a natural gas master meter system shall recover as a surcharge to its existing rates the amounts paid to the Commission under paragraph (1) of this subsection. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each natural gas master meter system operator shall file with the Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. (d) Late payment penalty. If the operator of a natural gas distribution system or a natural gas master meter system does not remit payment of the annual pipeline safety and regulatory program fee to the Commission within 30 days of the due date, the Commission shall assess a late payment penalty of 10 percent of the total assessment due under subsection (b) or (c) of this section, as applicable, and shall notify the operator of the total amount due to the Commission. RATE CASE EXPENSE SURCHARGE

A. APPLICABILITY
The Rate Case Expense Surcharge (RCE) rate as set forth in Section (B) below is pursuant to Gas Utilities Case No. 00017471: Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc. to Increase Gas Utility Rates Within the Unincorporated Areas of the Central-Gulf Service Area, Final Order Finding of Fact No. XX-XX. This rate shall apply to the following rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. in the unincorporated areas of the Central-Gulf Service Area which includes Austin, Bastrop, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas: 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV and T-1-ENV.

B. RCE RATE
All Ccf during each billing period: $ 0.00627 per Ccf This rate will be in effect until all approved and expended rate case expenses are recovered under the applicable rate schedules. Texas Gas Service Company, a Division of ONE Gas, Inc. will recover $919,131.50 in actual expense and up to $340,400.00 in estimated expenses. The Rate Case Expense Surcharge will be a separate line item on the bill.

C. OTHER ADJUSTMENTS
Taxes: Plus applicable taxes and fees related to above.

D. CONDITIONS
Subject to all applicable laws and orders, and the Company`s rules and regulations on file with the regulatory authority.

E. COMPLIANCE
The Company shall file an annual rate case expense reconciliation report within ninety (90) days after each calendar year end until and including the calendar year end in which the rate case expenses are fully recovered. The Company shall file the report with the Commission addressed to the Director of Oversight and Safety Division, Gas Services Department and referencing Gas Utilities Case No. 00017471 Rate Case Expense Recovery Report. The report shall detail the monthly collections for RCE surcharge by customer class and show the outstanding balance.

Reports for the Commission should be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address:

1-ENV-CenGulf-OS-COG	Texas Gas Service Company, a Division of ONE Gas, Inc. Rate Schedule 1-ENV Central-Gulf Service Area COST OF GAS CLAUSE A. APPLICABILITY This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all unincorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bastrop, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas. B. DEFINITIONS 1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees and taxes. 2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year. 3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall not include the cost of financial instruments unless the use of such financial instruments is approved in advance and in writing by the Director of the Oversight and Safety Division of the Railroad Commission of Texas. Such approval would be requested as part of the Companys annual gas purchase plan, which shall be submitted annually to the Commission no later than June 15. 4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7).
5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit.
6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.
7. RNG - the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas.
8. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12 month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority.
9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of approved natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s); (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.
10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

C. COST OF GAS
In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT
If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS
Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES
In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT
The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; f) the revenue

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

associated fees and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from approved hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

H. ANNUAL RECONCILIATION REPORT
The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:
1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30.
2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues.
3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.
4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period.
5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period.
6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date.
7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination.

CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

QUALITY OF SERVICE

QUAL_SERVICE_ID	DESCRIPTION
CGSA-c	Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued) f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law. 9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference. A. TERMS AND CONDITIONS 1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing. 2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due. 3. Service is not available under this Plan for a term of less than twelve (12) months. B. AVERAGE PAYMENT AMOUNT 1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment amount. 2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay. 3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis. SECTION 10 ` FACILITIES AND EQUIPMENT 10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical. 10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company.
b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required

to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.
c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater

than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73 Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.

b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.

c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.

13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:

a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.

b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.

15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.

15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.

a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

collection of payment from Customer. $18.00
h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00
i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00
j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00
k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00
l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses
m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00
n) Meter Removal Fee $25.00
o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00
p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost
q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

SECTION 1 ` GENERAL STATEMENT AND DEFINITIONS

1.1 TARIFF APPLICABILITY Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative Tolerance Limit.

Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.

Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.

Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.

Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup

power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss, claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred

sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.
b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.

h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15 of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.

7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.

7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:

a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;

b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;

c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;

d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;

e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;

f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;

g) For Customers on transportation service, the Company may discontinue service upon request of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

following reasons:
a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.
b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.
c) Delinquency in payment for service by a previous occupant of the premises.
d) Failure to pay for merchandise or charges for non-utility service by the Company.
e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.
f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.
g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.
h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.
i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.
j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.
k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.
7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Classification System Violation Factors Factor Value (1-4) Points Tally Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this Section for 24 hours or more 4 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for less than 24 hours, but more than 12 hours 3 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for 12 hours or less 2 Demand for collection of full payment of bills due is made during an extreme weather emergency 3 The temperature is 10 degrees or less during the period of disconnection 4 The temperature is more than 10 degrees but less than or equal to 20 degrees during the period of disconnection 3 The temperature is more than 20 degrees but less than or equal to 32 degrees during the period of disconnection 2 Repeat violations based on Company`s history of compliance 3 Good faith effort to remedy violation -2 No effort to remedy violation during the extreme weather emergency 4 Total Penalty maximum per violation 10 points or more = Class A violation 7-9 points = Class B violation 4-6 points = Class C violation 1-3 points = Class D violation More than $5,000 $5,000.00 $4,000.00 $3,000.00 The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills. Beginning in the September or October billing periods, the Company shall give notice as follows:

a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.

b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.

c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.

7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.
7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.
7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS
8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.
8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.
8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:
a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;
b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or
c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.
d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.
e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.
8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.

8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.

8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.

8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.

8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.

8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12) consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section

15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.
8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.
8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.
8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.
8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.
9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.
a) if the meter is read by the utility, the date and reading of the meter at the beginning and end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the

meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.

9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.

9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.

9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.

9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.

9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:

a) Every deferred payment plan entered into due to the Customers inability to pay the outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.

b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.

c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

		schedules an appointment but fails to appear. $18.00 n) Meter Removal Fee $25.00 o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00 p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00 15.7 DEPOSIT AMOUNTS a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost b) Residential Customer Deposit Minimum $75.00 c) Non-Residential Deposit Minimum $250.00
328158	CGSA -1a	Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 SERVICE FEES AND DEPOSIT AMOUNTS 15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc. 15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS
The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST
A Customer may request an expedited service, upon availability. Charges may apply.

328159 CGSA -1b

Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 (Continued)

15.5 SPECIFIC SERVICE TIME REQUEST
A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES
All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00
b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00
c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34256

additional fee will be charged and must agree to pay such charge.
Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00
Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

CRR-All-ISOS	

Texas Gas Service Company, a Division of ONE Gas, Inc.
Rate Schedule CRR
Central-Gulf Service Area, Rio Grande Valley Service Area
North Texas Service Area and Borger/Skellytown Service Area

CUSTOMER RATE RELIEF RATE SCHEDULE

Applicable to all Sales Customers for the purpose of collecting and remitting customer rate relief charges as authorized by the Railroad Commission of Texas (Commission) in accordance with Chapter 104, Subchapter I of the Texas Utilities Code and the Commission Financing Order issued in Docket No. OS-21-00007061.

A. ABBREVIATIONS AND DEFINITIONS

1) Authority - The Texas Public Finance Authority, together with any successor to its duties and functions.
2) Bonds or Customer Rate Relief (CRR) Bonds - The Texas Natural Gas Securitization Finance Corporation Customer Rate Relief Bonds, Series 2023 and any additional or different designation or title by which each series of Bonds shall be known as determined by the Issuer Entity.
3) Ccf and Mcf - For Ccf, one hundred (100) standard cubic feet of gas, where one (1) standard cubic foot of gas is the amount of gas contained in one (1) cubic foot of space at a standard pressure of fourteen point sixty-five (14.65) pounds per square inch, absolute and a standard temperature of sixty (60) degrees Fahrenheit; and, for Mcf, 1,000 standard cubic feet of gas.
4) Central Servicer - The entity engaged in accordance with the terms of the Financing Order to, amongst other things, engage the Participating Gas Utilities as collection agents for the purposes of facilitating collection and remittance of CRR Charges by Participating Gas Utilities, and perform the other services required of it under the Servicing Agreement (as defined in the Financing Order).
5) Commission - The Railroad Commission of Texas, including its staff or delegate.
6) CRR Charge True-Up Adjustment - A True-Up Adjustment (as defined in the Financing Order).
7) CRR Charge True-Up Charge Adjustment Letter - A true-up adjustment letter substantially in the form of Exhibit 3 to the Financing Order.
8) CRR Scheduled Adjustment Date - January 1 and July 1 of each applicable year, provided that the CRR Scheduled Adjustment Date and any other deadlines or target dates related thereto, shall be subject to modification prior to the date the Bonds so as to reflect the terms of the Servicing Agreement.
9) Customer Rate Relief (CRR) Charge - A nonbypassable charge as defined in Tex. Util. Code Section 104.362(7).

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	10) Financing Order - The order adopted under Tex. Util. Code Section 104.366 approving the issuance of CRR Bonds and the creation of Customer Rate Relief Property and associated CRR Charges for the recovery of regulatory assets, including extraordinary costs, related financing costs, and other costs authorized by the Financing Order. 11) Gas Utility - Texas Gas Service Company, a Division of ONE Gas, Inc. and its successors and assignees, an operator of natural gas distribution pipelines that delivers and sells natural gas to the public and that is subject to the Commission's jurisdiction under Tex. Util. Code Section 102.001, or an operator that transmits, transports, delivers, or sells natural gas or synthetic natural gas to operators of natural gas distribution pipelines and whose rates for those services are established by the Commission in a rate proceeding filed under Chapter 104 of the Utilities Code, within the service area.? 12) Irrevocable - The Financing Order, together with the Customer Rate Relief Property as defined by Tex. Util. Code Section 104.362(8) and the CRR Charges authorized by the Financing Order, are irrevocable and not subject to reduction, impairment, or adjustment by further action of the Commission, except in connection with true-ups authorized by the Financing Order. 13) Issuer Entity - Texas Natural Gas Securitization Finance Corporation, a Texas nonprofit public corporation established by the Authority, or any successor created pursuant to Tex. Gov't Code Section 1232.1072. 14) Large Participating Gas Utility - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and any Participating Gas Utility or Successor Utility (as defined in the Financing Order) each of whose Normalized Sales Volumes exceed 2.0% of the total aggregate Normalized Sales Volumes among all Participating Gas Utilities. Any calculation performed in connection with the preceding sentence shall be made on the basis of the most recently reported Normalized Sales Volumes and such calculation shall be performed by the Central Servicer annually no later than one (1) month after Normalized Sales Volumes are reported as regularly scheduled under Paragraph H hereof; provided that the Commission and/or Central Servicer may perform such calculation without any limitation in order to give effect to any merger, acquisition, disposition, divesture, spin-off or other transaction that would impact a Participating Gas Utility's share of the total aggregate Normalized Sales Volumes. The Commission or the Central Servicer shall promptly thereafter provide written notice to a Participating Gas Utility that subsequently becomes a Large Participating Gas Utility, which change shall take effective beginning on January 1 of the following calendar year. 15) Nonbypassable - CRR Charges must be paid by all existing or future customers receiving service from a Participating Gas Utility or such gas utility's successors or assigns. 16) Normalized Sales Volumes - a) For Large Participating Gas Utilities: All natural gas volumes projected to be billed for the upcoming twelve (12) month period in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

collection of natural gas costs. For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated to calculate the CRR Charges. b) For other Participating Gas Utilities: All natural gas volumes billed in the preceding calendar year in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs and normalized according to the methodology utilized in each Participating Gas Utility's application filed in Docket No. OS-21- 00007061, Consolidated Applications For Customer Rate Relief and Related Regulatory Asset Determinations In Connection With The February 2021 Winter Storm. ? For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated in order to calculate the CRR Charges.
17) Participating Gas Utilities - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; Rockin' M Gas LLC d/b/a Bluebonnet Natural Gas LLC; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Corix Utilities (Texas) Inc.; EPCOR Gas Texas Inc.; SiEnergy, LP; Summit Utilities Arkansas, Inc. , Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and Universal Natural Gas, LLC d/b/a Universal Natural Gas, Inc. or any Successor Utility (as defined in the Financing Order).
18) Sales Customer(s) - All active customers taking service under a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs.

B. APPLICABILITY
This rate schedule sets out the rate, terms and conditions under which the CRR Charge shall be billed and collected by Texas Gas Service Company, a Division of ONE Gas, Inc. as a Participating Gas Utility for all Incorporated and Unincorporated Areas of the Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area under the terms of the Financing Order. Each individual Sales Customer is responsible for paying the CRR Charge billed to it in accordance with the terms of this rate schedule. Payment is to be made by an individual Sales Customer to the Participating Gas Utility of which it is a customer. The Participating Gas Utility is obligated to apply amounts collected from customers to pay any outstanding CRR Charges prior to applying such amounts for any other purpose. The Participating Gas Utility, as collection agent, shall remit collections of the CRR Charges to the Indenture Trustee in accordance with the terms of the Financing Order and any servicing or other similar agreement that is contemplated by the Financing Order.

C. TERM
This rate schedule shall remain in effect until the CRR Charges have been collected and remitted to the Indenture Trustee in an amount sufficient to satisfy all obligations in regard to paying principal and interest on the CRR Bonds together with all other financing costs, bond administrative expenses and other costs as provided in the Financing Order. This rate schedule and the CRR Charge are irrevocable and nonbypassable.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

D. SALES CUSTOMERS
For the purposes of billing the CRR Charges, all Sales Customers of the Participating Gas Utility's Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area shall be assessed the uniform volumetric charge identified below.

E. CRR CHARGE
The CRR Charge will be a monthly volumetric rate of $0.118/Ccf. The CRR Charge is calculated in accordance with and subject to the provisions set forth in the Financing Order and will be adjusted at least annually based upon the CRR Charge true- up adjustment procedure. The CRR Charge shall be included in the Participating Gas Utility's Purchase Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. Participating Gas Utilities may reflect the CRR Charge according to the delivery pressures defined in Participating Gas Utilities' applicable tariffs. Such delivery pressure specific charges shall be equivalent to the CRR Charge as determined below at 14.65 per square inch, as defined above.

F. DETERMINATION OF CUSTOMER RATE RELIEF CHARGE
The CRR Charge will be adjusted no less frequently than annually, in accordance with the terms of the Servicing Agreement (as defined in the Financing Order), to ensure that the expected collection of CRR Charges is adequate to pay when due, pursuant to the expected amortization schedule, principal and interest on the CRR Bonds and together with all other financing costs, bond administrative expenses and other costs, as provided in the Financing Order, on a timely basis. The CRR Charge shall be computed according to the formula described below.

Step 1: Determination of Normalized Sales Volumes

(A) Total Large Participating Gas Utility Normalized Sales Volumes (Mcf)

(B) Assumed % of uncollectible sales
(C) Total Normalized Sales Volumes Billed and Collected: (A * (1 - B)) For the avoidance of doubt, Normalized Sales Volumes are assumed to be calculated without giving effect to volumes anticipated from Participating Gas Utilities making up less than two percent (2.0%) of the total Normalized Sales Volumes of all Participating Gas Utilities.

Step 2: Determination of CRR Charge
(D) Total CRR Charge Rate Revenue Requirement for Applicable Period

(E) CRR Charge per Normalized Sales Volumes (Mcf): (D / C)

Thereof: CRR Charge for Sales Customers

G. CRR CHARGE TRUE-UP

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Changes to the CRR Charge will be effected through the filing of CRR Charge True-Up Adjustment Letters by the Central Servicer to the Commission as authorized by the Financing Order and in accordance with the Servicing Agreement. Not less than fifteen (15) days prior to each CRR Scheduled Adjustment Date and more frequently as required by the Central Servicer, the Central Servicer will submit the CRR Charge True-Up Adjustment Letter in the form of Exhibit 3 to the Financing Order to ensure that CRR Charge collections are sufficient to make all scheduled payments of CRR Bond principal and interest and meet other Ongoing Financing Costs (as defined in the Financing Order) on a timely basis during the payment period. In addition to the foregoing, the Central Servicer shall be authorized to file CRR Charge True-Up Adjustment Letters with the Commission that adjust the CRR Charge more frequently (but not more often than quarterly) as required under the provisions of the Servicing Agreement (as defined in the Financing Order).

H. CRR CHARGE TRUE-UP PROCEDURE
Texas Gas Service Company, a Division of ONE Gas, Inc. shall annually file with the Commission and the Central Servicer by June 1 of each year its Normalized Sales Volumes; each Large Participating Gas Utility shall include projected volumes for each of the future twelve (12) months beginning July 1, and each other Participating Gas Utility shall include its Normalized Sales Volumes for the prior calendar year. Such filing and/or reporting may be more frequent to the extent required under the Servicing Agreement and applicable Collection and Reporting Arrangements. If Texas Gas Service Company, a Division of ONE Gas, Inc. is a Large Participating Gas Utility, the Participating Gas Utility shall, upon the request of the Central Servicer, provide the Commission and the Central Servicer updated Normalized Sales Volumes for the succeeding twelve (12) month period no later than the fifteenth (15th) day following such request to allow the Central Servicer to make Interim True-Up Adjustments. Each Participating Gas Utility shall have the right to provide the foregoing information to the Central Servicer on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). The Central Servicer shall submit to the Commission and the Participating Gas Utilities, not less than fifteen (15) days prior to the CRR Scheduled Adjustment Date, a CRR Charge True-Up Adjustment Letter applying the CRR Charge True-Up Adjustment based on Normalized Sales Volumes and other mathematical factors and requesting administrative approval from the Commission as provided for in the Servicing Agreement. The Commission's review and approval of the True-Up Adjustment Letter shall be as set forth in the Servicing Agreement (it being understood such review is limited to determining if any mathematical or clerical errors are present in the application of the CRR Charge True-Up Adjustment relating to the appropriate amount of any over-collection or under-collection of CRR Charges and the amount of an adjustment). If any CRR Charge True-Up Adjustment that is an Interim True-Up Adjustment is necessary, (i) the Central Servicer may request and the Large Participating Gas Utilities shall provide revised Normalized Sales Volumes for each of the immediately succeeding twelve (12) months and related data

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	and (ii) within fifteen (15) days of receipt of such data, the Central Servicer shall file a revision to the CRR Rate Schedule in a True-Up Charge Adjustment Letter setting forth the adjusted CRR Charge to be effective for the upcoming period, in accordance with the Servicing Agreement. Texas Gas Service Company, a Division of ONE Gas, Inc. shall have the right to provide such information on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). A CRR Charge resulting from a true-up adjustment will become effective on the first (1st) billing cycle that is not less than fifteen (15) days following the making of the CRR Charge True-Up Adjustment filing. I. TAXABILITY The receipt of CRR Charges by a Participating Gas Utility is exempt from state and local sales and use taxes and utility gross receipts taxes and assessments and is excluded from revenue for purposes of franchise tax under Tex. Tax Code Section 171.1011. Meters Read On and After September 25, 2024 Supersedes Rate Schedule Dated September 26, 2023
PIT-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE PIT Central-Gulf Service Area PIPELINE INTEGRITY TESTING (PIT) RIDER PURPOSE The purpose of this Pipeline Integrity Testing Rider is to promote the public interest in pipeline safety by enabling Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) to recover the reasonable and necessary Pipeline Integrity Safety Testing expenses incurred by the Company during the prior year (including contractor costs but excluding the labor cost of Texas Gas Service Company employees). These legally mandated operating and maintenance expenses shall be recovered through a separate monthly volumetric charge (the Pipeline Integrity Testing or PIT Surcharge) that shall be shown as a separate line item on the customers monthly bill and calculated for each customer class as described below. Capital expenditures associated with the Pipeline Integrity Program shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Texas Utilities Code. APPLICABILITY This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

TERRITORY
This Rider shall apply to the following gas sales and standard transportation rate schedules of the Company`s Central-Gulf Service Area (CGSA) within the incorporated and unincorporated areas of Austin, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Georgetown, Gonzales, Hutto, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nixon, Pflugerville, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas and in the environs area of Bastrop, Texas: 10, 15, 20, 25, 30, 40, C-1, CNG-1, 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV.

QUALIFYING EXPENSES
This Rider applies only to the legally mandated safety testing of the Companys transmission lines in the CGSA under the Pipeline Integrity Safety Testing Program. The operating and maintenance expense items that qualify for recovery under this Rider shall include the contractor costs associated with land and leak survey, permitting, and job order preparation and completion; the clearing of right-of-way; any needed notifications to adjacent businesses and residences; traffic control equipment and personnel; Direct Current Voltage Gradient (DCVG), Close Interval (CI), and other surveys to ensure the integrity of the pipeline system; any required rigid bypasses; flushing of the lines and testing and disposal of the flush water; hydrostatic testing of the lines and analysis and disposal of the test water; any required pigging of the lines in connection with safety testing; any required x-ray welding; metallurgical testing of the pipeline or components thereof; site restoration, painting, and clean-up; expenses associated with providing a supply of compressed natural gas (CNG) to ensure uninterrupted service to customers during testing; and any other operating and maintenance expenses reasonably necessary to safely and effectively perform required safety testing of the Companys pipelines in the CGSA. Neither capital expenditures by the Company, nor the labor cost of Company employees, shall be recovered under this Rider.

CALCULATION OF PIT SURCHARGES
The Pipeline Integrity Testing Surcharges established under this Rider shall be designed so as to recover the Total Testing Expense incurred in the prior year for Pipeline Integrity Safety Testing, and shall be calculated as follows:
The Total Annual Testing Expense shall be divided by the estimated average annual usage to produce the annual PIT Surcharge.

$$\text{PIT Surcharge} = \frac{\text{Total Annual Testing Expense}}{\text{Estimated Annual Usage}}$$

Based upon customer data for the prior calendar year and any other relevant factors, the estimated annual usage may be revised annually to account for customer growth, and the resulting revised PIT Surcharge shall be applied to each class for the ensuing 12-month recovery period.

ANNUAL RECONCILIATION

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

After completion of each annual recovery period, the total revenues collected under this Rider for that year shall be reconciled against the revenues previously calculated to be collected for that year, and the PIT Surcharge for each class shall be adjusted upward or downward so that the Company recovers any underrecoveries or refunds any overrecoveries that may have accrued under the Rider, plus monthly interest on those underrecoveries or overrecoveries at the cost of long-term debt approved in the Companys most recent general rate case in which rates were set for application to customers in the CGSA. The reconciliation shall be filed with the regulatory authority on or before February 21st of each year, and the regulatory authority shall complete its review of the reconciliation on or before March 21st of each year, so that the Company can implement the reconciled PIT Surcharges beginning with the first billing cycle for April of each succeeding year.

DEFERRED ACCOUNTING
The Company is authorized and directed to defer, as a regulatory asset, all Pipeline Integrity Safety Testing expenses incurred during the testing cycle starting on January 1, 2016 and all revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Companys invested capital (rate base) for ratemaking purposes.

ANNUAL REPORT & APPLICABLE PSCC
On or before February 21st after each calendar year, the Company shall file a report with the Commission and the CGSA Cities showing all Pipeline Integrity Safety Testing expenses incurred during the previous calendar year and verifying the prior years collections and any underrecoveries or overrecoveries accruing to date under this Rider. The report shall separately identify and list such expenses by account number and project number. Prior to the effective date of this Rider and on or before February 21st of each succeeding year while this Rider is in effect, the Company shall also file an Addendum to this Rider with the Commission and the CGSA Cities (a) identifying the PIT Surcharges that will be applied during the ensuing 12-month recovery period from April through March billing cycles, and (b) providing the underlying data and calculations on which each PIT Surcharge for that period is based.

The Company shall file the report with the Commission electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Director of Oversight and Safety Division
Gas Services Department
Railroad Commission of Texas
P.O. Box 12967
Austin, TX 78711-2967

TARIFF CODE: DS **RRC TARIFF NO:** 34257

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	In addition to the annual report and Addendum to this Rider required above, the Company shall provide, on or before March 31st after each calendar year, written notice to each affected customer of (a) the PIT Surcharge that will be applied during the ensuing 12-month period from April through March billing cycles, and (b) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in both English and Spanish, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Companys monthly billing statements, including electronic billing statements. The Company shall also electronically file an affidavit annually with the Commission and the CGSA Cities certifying that notice has been provided to customers in this manner. The notice shall be presumed to be complete three calendar days after the date the separate mailing or billing statement is deposited in a postage-paid, properly addressed wrapper in a post office or official depository under care of the United States Postal Service. The initial notice shall be filed with, reviewed, and approved by the regulatory authority, and each subsequent notice shall follow the same format as that of the approved initial notice. PSF-All-ISOS-PipeFee	Texas Gas Service Company, a Division of ONE Gas, Inc. All Service Areas RATE SCHEDULE PSF PIPELINE SAFETY AND REGULATORY PROGRAM FEES TEXAS ADMINISTRATIVE CODE TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 8 PIPELINE SAFETY REGULATIONS SUBCHAPTER C REQUIREMENTS FOR GAS PIPELINES ONLY Rule Section8.201 Pipeline Safety and Regulatory Program Fees (a) Application of fees. Pursuant to Texas Utilities Code, 121.211, the Commission establishes a pipeline safety and regulatory program fee, to be assessed annually against operators of natural gas distribution pipelines and pipeline facilities and natural gas master metered pipelines and pipeline facilities subject to the Commission`s jurisdiction under Texas Utilities Code, Title 3. The total amount of revenue estimated to be collected under this section does not exceed the amount the Commission estimates to be necessary to recover the costs of administering the pipeline safety and regulatory programs under Texas Utilities Code, Title 3, excluding costs that are fully funded by federal sources for any fiscal year. (b) Natural gas distribution systems. The Commission hereby assesses each operator of a natural gas distribution system an annual pipeline safety and regulatory program fee of $1.00 for each service (service line) in service at the end of each calendar year as reported by each system operator on the U.S. Department of Transportation (DOT) Gas Distribution Annual Report, Form PHMSA F7100.1-1 due on March 15 of each year. (1) Each operator of a natural gas distribution system shall calculate the annual pipeline safety and regulatory program total to be paid to the Commission by multiplying the $1.00 fee by the number of services listed in Part B, Section 3, of Form PHMSA F7100.1-1, due on March 15 of each year. (2) Each operator of a natural gas distribution system shall remit to the Commission on March 15 of each year the amount calculated under paragraph (1) of

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	this subsection. (3) Each operator of a natural gas distribution system shall recover, by a surcharge to its existing rates, the amount the operator paid to the Commission under paragraph (1) of this subsection. The surcharge: (A) shall be a flat rate, one-time surcharge; (B) shall not be billed before the operator remits the pipeline safety and regulatory program fee to the Commission; (C) shall be applied in the billing cycle or cycles immediately following the date on which the operator paid the Commission; (D) shall not exceed $1.00 per service or service line (For the calendar year 2024 annual pipeline safety and regulatory program fee, billed effective with meters read on and after March 27, 2025, Texas Gas Service Company, a Division of ONE Gas, Inc. will bill all customers a one-time customer charge per bill of $1.00, based on $1.00 per service line); and (E) shall not be billed to a state agency, as that term is defined in Texas Utilities Code, 101.003. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each operator of a natural gas distribution system shall file with the Commission`s Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. Reports for the Commission shall be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address: Compliance Filing Director of Oversight and Safety Division Gas Services Department Railroad Commission of Texas P.O. Box 12967 Austin, Texas 78711-2967 (5) Each operator of a natural gas distribution system that is a utility subject to the jurisdiction of the Commission pursuant to Texas Utilities Code, Chapters 101 - 105, shall file a generally applicable tariff for its surcharge in conformance with the requirements of 7.315 of this title (relating to Filing of Tariffs). (6) Amounts recovered from customers under this subsection by an investor-owned natural gas distribution system or a cooperatively owned natural gas distribution system shall not be included in the revenue or gross receipts of the system for the purpose of calculating municipal franchise fees or any tax imposed under Subchapter B, Chapter 182, Tax Code, or under Chapter 122, nor shall such amounts be subject to a sales and use tax imposed by Chapter 151, Tax Code, or Subtitle C, Title 3,

	Tax Code. (c) Natural gas master meter systems. The Commission hereby assesses each natural gas master meter system an annual pipeline safety and regulatory program fee of $100 per master meter system. (1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of $100 per master meter system no later than June 30 of each year. (2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year. (3) Each operator of a natural gas master meter system shall recover as a surcharge to its existing rates the amounts paid to the Commission under paragraph (1) of this subsection. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each natural gas master meter system operator shall file with the Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. (d) Late payment penalty. If the operator of a natural gas distribution system or a natural gas master meter system does not remit payment of the annual pipeline safety and regulatory program fee to the Commission within 30 days of the due date, the Commission shall assess a late payment penalty of 10 percent of the total assessment due under subsection (b) or (c) of this section, as applicable, and shall notify the operator of the total amount due to the Commission. RATE CASE EXPENSE SURCHARGE

A. APPLICABILITY
The Rate Case Expense Surcharge (RCE) rate as set forth in Section (B) below is pursuant to Gas Utilities Case No. 00017471: Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc. to Increase Gas Utility Rates Within the Unincorporated Areas of the Central-Gulf Service Area, Final Order Finding of Fact No. XX-XX. This rate shall apply to the following rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. in the unincorporated areas of the Central-Gulf Service Area which includes Austin, Bastrop, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas: 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV and T-1-ENV.

B. RCE RATE
All Ccf during each billing period: $ 0.00627 per Ccf This rate will be in effect until all approved and expended rate case expenses are recovered under the applicable rate schedules. Texas Gas Service Company, a Division of ONE Gas, Inc. will recover $919,131.50 in actual expense and up to $340,400.00 in estimated expenses. The Rate Case Expense Surcharge will be a separate line item on the bill.

C. OTHER ADJUSTMENTS
Taxes: Plus applicable taxes and fees related to above.

D. CONDITIONS
Subject to all applicable laws and orders, and the Company`s rules and regulations on file with the regulatory authority.

E. COMPLIANCE
The Company shall file an annual rate case expense reconciliation report within ninety (90) days after each calendar year end until and including the calendar year end in which the rate case expenses are fully recovered. The Company shall file the report with the Commission addressed to the Director of Oversight and Safety Division, Gas Services Department and referencing Gas Utilities Case No. 00017471 Rate Case Expense Recovery Report. The report shall detail the monthly collections for RCE surcharge by customer class and show the outstanding balance.

Reports for the Commission should be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address:

1-ENV-CenGulf-OS-COG	Texas Gas Service Company, a Division of ONE Gas, Inc. Rate Schedule 1-ENV Central-Gulf Service Area COST OF GAS CLAUSE A. APPLICABILITY This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all unincorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bastrop, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas. B. DEFINITIONS 1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees and taxes. 2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year. 3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall not include the cost of financial instruments unless the use of such financial instruments is approved in advance and in writing by the Director of the Oversight and Safety Division of the Railroad Commission of Texas. Such approval would be requested as part of the Companys annual gas purchase plan, which shall be submitted annually to the Commission no later than June 15. 4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7).
5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit.
6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.
7. RNG - the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas.
8. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12 month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority.
9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of approved natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s); (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.
10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

C. COST OF GAS
In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT
If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS
Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES
In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT
The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; f) the revenue

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

associated fees and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from approved hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

H. ANNUAL RECONCILIATION REPORT
The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:
1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30.
2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues.
3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.
4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period.
5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period.
6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date.
7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination.

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
C-1-ENV-CenGulf-OS	

Texas Gas Service Company, a Division of ONE Gas, Inc.
RATE SCHEDULE C-1-
ENV Central-Gulf Service Area

ELECTRICAL COGENERATION RATE

APPLICABILITY

Service under this rate schedule is available to any customers who enters into a contract with Texas Gas Service Company, a Division of ONE Gas, Inc. to use natural gas for the purpose of electric generation. Electric generation is defined as facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and or backup power systems.

TERRITORY

This rate shall be available in the unincorporated areas of the Central-Gulf Service Area, which includes the unincorporated areas of Austin, Bastrop, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of $175.68
Interim Rate Adjustments (IRA) $25.96 per month (Footnote 1)
Total Customer Charge $201.64 per month

A delivery charge per monthly billing period @

For the First	5,000 Ccf/Month	$0.07724 per Ccf
For the Next	35,000 Ccf/Month	$0.06853 per Ccf
For the Next	60,000 Ccf/Month	$0.05527 per Ccf
All Over	100,000 Ccf/Month	$0.04018 per Ccf

OTHER ADJUSTMENTS

Cost of Gas Component: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of the Cost of Gas Clause, Rate Schedule 1-ENV.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	Pipeline Integrity Testing Rider: The billing shall reflect adjustments in accordance with provisions of the Pipeline Integrity Testing Rider, Rate Schedules PIT and PIT-Rider if applicable. Pipeline Safety and Regulatory Program Fees: The billing shall reflect adjustments in accordance with provisions of the Pipeline Safety and Regulatory Program Fees Rider, Rate Schedule PSF. Rate Case Expense Rider: The billing shall reflect adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider, Rate Schedule RCE-ENV. Taxes: Plus applicable taxes and fees related to above. CONDITIONS 1. Gas taken under this rate shall be used exclusively for the purpose of electric generation as defined in the Applicability section of this rate schedule and not for other purposes. The gas taken under this rate will be separately metered. 2. For the purpose of this rate, the annual load factor must be 60 percent or greater. The annual load factor is defined as the customer`s total annual consumption divided by the customer`s peak month consumption times twelve. If less than 60 percent load factor occurs for a twelve-month period, the rate charges will revert back to the rate that the customer would have otherwise been served under. A continuous twelve-month period of 60 percent or better load factor must precede a return to the electric generation rate. 3. Subject to all applicable laws and orders, and the Companys rules and regulations on file with the regulatory authority. CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

Source Note: The provisions of this Section7.455 adopted to be effective July 29, 2002, 27 TexReg 6687; amended to be effective May 14, 2018, 43 TexReg 2997; amended to be effective September 1, 2022, 47 TexReg 2516

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

QUALITY OF SERVICE

QUAL_SERVICE_ID	DESCRIPTION
CGSA-c	Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued) f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law. 9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference. A. TERMS AND CONDITIONS 1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing. 2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due. 3. Service is not available under this Plan for a term of less than twelve (12) months. B. AVERAGE PAYMENT AMOUNT 1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment amount. 2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay. 3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis. SECTION 10 ` FACILITIES AND EQUIPMENT 10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical. 10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not

be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company.
b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required

to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.
c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater

than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73 Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.

b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.

c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.

13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:

a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.

b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.

15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.

15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.

a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

collection of payment from Customer. $18.00
h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00
i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00
j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00
k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00
l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses
m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00
n) Meter Removal Fee $25.00
o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00
p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost
q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

SECTION 1 ` GENERAL STATEMENT AND DEFINITIONS

1.1 TARIFF APPLICABILITY Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative Tolerance Limit.

Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.

Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.

Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.

Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup

power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss, claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.
b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting

more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.

h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15 of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.

7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.

7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:

a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;

b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;

c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;

d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;

e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;

f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;

g) For Customers on transportation service, the Company may discontinue service upon request of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

following reasons:
a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.
b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.
c) Delinquency in payment for service by a previous occupant of the premises.
d) Failure to pay for merchandise or charges for non-utility service by the Company.
e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.
f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.
g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.
h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.
i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.
j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.
k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.
7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Beginning in the September or October billing periods, the Company shall give notice as follows:

a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.

b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.

c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.

7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In

the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.
7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.
7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS
8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.
8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.
8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:
a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;
b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or
c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.
d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.
e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.
8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.

8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.

8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.

8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.

8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.

8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12) consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section

15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.
8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.
8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.
8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.
8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.
9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.
a) if the meter is read by the utility, the date and reading of the meter at the beginning and end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the

meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.

9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.

9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.

9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.

9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.

9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:

a) Every deferred payment plan entered into due to the Customers inability to pay the outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.

b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.

c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

		schedules an appointment but fails to appear. $18.00 n) Meter Removal Fee $25.00 o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00 p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00 15.7 DEPOSIT AMOUNTS a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost b) Residential Customer Deposit Minimum $75.00 c) Non-Residential Deposit Minimum $250.00
328153	CGSA -1a	Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 SERVICE FEES AND DEPOSIT AMOUNTS 15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc. 15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS
The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST
A Customer may request an expedited service, upon availability. Charges may apply.

328154 CGSA -1b

Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 (Continued)

15.5 SPECIFIC SERVICE TIME REQUEST
A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES
All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00
b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00
c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34257

additional fee will be charged and must agree to pay such charge.
Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00
Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

COST OF GAS CLAUSE

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

A. APPLICABILITY This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all incorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

B. DEFINITIONS
1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees (including franchise fees) and taxes.
2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year.
3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall also include the cost of gas withdrawn from storage and shall include gains and losses from the utilization of natural gas financial instruments that are executed by the Company for the purpose of mitigating price volatility. Companies affiliated with, or sharing services with, the Company shall not be allowed to charge fees for transactions related to natural gas financial instruments utilized for purposes in this Cost of Gas Clause and hence cannot realize a profit in this regard.
4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule, which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7).
5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit.
6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees (including franchise fees) and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.

7. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12-month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority.

8. RNG is the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas.

9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees (including franchise fees) and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s), (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.

10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

C. COST OF GAS In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; (f) the revenue associated fees (including franchise fees) and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	H. ANNUAL RECONCILIATION REPORT The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to: 1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30. 2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues. 3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date. 4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period. 5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period. 6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date. 7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority thereafter determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination. C-1-CenGulf-IS-Cogen	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE NO. C-1 Central-Gulf Service Area ELECTRICAL COGENERATION RATE APPLICABILITY

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Service under this rate schedule is available to any customer customer who enters into a contract with Texas Gas Service Company, a Division of ONE Gas, Inc, to use natural gas for the purpose of electric generation. Electric generation is defined as facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and or backup power systems.

TERRITORY

This rate shall be available in the incorporated areas of the Central-Gulf Service Area, which includes, Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of $175.68 plus
Interim Rate Adjustments (IRA) $25.96 per month (Footnote 1)
Total Customer Charge $201.64 per month

A delivery charge per monthly billing period @

For the First	5,000 Ccf/Month	$0.07724 per Ccf
For the Next	35,000 Ccf/Month	$0.06853 per Ccf
For the Next	60,000 Ccf/Month	$0.05527 per Ccf
All Over	100,000 Ccf/Month	$0.04018 per Ccf

OTHER ADJUSTMENTS

Cost of Gas Component: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of the Cost of Gas Clause, Rate Schedule 1-INC.
Pipeline Integrity Testing Rider: The billing shall reflect adjustments in accordance with provisions of the Pipeline Integrity Testing Rider, Rate Schedules PIT and PIT-Rider if applicable.
Pipeline Safety and Regulatory Program Fees: The billing shall reflect adjustments in accordance with provisions of the Pipeline Safety and Regulatory Program Fees Rider, Rate Schedule PSF.
Rate Case Expense Rider: The billing shall reflect adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider, Rate Schedule RCE.
Taxes: Plus applicable taxes and fees (including franchise fees) related to above.

Rate Schedule CRR
Central-Gulf Service Area, Rio Grande Valley Service Area
North Texas Service Area and Borger/Skellytown Service Area

CUSTOMER RATE RELIEF RATE SCHEDULE

Applicable to all Sales Customers for the purpose of collecting and remitting customer rate relief charges as authorized by the Railroad Commission of Texas (Commission) in accordance with Chapter 104, Subchapter I of the Texas Utilities Code and the Commission Financing Order issued in Docket No. OS-21-00007061.

A. ABBREVIATIONS AND DEFINITIONS

1) Authority - The Texas Public Finance Authority, together with any successor to its duties and functions.
2) Bonds or Customer Rate Relief (CRR) Bonds - The Texas Natural Gas Securitization Finance Corporation Customer Rate Relief Bonds, Series 2023 and any additional or different designation or title by which each series of Bonds shall be known as determined by the Issuer Entity.
3) Ccf and Mcf - For Ccf, one hundred (100) standard cubic feet of gas, where one (1) standard cubic foot of gas is the amount of gas contained in one (1) cubic foot of space at a standard pressure of fourteen point sixty-five (14.65) pounds per square inch, absolute and a standard temperature of sixty (60) degrees Fahrenheit; and, for Mcf, 1,000 standard cubic feet of gas.
4) Central Servicer - The entity engaged in accordance with the terms of the Financing Order to, amongst other things, engage the Participating Gas Utilities as collection agents for the purposes of facilitating collection and remittance of CRR Charges by Participating Gas Utilities, and perform the other services required of it under the Servicing Agreement (as defined in the Financing Order).
5) Commission - The Railroad Commission of Texas, including its staff or delegate.
6) CRR Charge True-Up Adjustment - A True-Up Adjustment (as defined in the Financing Order).
7) CRR Charge True-Up Charge Adjustment Letter - A true-up adjustment letter substantially in the form of Exhibit 3 to the Financing Order.
8) CRR Scheduled Adjustment Date - January 1 and July 1 of each applicable year, provided that the CRR Scheduled Adjustment Date and any other deadlines or target dates related thereto, shall be subject to modification prior to the date the Bonds so as to reflect the terms of the Servicing Agreement.
9) Customer Rate Relief (CRR) Charge - A nonbypassable charge as defined in Tex. Util. Code Section 104.362(7).

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	10) Financing Order - The order adopted under Tex. Util. Code Section 104.366 approving the issuance of CRR Bonds and the creation of Customer Rate Relief Property and associated CRR Charges for the recovery of regulatory assets, including extraordinary costs, related financing costs, and other costs authorized by the Financing Order. 11) Gas Utility - Texas Gas Service Company, a Division of ONE Gas, Inc. and its successors and assignees, an operator of natural gas distribution pipelines that delivers and sells natural gas to the public and that is subject to the Commission's jurisdiction under Tex. Util. Code Section 102.001, or an operator that transmits, transports, delivers, or sells natural gas or synthetic natural gas to operators of natural gas distribution pipelines and whose rates for those services are established by the Commission in a rate proceeding filed under Chapter 104 of the Utilities Code, within the service area.? 12) Irrevocable - The Financing Order, together with the Customer Rate Relief Property as defined by Tex. Util. Code Section 104.362(8) and the CRR Charges authorized by the Financing Order, are irrevocable and not subject to reduction, impairment, or adjustment by further action of the Commission, except in connection with true-ups authorized by the Financing Order. 13) Issuer Entity - Texas Natural Gas Securitization Finance Corporation, a Texas nonprofit public corporation established by the Authority, or any successor created pursuant to Tex. Gov't Code Section 1232.1072. 14) Large Participating Gas Utility - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and any Participating Gas Utility or Successor Utility (as defined in the Financing Order) each of whose Normalized Sales Volumes exceed 2.0% of the total aggregate Normalized Sales Volumes among all Participating Gas Utilities. Any calculation performed in connection with the preceding sentence shall be made on the basis of the most recently reported Normalized Sales Volumes and such calculation shall be performed by the Central Servicer annually no later than one (1) month after Normalized Sales Volumes are reported as regularly scheduled under Paragraph H hereof; provided that the Commission and/or Central Servicer may perform such calculation without any limitation in order to give effect to any merger, acquisition, disposition, divesture, spin-off or other transaction that would impact a Participating Gas Utility's share of the total aggregate Normalized Sales Volumes. The Commission or the Central Servicer shall promptly thereafter provide written notice to a Participating Gas Utility that subsequently becomes a Large Participating Gas Utility, which change shall take effective beginning on January 1 of the following calendar year. 15) Nonbypassable - CRR Charges must be paid by all existing or future customers receiving service from a Participating Gas Utility or such gas utility's successors or assigns. 16) Normalized Sales Volumes - a) For Large Participating Gas Utilities: All natural gas volumes projected to be billed for the upcoming twelve (12) month period in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

collection of natural gas costs. For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated to calculate the CRR Charges. b) For other Participating Gas Utilities: All natural gas volumes billed in the preceding calendar year in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs and normalized according to the methodology utilized in each Participating Gas Utility's application filed in Docket No. OS-21- 00007061, Consolidated Applications For Customer Rate Relief and Related Regulatory Asset Determinations In Connection With The February 2021 Winter Storm. ? For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated in order to calculate the CRR Charges.
17) Participating Gas Utilities - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; Rockin' M Gas LLC d/b/a Bluebonnet Natural Gas LLC; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Corix Utilities (Texas) Inc.; EPCOR Gas Texas Inc.; SiEnergy, LP; Summit Utilities Arkansas, Inc. , Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and Universal Natural Gas, LLC d/b/a Universal Natural Gas, Inc. or any Successor Utility (as defined in the Financing Order).
18) Sales Customer(s) - All active customers taking service under a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs.

B. APPLICABILITY
This rate schedule sets out the rate, terms and conditions under which the CRR Charge shall be billed and collected by Texas Gas Service Company, a Division of ONE Gas, Inc. as a Participating Gas Utility for all Incorporated and Unincorporated Areas of the Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area under the terms of the Financing Order. Each individual Sales Customer is responsible for paying the CRR Charge billed to it in accordance with the terms of this rate schedule. Payment is to be made by an individual Sales Customer to the Participating Gas Utility of which it is a customer. The Participating Gas Utility is obligated to apply amounts collected from customers to pay any outstanding CRR Charges prior to applying such amounts for any other purpose. The Participating Gas Utility, as collection agent, shall remit collections of the CRR Charges to the Indenture Trustee in accordance with the terms of the Financing Order and any servicing or other similar agreement that is contemplated by the Financing Order.

C. TERM
This rate schedule shall remain in effect until the CRR Charges have been collected and remitted to the Indenture Trustee in an amount sufficient to satisfy all obligations in regard to paying principal and interest on the CRR Bonds together with all other financing costs, bond administrative expenses and other costs as provided in the Financing Order. This rate schedule and the CRR Charge are irrevocable and nonbypassable.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

D. SALES CUSTOMERS
For the purposes of billing the CRR Charges, all Sales Customers of the Participating Gas Utility's Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area shall be assessed the uniform volumetric charge identified below.

E. CRR CHARGE
The CRR Charge will be a monthly volumetric rate of $0.118/Ccf. The CRR Charge is calculated in accordance with and subject to the provisions set forth in the Financing Order and will be adjusted at least annually based upon the CRR Charge true- up adjustment procedure. The CRR Charge shall be included in the Participating Gas Utility's Purchase Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. Participating Gas Utilities may reflect the CRR Charge according to the delivery pressures defined in Participating Gas Utilities' applicable tariffs. Such delivery pressure specific charges shall be equivalent to the CRR Charge as determined below at 14.65 per square inch, as defined above.

F. DETERMINATION OF CUSTOMER RATE RELIEF CHARGE
The CRR Charge will be adjusted no less frequently than annually, in accordance with the terms of the Servicing Agreement (as defined in the Financing Order), to ensure that the expected collection of CRR Charges is adequate to pay when due, pursuant to the expected amortization schedule, principal and interest on the CRR Bonds and together with all other financing costs, bond administrative expenses and other costs, as provided in the Financing Order, on a timely basis. The CRR Charge shall be computed according to the formula described below.

Step 1: Determination of Normalized Sales Volumes

(A) Total Large Participating Gas Utility Normalized Sales Volumes (Mcf)

(B) Assumed % of uncollectible sales
(C) Total Normalized Sales Volumes Billed and Collected: (A * (1 - B)) For the avoidance of doubt, Normalized Sales Volumes are assumed to be calculated without giving effect to volumes anticipated from Participating Gas Utilities making up less than two percent (2.0%) of the total Normalized Sales Volumes of all Participating Gas Utilities.

Step 2: Determination of CRR Charge
(D) Total CRR Charge Rate Revenue Requirement for Applicable Period

(E) CRR Charge per Normalized Sales Volumes (Mcf): (D / C)

Thereof: CRR Charge for Sales Customers

G. CRR CHARGE TRUE-UP

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Changes to the CRR Charge will be effected through the filing of CRR Charge True-Up Adjustment Letters by the Central Servicer to the Commission as authorized by the Financing Order and in accordance with the Servicing Agreement. Not less than fifteen (15) days prior to each CRR Scheduled Adjustment Date and more frequently as required by the Central Servicer, the Central Servicer will submit the CRR Charge True-Up Adjustment Letter in the form of Exhibit 3 to the Financing Order to ensure that CRR Charge collections are sufficient to make all scheduled payments of CRR Bond principal and interest and meet other Ongoing Financing Costs (as defined in the Financing Order) on a timely basis during the payment period. In addition to the foregoing, the Central Servicer shall be authorized to file CRR Charge True-Up Adjustment Letters with the Commission that adjust the CRR Charge more frequently (but not more often than quarterly) as required under the provisions of the Servicing Agreement (as defined in the Financing Order).

H. CRR CHARGE TRUE-UP PROCEDURE
Texas Gas Service Company, a Division of ONE Gas, Inc. shall annually file with the Commission and the Central Servicer by June 1 of each year its Normalized Sales Volumes; each Large Participating Gas Utility shall include projected volumes for each of the future twelve (12) months beginning July 1, and each other Participating Gas Utility shall include its Normalized Sales Volumes for the prior calendar year. Such filing and/or reporting may be more frequent to the extent required under the Servicing Agreement and applicable Collection and Reporting Arrangements. If Texas Gas Service Company, a Division of ONE Gas, Inc. is a Large Participating Gas Utility, the Participating Gas Utility shall, upon the request of the Central Servicer, provide the Commission and the Central Servicer updated Normalized Sales Volumes for the succeeding twelve (12) month period no later than the fifteenth (15th) day following such request to allow the Central Servicer to make Interim True-Up Adjustments. Each Participating Gas Utility shall have the right to provide the foregoing information to the Central Servicer on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). The Central Servicer shall submit to the Commission and the Participating Gas Utilities, not less than fifteen (15) days prior to the CRR Scheduled Adjustment Date, a CRR Charge True-Up Adjustment Letter applying the CRR Charge True-Up Adjustment based on Normalized Sales Volumes and other mathematical factors and requesting administrative approval from the Commission as provided for in the Servicing Agreement. The Commission's review and approval of the True-Up Adjustment Letter shall be as set forth in the Servicing Agreement (it being understood such review is limited to determining if any mathematical or clerical errors are present in the application of the CRR Charge True-Up Adjustment relating to the appropriate amount of any over-collection or under-collection of CRR Charges and the amount of an adjustment). If any CRR Charge True-Up Adjustment that is an Interim True-Up Adjustment is necessary, (i) the Central Servicer may request and the Large Participating Gas Utilities shall provide revised Normalized Sales Volumes for each of the immediately succeeding twelve (12) months and related data

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	and (ii) within fifteen (15) days of receipt of such data, the Central Servicer shall file a revision to the CRR Rate Schedule in a True-Up Charge Adjustment Letter setting forth the adjusted CRR Charge to be effective for the upcoming period, in accordance with the Servicing Agreement. Texas Gas Service Company, a Division of ONE Gas, Inc. shall have the right to provide such information on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). A CRR Charge resulting from a true-up adjustment will become effective on the first (1st) billing cycle that is not less than fifteen (15) days following the making of the CRR Charge True-Up Adjustment filing. I. TAXABILITY The receipt of CRR Charges by a Participating Gas Utility is exempt from state and local sales and use taxes and utility gross receipts taxes and assessments and is excluded from revenue for purposes of franchise tax under Tex. Tax Code Section 171.1011. Meters Read On and After September 25, 2024 Supersedes Rate Schedule Dated September 26, 2023
PIT-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE PIT Central-Gulf Service Area PIPELINE INTEGRITY TESTING (PIT) RIDER PURPOSE The purpose of this Pipeline Integrity Testing Rider is to promote the public interest in pipeline safety by enabling Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) to recover the reasonable and necessary Pipeline Integrity Safety Testing expenses incurred by the Company during the prior year (including contractor costs but excluding the labor cost of Texas Gas Service Company employees). These legally mandated operating and maintenance expenses shall be recovered through a separate monthly volumetric charge (the Pipeline Integrity Testing or PIT Surcharge) that shall be shown as a separate line item on the customers monthly bill and calculated for each customer class as described below. Capital expenditures associated with the Pipeline Integrity Program shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Texas Utilities Code. APPLICABILITY This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

TERRITORY
This Rider shall apply to the following gas sales and standard transportation rate schedules of the Company`s Central-Gulf Service Area (CGSA) within the incorporated and unincorporated areas of Austin, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Georgetown, Gonzales, Hutto, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nixon, Pflugerville, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas and in the environs area of Bastrop, Texas: 10, 15, 20, 25, 30, 40, C-1, CNG-1, 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV.

QUALIFYING EXPENSES
This Rider applies only to the legally mandated safety testing of the Companys transmission lines in the CGSA under the Pipeline Integrity Safety Testing Program. The operating and maintenance expense items that qualify for recovery under this Rider shall include the contractor costs associated with land and leak survey, permitting, and job order preparation and completion; the clearing of right-of-way; any needed notifications to adjacent businesses and residences; traffic control equipment and personnel; Direct Current Voltage Gradient (DCVG), Close Interval (CI), and other surveys to ensure the integrity of the pipeline system; any required rigid bypasses; flushing of the lines and testing and disposal of the flush water; hydrostatic testing of the lines and analysis and disposal of the test water; any required pigging of the lines in connection with safety testing; any required x-ray welding; metallurgical testing of the pipeline or components thereof; site restoration, painting, and clean-up; expenses associated with providing a supply of compressed natural gas (CNG) to ensure uninterrupted service to customers during testing; and any other operating and maintenance expenses reasonably necessary to safely and effectively perform required safety testing of the Companys pipelines in the CGSA. Neither capital expenditures by the Company, nor the labor cost of Company employees, shall be recovered under this Rider.

CALCULATION OF PIT SURCHARGES
The Pipeline Integrity Testing Surcharges established under this Rider shall be designed so as to recover the Total Testing Expense incurred in the prior year for Pipeline Integrity Safety Testing, and shall be calculated as follows:
The Total Annual Testing Expense shall be divided by the estimated average annual usage to produce the annual PIT Surcharge.

$$\text{PIT Surcharge} = \frac{\text{Total Annual Testing Expense}}{\text{Estimated Annual Usage}}$$

Based upon customer data for the prior calendar year and any other relevant factors, the estimated annual usage may be revised annually to account for customer growth, and the resulting revised PIT Surcharge shall be applied to each class for the ensuing 12-month recovery period.

ANNUAL RECONCILIATION

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

After completion of each annual recovery period, the total revenues collected under this Rider for that year shall be reconciled against the revenues previously calculated to be collected for that year, and the PIT Surcharge for each class shall be adjusted upward or downward so that the Company recovers any underrecoveries or refunds any overrecoveries that may have accrued under the Rider, plus monthly interest on those underrecoveries or overrecoveries at the cost of long-term debt approved in the Companys most recent general rate case in which rates were set for application to customers in the CGSA. The reconciliation shall be filed with the regulatory authority on or before February 21st of each year, and the regulatory authority shall complete its review of the reconciliation on or before March 21st of each year, so that the Company can implement the reconciled PIT Surcharges beginning with the first billing cycle for April of each succeeding year.

DEFERRED ACCOUNTING
The Company is authorized and directed to defer, as a regulatory asset, all Pipeline Integrity Safety Testing expenses incurred during the testing cycle starting on January 1, 2016 and all revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Companys invested capital (rate base) for ratemaking purposes.

ANNUAL REPORT & APPLICABLE PSCC
On or before February 21st after each calendar year, the Company shall file a report with the Commission and the CGSA Cities showing all Pipeline Integrity Safety Testing expenses incurred during the previous calendar year and verifying the prior years collections and any underrecoveries or overrecoveries accruing to date under this Rider. The report shall separately identify and list such expenses by account number and project number. Prior to the effective date of this Rider and on or before February 21st of each succeeding year while this Rider is in effect, the Company shall also file an Addendum to this Rider with the Commission and the CGSA Cities (a) identifying the PIT Surcharges that will be applied during the ensuing 12-month recovery period from April through March billing cycles, and (b) providing the underlying data and calculations on which each PIT Surcharge for that period is based.

The Company shall file the report with the Commission electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Director of Oversight and Safety Division
Gas Services Department
Railroad Commission of Texas
P.O. Box 12967
Austin, TX 78711-2967

NOTICE TO AFFECTED CUSTOMERS

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	In addition to the annual report and Addendum to this Rider required above, the Company shall provide, on or before March 31st after each calendar year, written notice to each affected customer of (a) the PIT Surcharge that will be applied during the ensuing 12-month period from April through March billing cycles, and (b) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in both English and Spanish, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Companys monthly billing statements, including electronic billing statements. The Company shall also electronically file an affidavit annually with the Commission and the CGSA Cities certifying that notice has been provided to customers in this manner. The notice shall be presumed to be complete three calendar days after the date the separate mailing or billing statement is deposited in a postage-paid, properly addressed wrapper in a post office or official depository under care of the United States Postal Service. The initial notice shall be filed with, reviewed, and approved by the regulatory authority, and each subsequent notice shall follow the same format as that of the approved initial notice. PSF-All-ISOS-PipeFee	Texas Gas Service Company, a Division of ONE Gas, Inc. All Service Areas RATE SCHEDULE PSF PIPELINE SAFETY AND REGULATORY PROGRAM FEES TEXAS ADMINISTRATIVE CODE TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 8 PIPELINE SAFETY REGULATIONS SUBCHAPTER C REQUIREMENTS FOR GAS PIPELINES ONLY Rule Section8.201 Pipeline Safety and Regulatory Program Fees (a) Application of fees. Pursuant to Texas Utilities Code, 121.211, the Commission establishes a pipeline safety and regulatory program fee, to be assessed annually against operators of natural gas distribution pipelines and pipeline facilities and natural gas master metered pipelines and pipeline facilities subject to the Commission`s jurisdiction under Texas Utilities Code, Title 3. The total amount of revenue estimated to be collected under this section does not exceed the amount the Commission estimates to be necessary to recover the costs of administering the pipeline safety and regulatory programs under Texas Utilities Code, Title 3, excluding costs that are fully funded by federal sources for any fiscal year. (b) Natural gas distribution systems. The Commission hereby assesses each operator of a natural gas distribution system an annual pipeline safety and regulatory program fee of $1.00 for each service (service line) in service at the end of each calendar year as reported by each system operator on the U.S. Department of Transportation (DOT) Gas Distribution Annual Report, Form PHMSA F7100.1-1 due on March 15 of each year. (1) Each operator of a natural gas distribution system shall calculate the annual pipeline safety and regulatory program total to be paid to the Commission by multiplying the $1.00 fee by the number of services listed in Part B, Section 3, of Form PHMSA F7100.1-1, due on March 15 of each year. (2) Each operator of a natural gas distribution system shall remit to the Commission on March 15 of each year the amount calculated under paragraph (1) of

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	this subsection. (3) Each operator of a natural gas distribution system shall recover, by a surcharge to its existing rates, the amount the operator paid to the Commission under paragraph (1) of this subsection. The surcharge: (A) shall be a flat rate, one-time surcharge; (B) shall not be billed before the operator remits the pipeline safety and regulatory program fee to the Commission; (C) shall be applied in the billing cycle or cycles immediately following the date on which the operator paid the Commission; (D) shall not exceed $1.00 per service or service line (For the calendar year 2024 annual pipeline safety and regulatory program fee, billed effective with meters read on and after March 27, 2025, Texas Gas Service Company, a Division of ONE Gas, Inc. will bill all customers a one-time customer charge per bill of $1.00, based on $1.00 per service line); and (E) shall not be billed to a state agency, as that term is defined in Texas Utilities Code, 101.003. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each operator of a natural gas distribution system shall file with the Commission`s Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. Reports for the Commission shall be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address: Compliance Filing Director of Oversight and Safety Division Gas Services Department Railroad Commission of Texas P.O. Box 12967 Austin, Texas 78711-2967 (5) Each operator of a natural gas distribution system that is a utility subject to the jurisdiction of the Commission pursuant to Texas Utilities Code, Chapters 101 - 105, shall file a generally applicable tariff for its surcharge in conformance with the requirements of 7.315 of this title (relating to Filing of Tariffs). (6) Amounts recovered from customers under this subsection by an investor-owned natural gas distribution system or a cooperatively owned natural gas distribution system shall not be included in the revenue or gross receipts of the system for the purpose of calculating municipal franchise fees or any tax imposed under Subchapter B, Chapter 182, Tax Code, or under Chapter 122, nor shall such amounts be subject to a sales and use tax imposed by Chapter 151, Tax Code, or Subtitle C, Title 3,

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	Tax Code. (c) Natural gas master meter systems. The Commission hereby assesses each natural gas master meter system an annual pipeline safety and regulatory program fee of $100 per master meter system. (1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of $100 per master meter system no later than June 30 of each year. (2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year. (3) Each operator of a natural gas master meter system shall recover as a surcharge to its existing rates the amounts paid to the Commission under paragraph (1) of this subsection. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each natural gas master meter system operator shall file with the Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. (d) Late payment penalty. If the operator of a natural gas distribution system or a natural gas master meter system does not remit payment of the annual pipeline safety and regulatory program fee to the Commission within 30 days of the due date, the Commission shall assess a late payment penalty of 10 percent of the total assessment due under subsection (b) or (c) of this section, as applicable, and shall notify the operator of the total amount due to the Commission. CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

Source Note: The provisions of this Section7.455 adopted to be effective July 29, 2002, 27 TexReg 6687; amended to be effective May 14, 2018, 43 TexReg 2997; amended to be effective September 1, 2022, 47 TexReg 2516

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

QUALITY OF SERVICE

QUAL_SERVICE_ID	DESCRIPTION
CGSA-c	Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued) f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law. 9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference. A. TERMS AND CONDITIONS 1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing. 2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due. 3. Service is not available under this Plan for a term of less than twelve (12) months. B. AVERAGE PAYMENT AMOUNT 1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment amount. 2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay. 3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis. SECTION 10 ` FACILITIES AND EQUIPMENT 10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical. 10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not

be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company.
b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required

to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.
c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater

than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73 Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.

b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.

c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.

13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:

a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.

b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.

15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.

15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.

a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

collection of payment from Customer. $18.00
h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00
i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00
j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00
k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00
l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses
m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00
n) Meter Removal Fee $25.00
o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00
p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost
q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

SECTION 1 ` GENERAL STATEMENT AND DEFINITIONS

1.1 TARIFF APPLICABILITY Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative Tolerance Limit.

Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.

Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.

Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.

Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup

power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss, claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for

operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.
b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.

h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15 of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.

7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.

7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:

a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;

b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;

c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;

d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;

e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;

f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;

g) For Customers on transportation service, the Company may discontinue service upon request of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

following reasons:
a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.
b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.
c) Delinquency in payment for service by a previous occupant of the premises.
d) Failure to pay for merchandise or charges for non-utility service by the Company.
e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.
f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.
g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.
h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.
i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.
j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.
k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.
7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Classification System Violation Factors Factor Value (1-4) Points Tally Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this Section for 24 hours or more 4 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for less than 24 hours, but more than 12 hours 3 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for 12 hours or less 2 Demand for collection of full payment of bills due is made during an extreme weather emergency 3 The temperature is 10 degrees or less during the period of disconnection 4 The temperature is more than 10 degrees but less than or equal to 20 degrees during the period of disconnection 3 The temperature is more than 20 degrees but less than or equal to 32 degrees during the period of disconnection 2 Repeat violations based on Company`s history of compliance 3 Good faith effort to remedy violation -2 No effort to remedy violation during the extreme weather emergency 4 Total Penalty maximum per violation 10 points or more = Class A violation 7-9 points = Class B violation 4-6 points = Class C violation 1-3 points = Class D violation More than $5,000 $5,000.00 $4,000.00 $3,000.00 The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills. Beginning in the September or October billing periods, the Company shall give notice as follows:

a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.

b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.

c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.

7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In

the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.

7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.

7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS

8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.

8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.

8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:

a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;

b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or

c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.

d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.

e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.

8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.

8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.

8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.

8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.

8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.

8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12) consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section

15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.
8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.
8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.
8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.
8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.
9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.
a) if the meter is read by the utility, the date and reading of the meter at the beginning and end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the

meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.

9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.

9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.

9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.

9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.

9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:

a) Every deferred payment plan entered into due to the Customers inability to pay the outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.

b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.

c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

		schedules an appointment but fails to appear. $18.00 n) Meter Removal Fee $25.00 o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00 p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00 15.7 DEPOSIT AMOUNTS a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost b) Residential Customer Deposit Minimum $75.00 c) Non-Residential Deposit Minimum $250.00
328143	CGSA -1a	Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 SERVICE FEES AND DEPOSIT AMOUNTS 15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc. 15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS
The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST
A Customer may request an expedited service, upon availability. Charges may apply.

328144 CGSA -1b

Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 (Continued)

15.5 SPECIFIC SERVICE TIME REQUEST
A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES
All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00
b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00
c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34258

additional fee will be charged and must agree to pay such charge.
Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00
Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
1-ENV-CenGulf-OS-COG	

Texas Gas Service Company, a Division of ONE Gas, Inc.
Rate Schedule 1-ENV Central-Gulf Service Area
COST OF GAS CLAUSE

A. APPLICABILITY
This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all unincorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bastrop, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

B. DEFINITIONS
1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees and taxes.
2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year.
3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall not include the cost of financial instruments unless the use of such financial instruments is approved in advance and in writing by the Director of the Oversight and Safety Division of the Railroad Commission of Texas. Such approval would be requested as part of the Companys annual gas purchase plan, which shall be submitted annually to the Commission no later than June 15.
4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule, which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7).

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit.
6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.
7. RNG - the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas.
8. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12 month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority.
9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of approved natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s); (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.
10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

C. COST OF GAS
In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT
If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS
Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES
In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT
The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; f) the revenue

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

associated fees and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from approved hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

H. ANNUAL RECONCILIATION REPORT
The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:
1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30.
2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues.
3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.
4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period.
5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period.
6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date.
7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination.

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
7Z-CenGulf-OS-GasLt	

Texas Gas Service Company, a Division of ONE Gas, Inc.
RATE SCHEDULE 7Z
Central-Gulf Service Area
UNMETERED GAS LIGHT SERVICE RATE

APPLICABILITY
Applicable to any Customer on Texas Gas Service Company, a Division of ONE Gas, Inc.s system requiring natural gas service for gas lighting only, without the use of metering device. Gas service is only available to Customers utilizing standard gas lighting equipment manufactured with an orifice burner assembly or equivalent that is intended for lighting of sidewalks and other walkways. The Company, in its sole discretion, shall determine if Customers lighting equipment qualifies for this tariff and shall contract with Customer for the appropriate monthly charge based upon Customers complete installation of gas lighting equipment. Gas service under this rate schedule is available only with the Company as the sole supplier of gas for Customer and is not available for resale to others or for standby or supplemental service.

TERRITORY
Environs of the Central-Gulf Service Area which includes the unincorporated areas of Austin, Bastrop, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE
The total hourly rated consumption of all gas lighting equipment included, expressed in Ccf at the location, shall be multiplied by 730 for gas lighting equipment that runs continuously or 365 for gas lighting equipment with a light sensor, to determine the average monthly consumption of the service. The result, rounded to the next highest Ccf, shall then be billed the rates provided in this rate schedule:

Residential $0.87646 per Ccf
Commercial $0.27930 per Ccf
Industrial $0.14569 per Ccf
Public Authority $0.13768 per Ccf

OTHER ADJUSTMENTS
Cost of Gas Component: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-ENV.
Taxes: Plus applicable taxes and fees related to above.

CONDITIONS
The Customer shall ensure that the installation of lighting equipment conforms to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	industry safety standards. The Company reserves the right to review Customers installation of lighting equipment from time to time to determine if it conforms to terms and conditions as set forth in this tariff and the executed service agreement with the Customer. Customer shall notify Company in writing within 30 days of any change in number of gas lights or other material changes made to the gas lighting installation. Subject to all applicable laws and orders, and the Companys rules and regulations on file with the regulatory authority. CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

QUALITY OF SERVICE

QUAL_SERVICE_ID	DESCRIPTION
CGSA-c	Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued) f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law. 9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference. A. TERMS AND CONDITIONS 1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing. 2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due. 3. Service is not available under this Plan for a term of less than twelve (12) months. B. AVERAGE PAYMENT AMOUNT 1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment amount. 2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay. 3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis. SECTION 10 ` FACILITIES AND EQUIPMENT 10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical. 10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not

be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company.
b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required

to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.
c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater

than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73 Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.

b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.

c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.

13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:

a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.

b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.

15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.

15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.

a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

collection of payment from Customer. $18.00
h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00
i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00
j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00
k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00
l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses
m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00
n) Meter Removal Fee $25.00
o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00
p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost
q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

SECTION 1 ` GENERAL STATEMENT AND DEFINITIONS

1.1 TARIFF APPLICABILITY Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative Tolerance Limit.

Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.

Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.

Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.

Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup

power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss, claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.
b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.

h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15 of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.

7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.

7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:

a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;

b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;

c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;

d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;

e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;

f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;

g) For Customers on transportation service, the Company may discontinue service upon request of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

following reasons:
a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.
b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.
c) Delinquency in payment for service by a previous occupant of the premises.
d) Failure to pay for merchandise or charges for non-utility service by the Company.
e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.
f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.
g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.
h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.
i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.
j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.
k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.
7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Classification System Violation Factors Factor Value (1-4) Points Tally Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this Section for 24 hours or more 4 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for less than 24 hours, but more than 12 hours 3 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for 12 hours or less 2 Demand for collection of full payment of bills due is made during an extreme weather emergency 3 The temperature is 10 degrees or less during the period of disconnection 4 The temperature is more than 10 degrees but less than or equal to 20 degrees during the period of disconnection 3 The temperature is more than 20 degrees but less than or equal to 32 degrees during the period of disconnection 2 Repeat violations based on Company`s history of compliance 3 Good faith effort to remedy violation -2 No effort to remedy violation during the extreme weather emergency 4 Total Penalty maximum per violation 10 points or more = Class A violation 7-9 points = Class B violation 4-6 points = Class C violation 1-3 points = Class D violation More than $5,000 $5,000.00 $4,000.00 $3,000.00 The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills. Beginning in the September or October billing periods, the Company shall give notice as follows:

a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.

b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.

c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.

7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In

the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.

7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.

7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS

8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.

8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.

8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:

a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;

b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or

c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.

d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.

e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.

8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.

8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.

8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.

8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.

8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.

8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12) consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.
8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.
8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.
8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.
8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.
9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.
a) if the meter is read by the utility, the date and reading of the meter at the beginning and end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the

meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.

9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.

9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.

9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.

9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.

9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:

a) Every deferred payment plan entered into due to the Customers inability to pay the outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.

b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.

c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

TARIFF CODE: DS **RRC TARIFF NO:** 34259

		schedules an appointment but fails to appear. $18.00 n) Meter Removal Fee $25.00 o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00 p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00 15.7 DEPOSIT AMOUNTS a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost b) Residential Customer Deposit Minimum $75.00 c) Non-Residential Deposit Minimum $250.00
321582	CGSA -1a	Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 SERVICE FEES AND DEPOSIT AMOUNTS 15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc. 15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS
The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST
A Customer may request an expedited service, upon availability. Charges may apply.

321583 CGSA -1b

Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 (Continued)

15.5 SPECIFIC SERVICE TIME REQUEST
A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES
All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00
b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00
c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34259

additional fee will be charged and must agree to pay such charge.
Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00
Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

CRR-All-ISOS	

Texas Gas Service Company, a Division of ONE Gas, Inc.
Rate Schedule CRR
Central-Gulf Service Area, Rio Grande Valley Service Area
North Texas Service Area and Borger/Skellytown Service Area

CUSTOMER RATE RELIEF RATE SCHEDULE

Applicable to all Sales Customers for the purpose of collecting and remitting customer rate relief charges as authorized by the Railroad Commission of Texas (Commission) in accordance with Chapter 104, Subchapter I of the Texas Utilities Code and the Commission Financing Order issued in Docket No. OS-21-00007061.

A. ABBREVIATIONS AND DEFINITIONS

1) Authority - The Texas Public Finance Authority, together with any successor to its duties and functions.
2) Bonds or Customer Rate Relief (CRR) Bonds - The Texas Natural Gas Securitization Finance Corporation Customer Rate Relief Bonds, Series 2023 and any additional or different designation or title by which each series of Bonds shall be known as determined by the Issuer Entity.
3) Ccf and Mcf - For Ccf, one hundred (100) standard cubic feet of gas, where one (1) standard cubic foot of gas is the amount of gas contained in one (1) cubic foot of space at a standard pressure of fourteen point sixty-five (14.65) pounds per square inch, absolute and a standard temperature of sixty (60) degrees Fahrenheit; and, for Mcf, 1,000 standard cubic feet of gas.
4) Central Servicer - The entity engaged in accordance with the terms of the Financing Order to, amongst other things, engage the Participating Gas Utilities as collection agents for the purposes of facilitating collection and remittance of CRR Charges by Participating Gas Utilities, and perform the other services required of it under the Servicing Agreement (as defined in the Financing Order).
5) Commission - The Railroad Commission of Texas, including its staff or delegate.
6) CRR Charge True-Up Adjustment - A True-Up Adjustment (as defined in the Financing Order).
7) CRR Charge True-Up Charge Adjustment Letter - A true-up adjustment letter substantially in the form of Exhibit 3 to the Financing Order.
8) CRR Scheduled Adjustment Date - January 1 and July 1 of each applicable year, provided that the CRR Scheduled Adjustment Date and any other deadlines or target dates related thereto, shall be subject to modification prior to the date the Bonds so as to reflect the terms of the Servicing Agreement.
9) Customer Rate Relief (CRR) Charge - A nonbypassable charge as defined in Tex. Util. Code Section 104.362(7).

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	10) Financing Order - The order adopted under Tex. Util. Code Section 104.366 approving the issuance of CRR Bonds and the creation of Customer Rate Relief Property and associated CRR Charges for the recovery of regulatory assets, including extraordinary costs, related financing costs, and other costs authorized by the Financing Order. 11) Gas Utility - Texas Gas Service Company, a Division of ONE Gas, Inc. and its successors and assignees, an operator of natural gas distribution pipelines that delivers and sells natural gas to the public and that is subject to the Commission's jurisdiction under Tex. Util. Code Section 102.001, or an operator that transmits, transports, delivers, or sells natural gas or synthetic natural gas to operators of natural gas distribution pipelines and whose rates for those services are established by the Commission in a rate proceeding filed under Chapter 104 of the Utilities Code, within the service area.? 12) Irrevocable - The Financing Order, together with the Customer Rate Relief Property as defined by Tex. Util. Code Section 104.362(8) and the CRR Charges authorized by the Financing Order, are irrevocable and not subject to reduction, impairment, or adjustment by further action of the Commission, except in connection with true-ups authorized by the Financing Order. 13) Issuer Entity - Texas Natural Gas Securitization Finance Corporation, a Texas nonprofit public corporation established by the Authority, or any successor created pursuant to Tex. Gov't Code Section 1232.1072. 14) Large Participating Gas Utility - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and any Participating Gas Utility or Successor Utility (as defined in the Financing Order) each of whose Normalized Sales Volumes exceed 2.0% of the total aggregate Normalized Sales Volumes among all Participating Gas Utilities. Any calculation performed in connection with the preceding sentence shall be made on the basis of the most recently reported Normalized Sales Volumes and such calculation shall be performed by the Central Servicer annually no later than one (1) month after Normalized Sales Volumes are reported as regularly scheduled under Paragraph H hereof; provided that the Commission and/or Central Servicer may perform such calculation without any limitation in order to give effect to any merger, acquisition, disposition, divesture, spin-off or other transaction that would impact a Participating Gas Utility's share of the total aggregate Normalized Sales Volumes. The Commission or the Central Servicer shall promptly thereafter provide written notice to a Participating Gas Utility that subsequently becomes a Large Participating Gas Utility, which change shall take effective beginning on January 1 of the following calendar year. 15) Nonbypassable - CRR Charges must be paid by all existing or future customers receiving service from a Participating Gas Utility or such gas utility's successors or assigns. 16) Normalized Sales Volumes - a) For Large Participating Gas Utilities: All natural gas volumes projected to be billed for the upcoming twelve (12) month period in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

collection of natural gas costs. For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated to calculate the CRR Charges. b) For other Participating Gas Utilities: All natural gas volumes billed in the preceding calendar year in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs and normalized according to the methodology utilized in each Participating Gas Utility's application filed in Docket No. OS-21- 00007061, Consolidated Applications For Customer Rate Relief and Related Regulatory Asset Determinations In Connection With The February 2021 Winter Storm. ? For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated in order to calculate the CRR Charges.
17) Participating Gas Utilities - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; Rockin' M Gas LLC d/b/a Bluebonnet Natural Gas LLC; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Corix Utilities (Texas) Inc.; EPCOR Gas Texas Inc.; SiEnergy, LP; Summit Utilities Arkansas, Inc. , Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and Universal Natural Gas, LLC d/b/a Universal Natural Gas, Inc. or any Successor Utility (as defined in the Financing Order).
18) Sales Customer(s) - All active customers taking service under a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs.

B. APPLICABILITY
This rate schedule sets out the rate, terms and conditions under which the CRR Charge shall be billed and collected by Texas Gas Service Company, a Division of ONE Gas, Inc. as a Participating Gas Utility for all Incorporated and Unincorporated Areas of the Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area under the terms of the Financing Order. Each individual Sales Customer is responsible for paying the CRR Charge billed to it in accordance with the terms of this rate schedule. Payment is to be made by an individual Sales Customer to the Participating Gas Utility of which it is a customer. The Participating Gas Utility is obligated to apply amounts collected from customers to pay any outstanding CRR Charges prior to applying such amounts for any other purpose. The Participating Gas Utility, as collection agent, shall remit collections of the CRR Charges to the Indenture Trustee in accordance with the terms of the Financing Order and any servicing or other similar agreement that is contemplated by the Financing Order.

C. TERM
This rate schedule shall remain in effect until the CRR Charges have been collected and remitted to the Indenture Trustee in an amount sufficient to satisfy all obligations in regard to paying principal and interest on the CRR Bonds together with all other financing costs, bond administrative expenses and other costs as provided in the Financing Order. This rate schedule and the CRR Charge are irrevocable and nonbypassable.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

D. SALES CUSTOMERS
For the purposes of billing the CRR Charges, all Sales Customers of the Participating Gas Utility's Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area shall be assessed the uniform volumetric charge identified below.

E. CRR CHARGE
The CRR Charge will be a monthly volumetric rate of $0.118/Ccf. The CRR Charge is calculated in accordance with and subject to the provisions set forth in the Financing Order and will be adjusted at least annually based upon the CRR Charge true- up adjustment procedure. The CRR Charge shall be included in the Participating Gas Utility's Purchase Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. Participating Gas Utilities may reflect the CRR Charge according to the delivery pressures defined in Participating Gas Utilities' applicable tariffs. Such delivery pressure specific charges shall be equivalent to the CRR Charge as determined below at 14.65 per square inch, as defined above.

F. DETERMINATION OF CUSTOMER RATE RELIEF CHARGE
The CRR Charge will be adjusted no less frequently than annually, in accordance with the terms of the Servicing Agreement (as defined in the Financing Order), to ensure that the expected collection of CRR Charges is adequate to pay when due, pursuant to the expected amortization schedule, principal and interest on the CRR Bonds and together with all other financing costs, bond administrative expenses and other costs, as provided in the Financing Order, on a timely basis. The CRR Charge shall be computed according to the formula described below.

Step 1: Determination of Normalized Sales Volumes

(A) Total Large Participating Gas Utility Normalized Sales Volumes (Mcf)

(B) Assumed % of uncollectible sales
(C) Total Normalized Sales Volumes Billed and Collected: (A * (1 - B)) For the avoidance of doubt, Normalized Sales Volumes are assumed to be calculated without giving effect to volumes anticipated from Participating Gas Utilities making up less than two percent (2.0%) of the total Normalized Sales Volumes of all Participating Gas Utilities.

Step 2: Determination of CRR Charge
(D) Total CRR Charge Rate Revenue Requirement for Applicable Period

(E) CRR Charge per Normalized Sales Volumes (Mcf): (D / C)

Thereof: CRR Charge for Sales Customers

G. CRR CHARGE TRUE-UP

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Changes to the CRR Charge will be effected through the filing of CRR Charge True-Up Adjustment Letters by the Central Servicer to the Commission as authorized by the Financing Order and in accordance with the Servicing Agreement. Not less than fifteen (15) days prior to each CRR Scheduled Adjustment Date and more frequently as required by the Central Servicer, the Central Servicer will submit the CRR Charge True-Up Adjustment Letter in the form of Exhibit 3 to the Financing Order to ensure that CRR Charge collections are sufficient to make all scheduled payments of CRR Bond principal and interest and meet other Ongoing Financing Costs (as defined in the Financing Order) on a timely basis during the payment period. In addition to the foregoing, the Central Servicer shall be authorized to file CRR Charge True-Up Adjustment Letters with the Commission that adjust the CRR Charge more frequently (but not more often than quarterly) as required under the provisions of the Servicing Agreement (as defined in the Financing Order).

H. CRR CHARGE TRUE-UP PROCEDURE
Texas Gas Service Company, a Division of ONE Gas, Inc. shall annually file with the Commission and the Central Servicer by June 1 of each year its Normalized Sales Volumes; each Large Participating Gas Utility shall include projected volumes for each of the future twelve (12) months beginning July 1, and each other Participating Gas Utility shall include its Normalized Sales Volumes for the prior calendar year. Such filing and/or reporting may be more frequent to the extent required under the Servicing Agreement and applicable Collection and Reporting Arrangements. If Texas Gas Service Company, a Division of ONE Gas, Inc. is a Large Participating Gas Utility, the Participating Gas Utility shall, upon the request of the Central Servicer, provide the Commission and the Central Servicer updated Normalized Sales Volumes for the succeeding twelve (12) month period no later than the fifteenth (15th) day following such request to allow the Central Servicer to make Interim True-Up Adjustments. Each Participating Gas Utility shall have the right to provide the foregoing information to the Central Servicer on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). The Central Servicer shall submit to the Commission and the Participating Gas Utilities, not less than fifteen (15) days prior to the CRR Scheduled Adjustment Date, a CRR Charge True-Up Adjustment Letter applying the CRR Charge True-Up Adjustment based on Normalized Sales Volumes and other mathematical factors and requesting administrative approval from the Commission as provided for in the Servicing Agreement. The Commission's review and approval of the True-Up Adjustment Letter shall be as set forth in the Servicing Agreement (it being understood such review is limited to determining if any mathematical or clerical errors are present in the application of the CRR Charge True-Up Adjustment relating to the appropriate amount of any over-collection or under-collection of CRR Charges and the amount of an adjustment). If any CRR Charge True-Up Adjustment that is an Interim True-Up Adjustment is necessary, (i) the Central Servicer may request and the Large Participating Gas Utilities shall provide revised Normalized Sales Volumes for each of the immediately succeeding twelve (12) months and related data

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	and (ii) within fifteen (15) days of receipt of such data, the Central Servicer shall file a revision to the CRR Rate Schedule in a True-Up Charge Adjustment Letter setting forth the adjusted CRR Charge to be effective for the upcoming period, in accordance with the Servicing Agreement. Texas Gas Service Company, a Division of ONE Gas, Inc. shall have the right to provide such information on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). A CRR Charge resulting from a true-up adjustment will become effective on the first (1st) billing cycle that is not less than fifteen (15) days following the making of the CRR Charge True-Up Adjustment filing. I. TAXABILITY The receipt of CRR Charges by a Participating Gas Utility is exempt from state and local sales and use taxes and utility gross receipts taxes and assessments and is excluded from revenue for purposes of franchise tax under Tex. Tax Code Section 171.1011. Meters Read On and After September 25, 2024 Supersedes Rate Schedule Dated September 26, 2023
PIT-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE PIT Central-Gulf Service Area PIPELINE INTEGRITY TESTING (PIT) RIDER PURPOSE The purpose of this Pipeline Integrity Testing Rider is to promote the public interest in pipeline safety by enabling Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) to recover the reasonable and necessary Pipeline Integrity Safety Testing expenses incurred by the Company during the prior year (including contractor costs but excluding the labor cost of Texas Gas Service Company employees). These legally mandated operating and maintenance expenses shall be recovered through a separate monthly volumetric charge (the Pipeline Integrity Testing or PIT Surcharge) that shall be shown as a separate line item on the customers monthly bill and calculated for each customer class as described below. Capital expenditures associated with the Pipeline Integrity Program shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Texas Utilities Code. APPLICABILITY This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

TERRITORY
This Rider shall apply to the following gas sales and standard transportation rate schedules of the Company`s Central-Gulf Service Area (CGSA) within the incorporated and unincorporated areas of Austin, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Georgetown, Gonzales, Hutto, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nixon, Pflugerville, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas and in the environs area of Bastrop, Texas: 10, 15, 20, 25, 30, 40, C-1, CNG-1, 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV.

QUALIFYING EXPENSES
This Rider applies only to the legally mandated safety testing of the Companys transmission lines in the CGSA under the Pipeline Integrity Safety Testing Program. The operating and maintenance expense items that qualify for recovery under this Rider shall include the contractor costs associated with land and leak survey, permitting, and job order preparation and completion; the clearing of right-of-way; any needed notifications to adjacent businesses and residences; traffic control equipment and personnel; Direct Current Voltage Gradient (DCVG), Close Interval (CI), and other surveys to ensure the integrity of the pipeline system; any required rigid bypasses; flushing of the lines and testing and disposal of the flush water; hydrostatic testing of the lines and analysis and disposal of the test water; any required pigging of the lines in connection with safety testing; any required x-ray welding; metallurgical testing of the pipeline or components thereof; site restoration, painting, and clean-up; expenses associated with providing a supply of compressed natural gas (CNG) to ensure uninterrupted service to customers during testing; and any other operating and maintenance expenses reasonably necessary to safely and effectively perform required safety testing of the Companys pipelines in the CGSA. Neither capital expenditures by the Company, nor the labor cost of Company employees, shall be recovered under this Rider.

CALCULATION OF PIT SURCHARGES
The Pipeline Integrity Testing Surcharges established under this Rider shall be designed so as to recover the Total Testing Expense incurred in the prior year for Pipeline Integrity Safety Testing, and shall be calculated as follows:
The Total Annual Testing Expense shall be divided by the estimated average annual usage to produce the annual PIT Surcharge.

$$\text{PIT Surcharge} = \frac{\text{Total Annual Testing Expense}}{\text{Estimated Annual Usage}}$$

Based upon customer data for the prior calendar year and any other relevant factors, the estimated annual usage may be revised annually to account for customer growth, and the resulting revised PIT Surcharge shall be applied to each class for the ensuing 12-month recovery period.

ANNUAL RECONCILIATION

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

After completion of each annual recovery period, the total revenues collected under this Rider for that year shall be reconciled against the revenues previously calculated to be collected for that year, and the PIT Surcharge for each class shall be adjusted upward or downward so that the Company recovers any underrecoveries or refunds any overrecoveries that may have accrued under the Rider, plus monthly interest on those underrecoveries or overrecoveries at the cost of long-term debt approved in the Companys most recent general rate case in which rates were set for application to customers in the CGSA. The reconciliation shall be filed with the regulatory authority on or before February 21st of each year, and the regulatory authority shall complete its review of the reconciliation on or before March 21st of each year, so that the Company can implement the reconciled PIT Surcharges beginning with the first billing cycle for April of each succeeding year.

DEFERRED ACCOUNTING
The Company is authorized and directed to defer, as a regulatory asset, all Pipeline Integrity Safety Testing expenses incurred during the testing cycle starting on January 1, 2016 and all revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Companys invested capital (rate base) for ratemaking purposes.

ANNUAL REPORT & APPLICABLE PSCC
On or before February 21st after each calendar year, the Company shall file a report with the Commission and the CGSA Cities showing all Pipeline Integrity Safety Testing expenses incurred during the previous calendar year and verifying the prior years collections and any underrecoveries or overrecoveries accruing to date under this Rider. The report shall separately identify and list such expenses by account number and project number. Prior to the effective date of this Rider and on or before February 21st of each succeeding year while this Rider is in effect, the Company shall also file an Addendum to this Rider with the Commission and the CGSA Cities (a) identifying the PIT Surcharges that will be applied during the ensuing 12-month recovery period from April through March billing cycles, and (b) providing the underlying data and calculations on which each PIT Surcharge for that period is based.

The Company shall file the report with the Commission electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Director of Oversight and Safety Division
Gas Services Department

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	In addition to the annual report and Addendum to this Rider required above, the Company shall provide, on or before March 31st after each calendar year, written notice to each affected customer of (a) the PIT Surcharge that will be applied during the ensuing 12-month period from April through March billing cycles, and (b) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in both English and Spanish, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Companys monthly billing statements, including electronic billing statements. The Company shall also electronically file an affidavit annually with the Commission and the CGSA Cities certifying that notice has been provided to customers in this manner. The notice shall be presumed to be complete three calendar days after the date the separate mailing or billing statement is deposited in a postage-paid, properly addressed wrapper in a post office or official depository under care of the United States Postal Service. The initial notice shall be filed with, reviewed, and approved by the regulatory authority, and each subsequent notice shall follow the same format as that of the approved initial notice. PSF-All-ISOS-PipeFee	Texas Gas Service Company, a Division of ONE Gas, Inc. All Service Areas RATE SCHEDULE PSF PIPELINE SAFETY AND REGULATORY PROGRAM FEES TEXAS ADMINISTRATIVE CODE TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 8 PIPELINE SAFETY REGULATIONS SUBCHAPTER C REQUIREMENTS FOR GAS PIPELINES ONLY Rule Section8.201 Pipeline Safety and Regulatory Program Fees (a) Application of fees. Pursuant to Texas Utilities Code, 121.211, the Commission establishes a pipeline safety and regulatory program fee, to be assessed annually against operators of natural gas distribution pipelines and pipeline facilities and natural gas master metered pipelines and pipeline facilities subject to the Commission`s jurisdiction under Texas Utilities Code, Title 3. The total amount of revenue estimated to be collected under this section does not exceed the amount the Commission estimates to be necessary to recover the costs of administering the pipeline safety and regulatory programs under Texas Utilities Code, Title 3, excluding costs that are fully funded by federal sources for any fiscal year. (b) Natural gas distribution systems. The Commission hereby assesses each operator of a natural gas distribution system an annual pipeline safety and regulatory program fee of $1.00 for each service (service line) in service at the end of each calendar year as reported by each system operator on the U.S. Department of Transportation (DOT) Gas Distribution Annual Report, Form PHMSA F7100.1-1 due on March 15 of each year. (1) Each operator of a natural gas distribution system shall calculate the annual pipeline safety and regulatory program total to be paid to the Commission by multiplying the $1.00 fee by the number of services listed in Part B, Section 3, of Form PHMSA F7100.1-1, due on March 15 of each year. (2) Each operator of a natural gas distribution system shall remit to the Commission on March 15 of each year the amount calculated under paragraph (1) of

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION

this subsection.
(3) Each operator of a natural gas distribution system shall recover, by a surcharge to its existing rates, the amount the operator paid to the Commission under paragraph (1) of this subsection.

The surcharge:
(A) shall be a flat rate, one-time surcharge;
(B) shall not be billed before the operator remits the pipeline safety and regulatory program fee to the Commission;
(C) shall be applied in the billing cycle or cycles immediately following the date on which the operator paid the Commission;
(D) shall not exceed $1.00 per service or service line (For the calendar year 2024 annual pipeline safety and regulatory program fee, billed effective with meters read on and after March 27, 2025, Texas Gas Service Company, a Division of ONE Gas, Inc. will bill all customers a one-time customer charge per bill of $1.00, based on $1.00 per service line); and
(E) shall not be billed to a state agency, as that term is defined in Texas Utilities Code, 101.003.

(4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each operator of a natural gas distribution system shall file with the Commission`s Oversight and Safety Division a report showing:
(A) the pipeline safety and regulatory program fee amount paid to the Commission;
(B) the unit rate and total amount of the surcharge billed to each customer;
(C) the date or dates on which the surcharge was billed to customers; and
(D) the total amount collected from customers from the surcharge. Reports for the Commission shall be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Compliance Filing
Director of Oversight and Safety Division

SCHEDULE ID	DESCRIPTION
	Tax Code. (c) Natural gas master meter systems. The Commission hereby assesses each natural gas master meter system an annual pipeline safety and regulatory program fee of $100 per master meter system. (1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of $100 per master meter system no later than June 30 of each year. (2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year. (3) Each operator of a natural gas master meter system shall recover as a surcharge to its existing rates the amounts paid to the Commission under paragraph (1) of this subsection. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each natural gas master meter system operator shall file with the Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. (d) Late payment penalty. If the operator of a natural gas distribution system or a natural gas master meter system does not remit payment of the annual pipeline safety and regulatory program fee to the Commission within 30 days of the due date, the Commission shall assess a late payment penalty of 10 percent of the total assessment due under subsection (b) or (c) of this section, as applicable, and shall notify the operator of the total amount due to the Commission. WNA-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE WNA Central-Gulf Service Area

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

WEATHER NORMALIZATION ADJUSTMENT CLAUSE

APPLICABILITY
The Weather Normalization Adjustment Clause (WNA) shall apply to the following general service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) in the incorporated and unincorporated areas served in the Central-Gulf Service Area including Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, Texas: Rate Schedules 10, 15, 1Z, 1Y, 20, 25, 2Z, 2Y, 40, and 4Z. The WNA shall be effective during the September through May billing cycles.

PURPOSE
The WNA refunds over-collections or surcharges under-collections of revenue due to colder or warmer than normal weather, as established in the Company`s most recent rate filing.

WNA MECHANISM
In order to reflect weather effects in a timely and accurate manner, the WNA adjustment shall be calculated separately for each billing cycle and rate schedule. The weather factor, determined for each rate schedule in the most recent rate case, shows the effect of one heating degree day on consumption for that rate schedule. During each billing cycle, the weather factor is multiplied by the difference between normal and actual heating degree days for the billing period and by the number of customers billed. This WNA volume adjustment is priced at the current cost of service rate per Ccf to determine a WNA revenue adjustment, which is spread to the customers in the billing cycle on a prorata basis. The WNA for each billing cycle and rate schedule shall be based on the following formula:

WNA Rate = WNAD, where
CV

CV = Current Volumes for the billing period.
WNAD = Weather Normalization Adjustment Dollars to be collected from each billing cycle and rate schedule. This factor shall be based on the following formula:
WNAD = (HDD Diff * CB * WF) * COS rate, where
HDD Diff = (Normal HDD ` Actual HDD), the difference between normal and actual heating degree days for the billing period.
CB = Number of customers billed for the billing period.
WF = Weather factor determined for each rate schedule in the most recent rate case.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

A. APPLICABILITY
This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all unincorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bastrop, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

B. DEFINITIONS
1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees and taxes.
2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year.
3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall not include the cost of financial instruments unless the use of such financial instruments is approved in advance and in writing by the Director of the Oversight and Safety Division of the Railroad Commission of Texas. Such approval would be requested as part of the Companys annual gas purchase plan, which shall be submitted annually to the Commission no later than June 15.
4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule, which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7).
5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit.
6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments;

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

(b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.

7. RNG - the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas.

8. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12 month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority.

9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of approved natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s); (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.

10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

C. COST OF GAS

In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT

If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS
Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES
In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT
The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; f) the revenue associated fees and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from approved hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	H. ANNUAL RECONCILIATION REPORT The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to: 1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30. 2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues. 3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date. 4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period. 5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period. 6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date. 7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination. CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

QUALITY OF SERVICE

QUAL_SERVICE_ID	DESCRIPTION
CGSA-c	Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued) f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law. 9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference. A. TERMS AND CONDITIONS 1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing. 2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due. 3. Service is not available under this Plan for a term of less than twelve (12) months. B. AVERAGE PAYMENT AMOUNT 1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment amount. 2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay. 3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis. SECTION 10 ` FACILITIES AND EQUIPMENT 10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical. 10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not

be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company.
b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required

to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.
c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater

than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73 Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.

b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.

c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.

13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:

a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.

b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical

average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.

15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.

15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.

a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

collection of payment from Customer. $18.00
h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00
i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00
j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00
k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00
l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses
m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00
n) Meter Removal Fee $25.00
o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00
p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost
q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

SECTION 1 ` GENERAL STATEMENT AND DEFINITIONS

1.1 TARIFF APPLICABILITY Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative Tolerance Limit.

Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.

Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.

Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.

Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup

power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss, claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for

operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.
b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.

h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in

subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15 of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.

7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.

7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:

a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;

b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;

c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;

d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;

e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;

f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;

g) For Customers on transportation service, the Company may discontinue service upon request of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

following reasons:
a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.
b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.
c) Delinquency in payment for service by a previous occupant of the premises.
d) Failure to pay for merchandise or charges for non-utility service by the Company.
e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.
f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.
g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.
h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.
i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.
j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.
k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.
7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Classification System Violation Factors Factor Value (1-4) Points Tally Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this Section for 24 hours or more 4 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for less than 24 hours, but more than 12 hours 3 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for 12 hours or less 2 Demand for collection of full payment of bills due is made during an extreme weather emergency 3 The temperature is 10 degrees or less during the period of disconnection 4 The temperature is more than 10 degrees but less than or equal to 20 degrees during the period of disconnection 3 The temperature is more than 20 degrees but less than or equal to 32 degrees during the period of disconnection 2 Repeat violations based on Company`s history of compliance 3 Good faith effort to remedy violation -2 No effort to remedy violation during the extreme weather emergency 4 Total Penalty maximum per violation 10 points or more = Class A violation 7-9 points = Class B violation 4-6 points = Class C violation 1-3 points = Class D violation More than $5,000 $5,000.00 $4,000.00 $3,000.00 The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills. Beginning in the September or October billing periods, the Company shall give notice as follows:

a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.

b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.

c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.

7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In

the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.

7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.

7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS

8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.

8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.

8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:

a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;

b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or

c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.

d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.

e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.

8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.

8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.

8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.

8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.

8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.

8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12) consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.
8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.
8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.
8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.
8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.
9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.
a) if the meter is read by the utility, the date and reading of the meter at the beginning and end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the

meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.

9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.

9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.

9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.

9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.

9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:

a) Every deferred payment plan entered into due to the Customers inability to pay the outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.

b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.

c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

		schedules an appointment but fails to appear. $18.00 n) Meter Removal Fee $25.00 o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00 p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00 15.7 DEPOSIT AMOUNTS a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost b) Residential Customer Deposit Minimum $75.00 c) Non-Residential Deposit Minimum $250.00
328113	CGSA -1a	Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 SERVICE FEES AND DEPOSIT AMOUNTS 15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc. 15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS
The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST
A Customer may request an expedited service, upon availability. Charges may apply.

328114 CGSA -1b

Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 (Continued)

15.5 SPECIFIC SERVICE TIME REQUEST
A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES
All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00
b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00
c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34260

additional fee will be charged and must agree to pay such charge.
Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00
Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
1-ENV-CenGulf-OS-COG	

Texas Gas Service Company, a Division of ONE Gas, Inc.
Rate Schedule 1-ENV Central-Gulf Service Area
COST OF GAS CLAUSE

A. APPLICABILITY
This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all unincorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bastrop, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

B. DEFINITIONS
1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees and taxes.
2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year.
3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall not include the cost of financial instruments unless the use of such financial instruments is approved in advance and in writing by the Director of the Oversight and Safety Division of the Railroad Commission of Texas. Such approval would be requested as part of the Companys annual gas purchase plan, which shall be submitted annually to the Commission no later than June 15.
4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule, which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7).

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit. 6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases. 7. RNG - the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas. 8. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12 month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority. 9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of approved natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s); (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases. 10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

C. COST OF GAS
In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT
If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS
Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES
In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT
The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; f) the revenue

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

associated fees and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from approved hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

H. ANNUAL RECONCILIATION REPORT
The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:
1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30.
2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues.
3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.
4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period.
5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period.
6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date.
7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination.

INDUSTRIAL SERVICE RATE

APPLICABILITY
Applicable to any qualifying industrial customer whose primary business activity at the location served is included in one of the following classifications of the Standard Industrial Classification Manual of the U.S. Government. Division B - Mining - all Major Groups Division D - Manufacturing - all Major Groups Divisions E and J - Utility and Government - facilities generating power for resale only

TERRITORY
Environs of the Central-Gulf Service Area, which includes the unincorporated areas of Austin, Bastrop, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE
During each monthly billing period:

A customer charge per meter per month of $571.38 plus
All Ccf per monthly billing period @ $0.14569 per Ccf

OTHER ADJUSTMENTS
Cost of Gas Component: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-ENV.
Pipeline Integrity Testing Rider: The billing shall reflect adjustments in accordance with provisions of the Pipeline Integrity Testing Rider, Rate Schedule PIT and PIT-Rider, if applicable.
Pipeline Safety and Regulatory Program Fees: The billing shall reflect adjustments in accordance with provisions of the Pipeline Safety and Regulatory Program Fees Rider, Rate Schedule PSF.
Rate Case Expense Rider: The billing shall reflect adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider, Rate Schedule RCE-ENV.
Taxes: Plus applicable taxes and fees related to above.

CONDITIONS
Subject to all applicable laws and orders, and the Companys rules and regulations on file with the regulatory authority.

CUSTOMER RATE RELIEF RATE SCHEDULE

Applicable to all Sales Customers for the purpose of collecting and remitting customer rate relief charges as authorized by the Railroad Commission of Texas (Commission) in accordance with Chapter 104, Subchapter I of the Texas Utilities Code and the Commission Financing Order issued in Docket No. OS-21-00007061.

A. ABBREVIATIONS AND DEFINITIONS

1) Authority - The Texas Public Finance Authority, together with any successor to its duties and functions.
2) Bonds or Customer Rate Relief (CRR) Bonds - The Texas Natural Gas Securitization Finance Corporation Customer Rate Relief Bonds, Series 2023 and any additional or different designation or title by which each series of Bonds shall be known as determined by the Issuer Entity.
3) Ccf and Mcf - For Ccf, one hundred (100) standard cubic feet of gas, where one (1) standard cubic foot of gas is the amount of gas contained in one (1) cubic foot of space at a standard pressure of fourteen point sixty-five (14.65) pounds per square inch, absolute and a standard temperature of sixty (60) degrees Fahrenheit; and, for Mcf, 1,000 standard cubic feet of gas.
4) Central Servicer - The entity engaged in accordance with the terms of the Financing Order to, amongst other things, engage the Participating Gas Utilities as collection agents for the purposes of facilitating collection and remittance of CRR Charges by Participating Gas Utilities, and perform the other services required of it under the Servicing Agreement (as defined in the Financing Order).
5) Commission - The Railroad Commission of Texas, including its staff or delegate.
6) CRR Charge True-Up Adjustment - A True-Up Adjustment (as defined in the Financing Order).
7) CRR Charge True-Up Charge Adjustment Letter - A true-up adjustment letter substantially in the form of Exhibit 3 to the Financing Order.
8) CRR Scheduled Adjustment Date - January 1 and July 1 of each applicable year, provided that the CRR Scheduled Adjustment Date and any other deadlines or target dates related thereto, shall be subject to modification prior to the date the Bonds so as to reflect the terms of the Servicing Agreement.
9) Customer Rate Relief (CRR) Charge - A nonbypassable charge as defined in Tex. Util. Code Section 104.362(7).
10) Financing Order - The order adopted under Tex. Util. Code Section 104.366 approving the issuance of CRR Bonds and the creation of Customer Rate Relief Property and associated CRR Charges for the recovery of regulatory assets,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	including extraordinary costs, related financing costs, and other costs authorized by the Financing Order. 11) Gas Utility - Texas Gas Service Company, a Division of ONE Gas, Inc. and its successors and assignees, an operator of natural gas distribution pipelines that delivers and sells natural gas to the public and that is subject to the Commission's jurisdiction under Tex. Util. Code Section 102.001, or an operator that transmits, transports, delivers, or sells natural gas or synthetic natural gas to operators of natural gas distribution pipelines and whose rates for those services are established by the Commission in a rate proceeding filed under Chapter 104 of the Utilities Code, within the service area.? 12) Irrevocable - The Financing Order, together with the Customer Rate Relief Property as defined by Tex. Util. Code Section 104.362(8) and the CRR Charges authorized by the Financing Order, are irrevocable and not subject to reduction, impairment, or adjustment by further action of the Commission, except in connection with true-ups authorized by the Financing Order. 13) Issuer Entity - Texas Natural Gas Securitization Finance Corporation, a Texas nonprofit public corporation established by the Authority, or any successor created pursuant to Tex. Gov't Code Section 1232.1072. 14) Large Participating Gas Utility - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and any Participating Gas Utility or Successor Utility (as defined in the Financing Order) each of whose Normalized Sales Volumes exceed 2.0% of the total aggregate Normalized Sales Volumes among all Participating Gas Utilities. Any calculation performed in connection with the preceding sentence shall be made on the basis of the most recently reported Normalized Sales Volumes and such calculation shall be performed by the Central Servicer annually no later than one (1) month after Normalized Sales Volumes are reported as regularly scheduled under Paragraph H hereof; provided that the Commission and/or Central Servicer may perform such calculation without any limitation in order to give effect to any merger, acquisition, disposition, divesture, spin-off or other transaction that would impact a Participating Gas Utility's share of the total aggregate Normalized Sales Volumes. The Commission or the Central Servicer shall promptly thereafter provide written notice to a Participating Gas Utility that subsequently becomes a Large Participating Gas Utility, which change shall take effective beginning on January 1 of the following calendar year. 15) Nonbypassable - CRR Charges must be paid by all existing or future customers receiving service from a Participating Gas Utility or such gas utility's successors or assigns. 16) Normalized Sales Volumes - a) For Large Participating Gas Utilities: All natural gas volumes projected to be billed for the upcoming twelve (12) month period in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated to calculate the CRR Charges. b) For other Participating Gas Utilities: All natural gas volumes

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

billed in the preceding calendar year in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs and normalized according to the methodology utilized in each Participating Gas Utility's application filed in Docket No. OS-21- 00007061, Consolidated Applications For Customer Rate Relief and Related Regulatory Asset Determinations In Connection With The February 2021 Winter Storm. ? For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated in order to calculate the CRR Charges.
17) Participating Gas Utilities - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; Rockin' M Gas LLC d/b/a Bluebonnet Natural Gas LLC; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Corix Utilities (Texas) Inc.; EPCOR Gas Texas Inc.; SiEnergy, LP; Summit Utilities Arkansas, Inc. , Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and Universal Natural Gas, LLC d/b/a Universal Natural Gas, Inc. or any Successor Utility (as defined in the Financing Order).
18) Sales Customer(s) - All active customers taking service under a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs.

B. APPLICABILITY
This rate schedule sets out the rate, terms and conditions under which the CRR Charge shall be billed and collected by Texas Gas Service Company, a Division of ONE Gas, Inc. as a Participating Gas Utility for all Incorporated and Unincorporated Areas of the Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area under the terms of the Financing Order. Each individual Sales Customer is responsible for paying the CRR Charge billed to it in accordance with the terms of this rate schedule. Payment is to be made by an individual Sales Customer to the Participating Gas Utility of which it is a customer. The Participating Gas Utility is obligated to apply amounts collected from customers to pay any outstanding CRR Charges prior to applying such amounts for any other purpose. The Participating Gas Utility, as collection agent, shall remit collections of the CRR Charges to the Indenture Trustee in accordance with the terms of the Financing Order and any servicing or other similar agreement that is contemplated by the Financing Order.

C. TERM
This rate schedule shall remain in effect until the CRR Charges have been collected and remitted to the Indenture Trustee in an amount sufficient to satisfy all obligations in regard to paying principal and interest on the CRR Bonds together with all other financing costs, bond administrative expenses and other costs as provided in the Financing Order. This rate schedule and the CRR Charge are irrevocable and nonbypassable.

D. SALES CUSTOMERS
For the purposes of billing the CRR Charges, all Sales Customers of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Participating Gas Utility's Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area shall be assessed the uniform volumetric charge identified below.

E. CRR CHARGE
The CRR Charge will be a monthly volumetric rate of $0.118/Ccf. The CRR Charge is calculated in accordance with and subject to the provisions set forth in the Financing Order and will be adjusted at least annually based upon the CRR Charge true- up adjustment procedure. The CRR Charge shall be included in the Participating Gas Utility's Purchase Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. Participating Gas Utilities may reflect the CRR Charge according to the delivery pressures defined in Participating Gas Utilities' applicable tariffs. Such delivery pressure specific charges shall be equivalent to the CRR Charge as determined below at 14.65 per square inch, as defined above.

F. DETERMINATION OF CUSTOMER RATE RELIEF CHARGE
The CRR Charge will be adjusted no less frequently than annually, in accordance with the terms of the Servicing Agreement (as defined in the Financing Order), to ensure that the expected collection of CRR Charges is adequate to pay when due, pursuant to the expected amortization schedule, principal and interest on the CRR Bonds and together with all other financing costs, bond administrative expenses and other costs, as provided in the Financing Order, on a timely basis. The CRR Charge shall be computed according to the formula described below.

Step 1: Determination of Normalized Sales Volumes

(A) Total Large Participating Gas Utility Normalized Sales Volumes (Mcf)

(B) Assumed % of uncollectible sales
(C) Total Normalized Sales Volumes Billed and Collected: (A * (1 - B)) For the avoidance of doubt, Normalized Sales Volumes are assumed to be calculated without giving effect to volumes anticipated from Participating Gas Utilities making up less than two percent (2.0%) of the total Normalized Sales Volumes of all Participating Gas Utilities.

Step 2: Determination of CRR Charge
(D) Total CRR Charge Rate Revenue Requirement for Applicable Period

(E) CRR Charge per Normalized Sales Volumes (Mcf): (D / C)

Thereof: CRR Charge for Sales Customers

G. CRR CHARGE TRUE-UP
Changes to the CRR Charge will be effected through the filing of CRR Charge True-Up Adjustment Letters by the Central Servicer to the Commission as authorized by the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Financing Order and in accordance with the Servicing Agreement. Not less than fifteen (15) days prior to each CRR Scheduled Adjustment Date and more frequently as required by the Central Servicer, the Central Servicer will submit the CRR Charge True-Up Adjustment Letter in the form of Exhibit 3 to the Financing Order to ensure that CRR Charge collections are sufficient to make all scheduled payments of CRR Bond principal and interest and meet other Ongoing Financing Costs (as defined in the Financing Order) on a timely basis during the payment period. In addition to the foregoing, the Central Servicer shall be authorized to file CRR Charge True-Up Adjustment Letters with the Commission that adjust the CRR Charge more frequently (but not more often than quarterly) as required under the provisions of the Servicing Agreement (as defined in the Financing Order).

H. CRR CHARGE TRUE-UP PROCEDURE
Texas Gas Service Company, a Division of ONE Gas, Inc. shall annually file with the Commission and the Central Servicer by June 1 of each year its Normalized Sales Volumes; each Large Participating Gas Utility shall include projected volumes for each of the future twelve (12) months beginning July 1, and each other Participating Gas Utility shall include its Normalized Sales Volumes for the prior calendar year. Such filing and/or reporting may be more frequent to the extent required under the Servicing Agreement and applicable Collection and Reporting Arrangements. If Texas Gas Service Company, a Division of ONE Gas, Inc. is a Large Participating Gas Utility, the Participating Gas Utility shall, upon the request of the Central Servicer, provide the Commission and the Central Servicer updated Normalized Sales Volumes for the succeeding twelve (12) month period no later than the fifteenth (15th) day following such request to allow the Central Servicer to make Interim True-Up Adjustments. Each Participating Gas Utility shall have the right to provide the foregoing information to the Central Servicer on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). The Central Servicer shall submit to the Commission and the Participating Gas Utilities, not less than fifteen (15) days prior to the CRR Scheduled Adjustment Date, a CRR Charge True-Up Adjustment Letter applying the CRR Charge True-Up Adjustment based on Normalized Sales Volumes and other mathematical factors and requesting administrative approval from the Commission as provided for in the Servicing Agreement. The Commission's review and approval of the True-Up Adjustment Letter shall be as set forth in the Servicing Agreement (it being understood such review is limited to determining if any mathematical or clerical errors are present in the application of the CRR Charge True-Up Adjustment relating to the appropriate amount of any over-collection or under-collection of CRR Charges and the amount of an adjustment). If any CRR Charge True-Up Adjustment that is an Interim True-Up Adjustment is necessary, (i) the Central Servicer may request and the Large Participating Gas Utilities shall provide revised Normalized Sales Volumes for each of the immediately succeeding twelve (12) months and related data and (ii) within fifteen (15) days of receipt of such data, the Central Servicer shall file a revision to the CRR Rate Schedule in a True-Up Charge Adjustment

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	Letter setting forth the adjusted CRR Charge to be effective for the upcoming period, in accordance with the Servicing Agreement. Texas Gas Service Company, a Division of ONE Gas, Inc. shall have the right to provide such information on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). A CRR Charge resulting from a true-up adjustment will become effective on the first (1st) billing cycle that is not less than fifteen (15) days following the making of the CRR Charge True-Up Adjustment filing. I. TAXABILITY The receipt of CRR Charges by a Participating Gas Utility is exempt from state and local sales and use taxes and utility gross receipts taxes and assessments and is excluded from revenue for purposes of franchise tax under Tex. Tax Code Section 171.1011. Meters Read On and After September 25, 2024 Supersedes Rate Schedule Dated September 26, 2023
PIT-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE PIT Central-Gulf Service Area PIPELINE INTEGRITY TESTING (PIT) RIDER PURPOSE The purpose of this Pipeline Integrity Testing Rider is to promote the public interest in pipeline safety by enabling Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) to recover the reasonable and necessary Pipeline Integrity Safety Testing expenses incurred by the Company during the prior year (including contractor costs but excluding the labor cost of Texas Gas Service Company employees). These legally mandated operating and maintenance expenses shall be recovered through a separate monthly volumetric charge (the Pipeline Integrity Testing or PIT Surcharge) that shall be shown as a separate line item on the customers monthly bill and calculated for each customer class as described below. Capital expenditures associated with the Pipeline Integrity Program shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Texas Utilities Code. APPLICABILITY This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers. TERRITORY

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

This Rider shall apply to the following gas sales and standard transportation rate schedules of the Company`s Central-Gulf Service Area (CGSA) within the incorporated and unincorporated areas of Austin, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Georgetown, Gonzales, Hutto, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nixon, Pflugerville, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas and in the environs area of Bastrop, Texas: 10, 15, 20, 25, 30, 40, C-1, CNG-1, 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV.

QUALIFYING EXPENSES
This Rider applies only to the legally mandated safety testing of the Companys transmission lines in the CGSA under the Pipeline Integrity Safety Testing Program. The operating and maintenance expense items that qualify for recovery under this Rider shall include the contractor costs associated with land and leak survey, permitting, and job order preparation and completion; the clearing of right-of-way; any needed notifications to adjacent businesses and residences; traffic control equipment and personnel; Direct Current Voltage Gradient (DCVG), Close Interval (CI), and other surveys to ensure the integrity of the pipeline system; any required rigid bypasses; flushing of the lines and testing and disposal of the flush water; hydrostatic testing of the lines and analysis and disposal of the test water; any required pigging of the lines in connection with safety testing; any required x-ray welding; metallurgical testing of the pipeline or components thereof; site restoration, painting, and clean-up; expenses associated with providing a supply of compressed natural gas (CNG) to ensure uninterrupted service to customers during testing; and any other operating and maintenance expenses reasonably necessary to safely and effectively perform required safety testing of the Companys pipelines in the CGSA. Neither capital expenditures by the Company, nor the labor cost of Company employees, shall be recovered under this Rider.

CALCULATION OF PIT SURCHARGES
The Pipeline Integrity Testing Surcharges established under this Rider shall be designed so as to recover the Total Testing Expense incurred in the prior year for Pipeline Integrity Safety Testing, and shall be calculated as follows:
The Total Annual Testing Expense shall be divided by the estimated average annual usage to produce the annual PIT Surcharge.

$$\text{PIT Surcharge} = \frac{\text{Total Annual Testing Expense}}{\text{Estimated Annual Usage}}$$

Based upon customer data for the prior calendar year and any other relevant factors, the estimated annual usage may be revised annually to account for customer growth, and the resulting revised PIT Surcharge shall be applied to each class for the ensuing 12-month recovery period.

ANNUAL RECONCILIATION
After completion of each annual recovery period, the total revenues collected under

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

this Rider for that year shall be reconciled against the revenues previously calculated to be collected for that year, and the PIT Surcharge for each class shall be adjusted upward or downward so that the Company recovers any underrecoveries or refunds any overrecoveries that may have accrued under the Rider, plus monthly interest on those underrecoveries or overrecoveries at the cost of long-term debt approved in the Companys most recent general rate case in which rates were set for application to customers in the CGSA. The reconciliation shall be filed with the regulatory authority on or before February 21st of each year, and the regulatory authority shall complete its review of the reconciliation on or before March 21st of each year, so that the Company can implement the reconciled PIT Surcharges beginning with the first billing cycle for April of each succeeding year.

DEFERRED ACCOUNTING
The Company is authorized and directed to defer, as a regulatory asset, all Pipeline Integrity Safety Testing expenses incurred during the testing cycle starting on January 1, 2016 and all revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Companys invested capital (rate base) for ratemaking purposes.

ANNUAL REPORT & APPLICABLE PSCC
On or before February 21st after each calendar year, the Company shall file a report with the Commission and the CGSA Cities showing all Pipeline Integrity Safety Testing expenses incurred during the previous calendar year and verifying the prior years collections and any underrecoveries or overrecoveries accruing to date under this Rider. The report shall separately identify and list such expenses by account number and project number. Prior to the effective date of this Rider and on or before February 21st of each succeeding year while this Rider is in effect, the Company shall also file an Addendum to this Rider with the Commission and the CGSA Cities (a) identifying the PIT Surcharges that will be applied during the ensuing 12-month recovery period from April through March billing cycles, and (b) providing the underlying data and calculations on which each PIT Surcharge for that period is based.

The Company shall file the report with the Commission electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Director of Oversight and Safety Division
Gas Services Department
Railroad Commission of Texas
P.O. Box 12967
Austin, TX 78711-2967

NOTICE TO AFFECTED CUSTOMERS
In addition to the annual report and Addendum to this Rider required above, the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	Company shall provide, on or before March 31st after each calendar year, written notice to each affected customer of (a) the PIT Surcharge that will be applied during the ensuing 12-month period from April through March billing cycles, and (b) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in both English and Spanish, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Companys monthly billing statements, including electronic billing statements. The Company shall also electronically file an affidavit annually with the Commission and the CGSA Cities certifying that notice has been provided to customers in this manner. The notice shall be presumed to be complete three calendar days after the date the separate mailing or billing statement is deposited in a postage-paid, properly addressed wrapper in a post office or official depository under care of the United States Postal Service. The initial notice shall be filed with, reviewed, and approved by the regulatory authority, and each subsequent notice shall follow the same format as that of the approved initial notice. PSF-All-ISOS-PipeFee	Texas Gas Service Company, a Division of ONE Gas, Inc. All Service Areas RATE SCHEDULE PSF PIPELINE SAFETY AND REGULATORY PROGRAM FEES TEXAS ADMINISTRATIVE CODE TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 8 PIPELINE SAFETY REGULATIONS SUBCHAPTER C REQUIREMENTS FOR GAS PIPELINES ONLY Rule Section8.201 Pipeline Safety and Regulatory Program Fees (a) Application of fees. Pursuant to Texas Utilities Code, 121.211, the Commission establishes a pipeline safety and regulatory program fee, to be assessed annually against operators of natural gas distribution pipelines and pipeline facilities and natural gas master metered pipelines and pipeline facilities subject to the Commission`s jurisdiction under Texas Utilities Code, Title 3. The total amount of revenue estimated to be collected under this section does not exceed the amount the Commission estimates to be necessary to recover the costs of administering the pipeline safety and regulatory programs under Texas Utilities Code, Title 3, excluding costs that are fully funded by federal sources for any fiscal year. (b) Natural gas distribution systems. The Commission hereby assesses each operator of a natural gas distribution system an annual pipeline safety and regulatory program fee of $1.00 for each service (service line) in service at the end of each calendar year as reported by each system operator on the U.S. Department of Transportation (DOT) Gas Distribution Annual Report, Form PHMSA F7100.1-1 due on March 15 of each year. (1) Each operator of a natural gas distribution system shall calculate the annual pipeline safety and regulatory program total to be paid to the Commission by multiplying the $1.00 fee by the number of services listed in Part B, Section 3, of Form PHMSA F7100.1-1, due on March 15 of each year. (2) Each operator of a natural gas distribution system shall remit to the Commission on March 15 of each year the amount calculated under paragraph (1) of this subsection.

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	(3) Each operator of a natural gas distribution system shall recover, by a surcharge to its existing rates, the amount the operator paid to the Commission under paragraph (1) of this subsection. The surcharge: (A) shall be a flat rate, one-time surcharge; (B) shall not be billed before the operator remits the pipeline safety and regulatory program fee to the Commission; (C) shall be applied in the billing cycle or cycles immediately following the date on which the operator paid the Commission; (D) shall not exceed $1.00 per service or service line (For the calendar year 2024 annual pipeline safety and regulatory program fee, billed effective with meters read on and after March 27, 2025, Texas Gas Service Company, a Division of ONE Gas, Inc. will bill all customers a one-time customer charge per bill of $1.00, based on $1.00 per service line); and (E) shall not be billed to a state agency, as that term is defined in Texas Utilities Code, 101.003. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each operator of a natural gas distribution system shall file with the Commission`s Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. Reports for the Commission shall be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address: Compliance Filing Director of Oversight and Safety Division Gas Services Department Railroad Commission of Texas P.O. Box 12967 Austin, Texas 78711-2967 (5) Each operator of a natural gas distribution system that is a utility subject to the jurisdiction of the Commission pursuant to Texas Utilities Code, Chapters 101 - 105, shall file a generally applicable tariff for its surcharge in conformance with the requirements of 7.315 of this title (relating to Filing of Tariffs). (6) Amounts recovered from customers under this subsection by an investor-owned natural gas distribution system or a cooperatively owned natural gas distribution system shall not be included in the revenue or gross receipts of the system for the purpose of calculating municipal franchise fees or any tax imposed under Subchapter B, Chapter 182, Tax Code, or under Chapter 122, nor shall such amounts be subject to a sales and use tax imposed by Chapter 151, Tax Code, or Subtitle C, Title 3, Tax Code. (c) Natural gas master meter systems. The Commission hereby assesses

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	each natural gas master meter system an annual pipeline safety and regulatory program fee of $100 per master meter system. (1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of $100 per master meter system no later than June 30 of each year. (2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year. (3) Each operator of a natural gas master meter system shall recover as a surcharge to its existing rates the amounts paid to the Commission under paragraph (1) of this subsection. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each natural gas master meter system operator shall file with the Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. (d) Late payment penalty. If the operator of a natural gas distribution system or a natural gas master meter system does not remit payment of the annual pipeline safety and regulatory program fee to the Commission within 30 days of the due date, the Commission shall assess a late payment penalty of 10 percent of the total assessment due under subsection (b) or (c) of this section, as applicable, and shall notify the operator of the total amount due to the Commission. RCE-Rider-CenGulf-OS	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area RATE SCHEDULE RCE - ENV RATE CASE EXPENSE SURCHARGE

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION

A. APPLICABILITY
The Rate Case Expense Surcharge (RCE) rate as set forth in Section (B) below is pursuant to Gas Utilities Case No. 00017471: Statement of Intent of Texas Gas Service Company, a Division of ONE Gas, Inc. to Increase Gas Utility Rates Within the Unincorporated Areas of the Central-Gulf Service Area, Final Order Finding of Fact No. XX-XX. This rate shall apply to the following rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. in the unincorporated areas of the Central-Gulf Service Area which includes Austin, Bastrop, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas: 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV and T-1-ENV.

B. RCE RATE
All Ccf during each billing period: $ 0.00627 per Ccf This rate will be in effect until all approved and expended rate case expenses are recovered under the applicable rate schedules. Texas Gas Service Company, a Division of ONE Gas, Inc. will recover $919,131.50 in actual expense and up to $340,400.00 in estimated expenses. The Rate Case Expense Surcharge will be a separate line item on the bill.

C. OTHER ADJUSTMENTS
Taxes: Plus applicable taxes and fees related to above.

D. CONDITIONS
Subject to all applicable laws and orders, and the Company`s rules and regulations on file with the regulatory authority.

E. COMPLIANCE
The Company shall file an annual rate case expense reconciliation report within ninety (90) days after each calendar year end until and including the calendar year end in which the rate case expenses are fully recovered. The Company shall file the report with the Commission addressed to the Director of Oversight and Safety Division, Gas Services Department and referencing Gas Utilities Case No. 00017471 Rate Case Expense Recovery Report. The report shall detail the monthly collections for RCE surcharge by customer class and show the outstanding balance.

Reports for the Commission should be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address:

CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

Source Note: The provisions of this Section7.455 adopted to be effective July 29, 2002, 27 TexReg 6687; amended to be effective May 14, 2018, 43 TexReg 2997; amended to be effective September 1, 2022, 47 TexReg 2516

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

Tolerance Limit.
Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.
Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.
Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.
Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss,

claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.

b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s

right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.
h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `
INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has

first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.
7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.
7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:
a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;
b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;
c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;
d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;
e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;
f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;
g) For Customers on transportation service, the Company may discontinue service upon request

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the following reasons:

a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.

b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.

c) Delinquency in payment for service by a previous occupant of the premises.

d) Failure to pay for merchandise or charges for non-utility service by the Company.

e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.

f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.

g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.

h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.

i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.

j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.

k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.

7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph. The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Classification System Violation Factors Factor Value (1-4) Points Tally Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this Section for 24 hours or more 4 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for less than 24 hours, but more than 12 hours 3 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for 12 hours or less 2 Demand for collection of full payment of bills due is made during an extreme weather emergency 3 The temperature is 10 degrees or less during the period of disconnection 4 The temperature is more than 10 degrees but less than or equal to 20 degrees during the period of disconnection 3 The temperature is more than 20 degrees but less than or equal to 32 degrees during the period of disconnection 2 Repeat violations based on Company`s history of compliance 3 Good faith effort to remedy violation -2 No effort to remedy violation during the extreme weather emergency 4 Total Penalty maximum per violation 10 points or more = Class A violation 7-9 points = Class B violation 4-6 points = Class C violation 1-3 points = Class D violation More than $5,000 $5,000.00 $4,000.00 $3,000.00 The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills. Beginning in the September or October billing periods, the Company shall give notice as follows:
a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.
b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.
c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.
7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the

condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.

7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.

7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS

8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.

8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.

8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:

a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;

b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or

c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.

d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.
e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.
8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.
8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.
8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.
8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.
8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.
8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12)

consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section 15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.

8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.

8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.

8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.

8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.

9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.

a) if the meter is read by the utility, the date and reading of the meter at the beginning and

end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.
9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.
9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.
9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.
9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.
9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:
a) Every deferred payment plan entered into due to the Customers inability to pay the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.
b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.
c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

CGSA-c

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)
f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law.

9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference.

A. TERMS AND CONDITIONS
1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing.
2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due.
3. Service is not available under this Plan for a term of less than twelve (12) months.

B. AVERAGE PAYMENT AMOUNT
1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

amount.
2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay.
3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis.

SECTION 10 ` FACILITIES AND EQUIPMENT

10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical.

10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates

leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company. b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73 Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified

serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.
b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.
c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.
13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:
a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.
b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.
15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.
15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.
15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.
15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.
15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt collection of payment from Customer. $18.00

h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00

i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00

j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00

k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00

l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses

m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00

n) Meter Removal Fee $25.00

o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00

p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost

q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34262

such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

SCHEDULE ID	DESCRIPTION
1-ENV-CenGulf-OS-COG	

Texas Gas Service Company, a Division of ONE Gas, Inc.
Rate Schedule 1-ENV Central-Gulf Service Area
COST OF GAS CLAUSE

A. APPLICABILITY
This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all unincorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bastrop, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

B. DEFINITIONS
1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees and taxes.
2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year.
3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall not include the cost of financial instruments unless the use of such financial instruments is approved in advance and in writing by the Director of the Oversight and Safety Division of the Railroad Commission of Texas. Such approval would be requested as part of the Companys annual gas purchase plan, which shall be submitted annually to the Commission no later than June 15.
4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule, which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7).

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit.
6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.
7. RNG - the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas.
8. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12 month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority.
9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of approved natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s); (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.
10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

C. COST OF GAS
In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT
If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS
Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES
In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT
The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; f) the revenue

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

associated fees and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from approved hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

H. ANNUAL RECONCILIATION REPORT
The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:
1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30.
2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues.
3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.
4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period.
5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period.
6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date.
7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination.

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
2Z-CenGulf-OS-SmCom	

Texas Gas Service Company, a Division of ONE Gas, Inc.

RATE SCHEDULE 2Z

Central-Gulf Service Area

SMALL COMMERCIAL SERVICE RATE

APPLICABILITY

Applicable to all small commercial customers and to customers not otherwise specifically provided for under any other rate schedule.

TERRITORY

Environs of the Central-Gulf Service Area, which includes the unincorporated areas of Austin, Bastrop, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of	$60.00 plus
Interim Rate Adjustments (IRA)	$12.88 per month (Footnote 1)
Total Customer Charge	$72.88 per month
All Ccf per monthly billing period @	$0.27930 per Ccf

The Company will initially assign each Customer to the rate schedule that is the most economical based on the annual normalized volume at the Customers service location for the prior twelve (12)-month period. An anticipated annual normalized usage level assessment will be conducted on each new service and for existing service that has less than twelve (12) months of service. The results of this assessment will decide the initial rate assignment:

Annual Normalized Volume Less than 3,640 Ccf Small Commercial, Rate Schedule 2Z
Annual Normalized Volume 3,640 Ccf or Greater Large Commercial, Rate Schedule 2Y

The Company will allow customers to elect service on a different rate schedule, provided that the customer must remain on the alternative rate schedule for a period of no less than twelve (12) months. Rate Schedule changes will be effective with the Customers next scheduled bill.

TARIFF CODE: DS **RRC TARIFF NO:** 34263

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	B. APPLICABILITY This rate schedule sets out the rate, terms and conditions under which the CRR Charge shall be billed and collected by Texas Gas Service Company, a Division of ONE Gas, Inc. as a Participating Gas Utility for all Incorporated and Unincorporated Areas of the Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area under the terms of the Financing Order. Each individual Sales Customer is responsible for paying the CRR Charge billed to it in accordance with the terms of this rate schedule. Payment is to be made by an individual Sales Customer to the Participating Gas Utility of which it is a customer. The Participating Gas Utility is obligated to apply amounts collected from customers to pay any outstanding CRR Charges prior to applying such amounts for any other purpose. The Participating Gas Utility, as collection agent, shall remit collections of the CRR Charges to the Indenture Trustee in accordance with the terms of the Financing Order and any servicing or other similar agreement that is contemplated by the Financing Order. C. TERM This rate schedule shall remain in effect until the CRR Charges have been collected and remitted to the Indenture Trustee in an amount sufficient to satisfy all obligations in regard to paying principal and interest on the CRR Bonds together with all other financing costs, bond administrative expenses and other costs as provided in the Financing Order. This rate schedule and the CRR Charge are irrevocable and nonbypassable. D. SALES CUSTOMERS For the purposes of billing the CRR Charges, all Sales Customers of the Participating Gas Utility's Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area shall be assessed the uniform volumetric charge identified below. E. CRR CHARGE The CRR Charge will be a monthly volumetric rate of $0.118/Ccf. The CRR Charge is calculated in accordance with and subject to the provisions set forth in the Financing Order and will be adjusted at least annually based upon the CRR Charge true- up adjustment procedure. The CRR Charge shall be included in the Participating Gas Utility's Purchase Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. Participating Gas Utilities may reflect the CRR Charge according to the delivery pressures defined in Participating Gas Utilities' applicable tariffs. Such delivery pressure specific charges shall be equivalent to the CRR Charge as determined below at 14.65 per square inch, as defined above. F. DETERMINATION OF CUSTOMER RATE RELIEF CHARGE The CRR Charge will be adjusted no less frequently than annually, in accordance with the terms of the Servicing Agreement (as defined in the Financing Order), to ensure that the expected collection of CRR Charges is adequate to pay when due, pursuant to the expected amortization schedule, principal and interest on the CRR

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Bonds and together with all other financing costs, bond administrative expenses and other costs, as provided in the Financing Order, on a timely basis. The CRR Charge shall be computed according to the formula described below.

Step 1: Determination of Normalized Sales Volumes

(A) Total Large Participating Gas Utility Normalized Sales Volumes (Mcf)

(B) Assumed % of uncollectible sales
(C) Total Normalized Sales Volumes Billed and Collected: (A * (1 - B)) For the avoidance of doubt, Normalized Sales Volumes are assumed to be calculated without giving effect to volumes anticipated from Participating Gas Utilities making up less than two percent (2.0%) of the total Normalized Sales Volumes of all Participating Gas Utilities.

Step 2: Determination of CRR Charge
(D) Total CRR Charge Rate Revenue Requirement for Applicable Period

(E) CRR Charge per Normalized Sales Volumes (Mcf): (D / C)

Thereof: CRR Charge for Sales Customers

G. CRR CHARGE TRUE-UP
Changes to the CRR Charge will be effected through the filing of CRR Charge True-Up Adjustment Letters by the Central Servicer to the Commission as authorized by the Financing Order and in accordance with the Servicing Agreement. Not less than fifteen (15) days prior to each CRR Scheduled Adjustment Date and more frequently as required by the Central Servicer, the Central Servicer will submit the CRR Charge True-Up Adjustment Letter in the form of Exhibit 3 to the Financing Order to ensure that CRR Charge collections are sufficient to make all scheduled payments of CRR Bond principal and interest and meet other Ongoing Financing Costs (as defined in the Financing Order) on a timely basis during the payment period. In addition to the foregoing, the Central Servicer shall be authorized to file CRR Charge True-Up Adjustment Letters with the Commission that adjust the CRR Charge more frequently (but not more often than quarterly) as required under the provisions of the Servicing Agreement (as defined in the Financing Order).

H. CRR CHARGE TRUE-UP PROCEDURE
Texas Gas Service Company, a Division of ONE Gas, Inc. shall annually file with the Commission and the Central Servicer by June 1 of each year its Normalized Sales Volumes; each Large Participating Gas Utility shall include projected volumes for each of the future twelve (12) months beginning July 1, and each other Participating Gas Utility shall include its Normalized Sales Volumes for the prior calendar year. Such filing and/or reporting may be more frequent to the extent required under the Servicing Agreement and applicable Collection and Reporting Arrangements. If Texas Gas Service Company, a Division of ONE Gas, Inc. is a Large

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Participating Gas Utility, the Participating Gas Utility shall, upon the request of the Central Servicer, provide the Commission and the Central Servicer updated Normalized Sales Volumes for the succeeding twelve (12) month period no later than the fifteenth (15th) day following such request to allow the Central Servicer to make Interim True-Up Adjustments. Each Participating Gas Utility shall have the right to provide the foregoing information to the Central Servicer on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). The Central Servicer shall submit to the Commission and the Participating Gas Utilities, not less than fifteen (15) days prior to the CRR Scheduled Adjustment Date, a CRR Charge True-Up Adjustment Letter applying the CRR Charge True-Up Adjustment based on Normalized Sales Volumes and other mathematical factors and requesting administrative approval from the Commission as provided for in the Servicing Agreement. The Commission's review and approval of the True-Up Adjustment Letter shall be as set forth in the Servicing Agreement (it being understood such review is limited to determining if any mathematical or clerical errors are present in the application of the CRR Charge True-Up Adjustment relating to the appropriate amount of any over-collection or under-collection of CRR Charges and the amount of an adjustment). If any CRR Charge True-Up Adjustment that is an Interim True-Up Adjustment is necessary, (i) the Central Servicer may request and the Large Participating Gas Utilities shall provide revised Normalized Sales Volumes for each of the immediately succeeding twelve (12) months and related data and (ii) within fifteen (15) days of receipt of such data, the Central Servicer shall file a revision to the CRR Rate Schedule in a True-Up Charge Adjustment Letter setting forth the adjusted CRR Charge to be effective for the upcoming period, in accordance with the Servicing Agreement. Texas Gas Service Company, a Division of ONE Gas, Inc. shall have the right to provide such information on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). A CRR Charge resulting from a true-up adjustment will become effective on the first (1st) billing cycle that is not less than fifteen (15) days following the making of the CRR Charge True-Up Adjustment filing.

I. TAXABILITY
The receipt of CRR Charges by a Participating Gas Utility is exempt from state and local sales and use taxes and utility gross receipts taxes and assessments and is excluded from revenue for purposes of franchise tax under Tex. Tax Code Section 171.1011.

PIT-CenGulf-ISOS	

Texas Gas Service Company, a Division of ONE Gas, Inc.
RATE SCHEDULE PIT
Central-Gulf Service Area
PIPELINE INTEGRITY TESTING (PIT) RIDER

PURPOSE
The purpose of this Pipeline Integrity Testing Rider is to promote the public interest in pipeline safety by enabling Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) to recover the reasonable and necessary Pipeline Integrity Safety Testing expenses incurred by the Company during the prior year (including contractor costs but excluding the labor cost of Texas Gas Service Company employees). These legally mandated operating and maintenance expenses shall be recovered through a separate monthly volumetric charge (the Pipeline Integrity Testing or PIT Surcharge) that shall be shown as a separate line item on the customers monthly bill and calculated for each customer class as described below. Capital expenditures associated with the Pipeline Integrity Program shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Texas Utilities Code.

APPLICABILITY
This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers.

TERRITORY
This Rider shall apply to the following gas sales and standard transportation rate schedules of the Company`s Central-Gulf Service Area (CGSA) within the incorporated and unincorporated areas of Austin, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Georgetown, Gonzales, Hutto, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nixon, Pflugerville, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas and in the environs area of Bastrop, Texas: 10, 15, 20, 25, 30, 40, C-1, CNG-1, 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV.

QUALIFYING EXPENSES
This Rider applies only to the legally mandated safety testing of the Companys transmission lines in the CGSA under the Pipeline Integrity Safety Testing Program. The operating and maintenance expense items that qualify for recovery under this Rider shall include the contractor costs associated with land and leak survey, permitting, and job order preparation and completion; the clearing of right-of-way; any needed notifications to adjacent businesses and residences; traffic control equipment and personnel; Direct Current Voltage Gradient (DCVG), Close Interval (CI), and other surveys to ensure the integrity of the pipeline system; any required rigid bypasses; flushing of the lines and testing and disposal of the flush water; hydrostatic testing of the lines and analysis and disposal of the test water; any required pigging of the lines in connection with safety testing; any

required x-ray welding; metallurgical testing of the pipeline or components thereof; site restoration, painting, and clean-up; expenses associated with providing a supply of compressed natural gas (CNG) to ensure uninterrupted service to customers during testing; and any other operating and maintenance expenses reasonably necessary to safely and effectively perform required safety testing of the Companys pipelines in the CGSA. Neither capital expenditures by the Company, nor the labor cost of Company employees, shall be recovered under this Rider.

CALCULATION OF PIT SURCHARGES
The Pipeline Integrity Testing Surcharges established under this Rider shall be designed so as to recover the Total Testing Expense incurred in the prior year for Pipeline Integrity Safety Testing, and shall be calculated as follows:
The Total Annual Testing Expense shall be divided by the estimated average annual usage to produce the annual PIT Surcharge.

$$\text{PIT Surcharge} = \frac{\text{Total Annual Testing Expense}}{\text{Estimated Annual Usage}}$$

Based upon customer data for the prior calendar year and any other relevant factors, the estimated annual usage may be revised annually to account for customer growth, and the resulting revised PIT Surcharge shall be applied to each class for the ensuing 12-month recovery period.

ANNUAL RECONCILIATION
After completion of each annual recovery period, the total revenues collected under this Rider for that year shall be reconciled against the revenues previously calculated to be collected for that year, and the PIT Surcharge for each class shall be adjusted upward or downward so that the Company recovers any underrecoveries or refunds any overrecoveries that may have accrued under the Rider, plus monthly interest on those underrecoveries or overrecoveries at the cost of long-term debt approved in the Companys most recent general rate case in which rates were set for application to customers in the CGSA. The reconciliation shall be filed with the regulatory authority on or before February 21st of each year, and the regulatory authority shall complete its review of the reconciliation on or before March 21st of each year, so that the Company can implement the reconciled PIT Surcharges beginning with the first billing cycle for April of each succeeding year.

DEFERRED ACCOUNTING
The Company is authorized and directed to defer, as a regulatory asset, all Pipeline Integrity Safety Testing expenses incurred during the testing cycle starting on January 1, 2016 and all revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Companys invested capital (rate base) for ratemaking purposes.

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION

ANNUAL REPORT & APPLICABLE PSCC
On or before February 21st after each calendar year, the Company shall file a report with the Commission and the CGSA Cities showing all Pipeline Integrity Safety Testing expenses incurred during the previous calendar year and verifying the prior years collections and any underrecoveries or overrecoveries accruing to date under this Rider. The report shall separately identify and list such expenses by account number and project number. Prior to the effective date of this Rider and on or before February 21st of each succeeding year while this Rider is in effect, the Company shall also file an Addendum to this Rider with the Commission and the CGSA Cities (a) identifying the PIT Surcharges that will be applied during the ensuing 12-month recovery period from April through March billing cycles, and (b) providing the underlying data and calculations on which each PIT Surcharge for that period is based.

The Company shall file the report with the Commission electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Director of Oversight and Safety Division
Gas Services Department
Railroad Commission of Texas
P.O. Box 12967
Austin, TX 78711-2967

NOTICE TO AFFECTED CUSTOMERS
In addition to the annual report and Addendum to this Rider required above, the Company shall provide, on or before March 31st after each calendar year, written notice to each affected customer of (a) the PIT Surcharge that will be applied during the ensuing 12-month period from April through March billing cycles, and (b) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in both English and Spanish, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Companys monthly billing statements, including electronic billing statements. The Company shall also electronically file an affidavit annually with the Commission and the CGSA Cities certifying that notice has been provided to customers in this manner. The notice shall be presumed to be complete three calendar days after the date the separate mailing or billing statement is deposited in a postage-paid, properly addressed wrapper in a post office or official depository under care of the United States Postal Service. The initial notice shall be filed with, reviewed, and approved by the regulatory authority, and each subsequent notice shall follow the same format as that of the approved initial notice.

RATE SCHEDULE PIT-RIDER
PIPELINE INTEGRITY TESTING (PIT) SURCHARGE RIDER

A. APPLICABILITY
The Pipeline Integrity Testing Surcharge (PIT) rate as set forth in Section (B) below is for the recovery of costs associated with pipeline integrity testing as defined in Rate Schedule PIT. This rate shall apply to the following gas sales and standard transportation rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. currently in force in the Company`s Central-Gulf Service Area (CGSA) within the incorporated and unincorporated areas of Austin, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Georgetown, Gonzales, Hutto, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nixon, Pflugerville, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas and in the environs area of Bastrop, Texas: 10, 15, 20, 25, 30, 40, C-1, CNG-1, T-1, 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV and T-1-ENV.

B. PIT RATE
$0.00010 per Ccf This rate will be in effect until all approved and expended pipeline integrity testing expenses are recovered under the applicable rate schedules.

C. OTHER ADJUSTMENTS
Taxes: Plus applicable taxes and fees (including franchises fees) related to above.

D. CONDITIONS
Subject to all applicable laws and orders, and the Company`s rules and regulations on file with the regulatory authority.

TARIFF CODE: DS **RRC TARIFF NO:** 34263

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	(a) Application of fees. Pursuant to Texas Utilities Code, 121.211, the Commission establishes a pipeline safety and regulatory program fee, to be assessed annually against operators of natural gas distribution pipelines and pipeline facilities and natural gas master metered pipelines and pipeline facilities subject to the Commission`s jurisdiction under Texas Utilities Code, Title 3. The total amount of revenue estimated to be collected under this section does not exceed the amount the Commission estimates to be necessary to recover the costs of administering the pipeline safety and regulatory programs under Texas Utilities Code, Title 3, excluding costs that are fully funded by federal sources for any fiscal year. (b) Natural gas distribution systems. The Commission hereby assesses each operator of a natural gas distribution system an annual pipeline safety and regulatory program fee of $1.00 for each service (service line) in service at the end of each calendar year as reported by each system operator on the U.S. Department of Transportation (DOT) Gas Distribution Annual Report, Form PHMSA F7100.1-1 due on March 15 of each year. (1) Each operator of a natural gas distribution system shall calculate the annual pipeline safety and regulatory program total to be paid to the Commission by multiplying the $1.00 fee by the number of services listed in Part B, Section 3, of Form PHMSA F7100.1-1, due on March 15 of each year. (2) Each operator of a natural gas distribution system shall remit to the Commission on March 15 of each year the amount calculated under paragraph (1) of this subsection. (3) Each operator of a natural gas distribution system shall recover, by a surcharge to its existing rates, the amount the operator paid to the Commission under paragraph (1) of this subsection. The surcharge: (A) shall be a flat rate, one-time surcharge; (B) shall not be billed before the operator remits the pipeline safety and regulatory program fee to the Commission; (C) shall be applied in the billing cycle or cycles immediately following the date on which the operator paid the Commission; (D) shall not exceed $1.00 per service or service line (For the calendar year 2024 annual pipeline safety and regulatory program fee, billed effective with meters read on and after March 27, 2025, Texas Gas Service Company, a Division of ONE Gas, Inc. will bill all customers a one-time customer charge per bill of $1.00, based on $1.00 per service line); and (E) shall not be billed to a state agency, as that term is defined in Texas Utilities Code, 101.003. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each operator of a natural gas distribution system shall file with the Commission`s Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer;

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

(C) the date or dates on which the surcharge was billed to customers; and
(D) the total amount collected from customers from the surcharge. Reports for the Commission shall be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Compliance Filing
Director of Oversight and Safety Division
Gas Services Department
Railroad Commission of Texas
P.O. Box 12967
Austin, Texas 78711-2967

(5) Each operator of a natural gas distribution system that is a utility subject to the jurisdiction of the Commission pursuant to Texas Utilities Code, Chapters 101 - 105, shall file a generally applicable tariff for its surcharge in conformance with the requirements of 7.315 of this title (relating to Filing of Tariffs).
(6) Amounts recovered from customers under this subsection by an investor-owned natural gas distribution system or a cooperatively owned natural gas distribution system shall not be included in the revenue or gross receipts of the system for the purpose of calculating municipal franchise fees or any tax imposed under Subchapter B, Chapter 182, Tax Code, or under Chapter 122, nor shall such amounts be subject to a sales and use tax imposed by Chapter 151, Tax Code, or Subtitle C, Title 3, Tax Code. (c) Natural gas master meter systems. The Commission hereby assesses each natural gas master meter system an annual pipeline safety and regulatory program fee of $100 per master meter system.

(1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of $100 per master meter system no later than June 30 of each year.
(2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year.
(3) Each operator of a natural gas master meter system shall recover as a surcharge to its existing rates the amounts paid to the Commission under paragraph (1) of this subsection.
(4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each natural gas master meter system operator shall file with the Oversight and Safety Division a report showing:
(A) the pipeline safety and regulatory program fee amount paid to the Commission;
(B) the unit rate and total amount of the surcharge billed to each customer;
(C) the date or dates on which the surcharge was billed to customers; and
(D) the total amount collected from customers from the surcharge.

WNA-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE WNA Central-Gulf Service Area WEATHER NORMALIZATION ADJUSTMENT CLAUSE APPLICABILITY The Weather Normalization Adjustment Clause (WNA) shall apply to the following general service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) in the incorporated and unincorporated areas served in the Central-Gulf Service Area including Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, Texas: Rate Schedules 10, 15, 1Z, 1Y, 20, 25, 2Z, 2Y, 40, and 4Z. The WNA shall be effective during the September through May billing cycles. PURPOSE The WNA refunds over-collections or surcharges under-collections of revenue due to colder or warmer than normal weather, as established in the Company`s most recent rate filing. WNA MECHANISM In order to reflect weather effects in a timely and accurate manner, the WNA adjustment shall be calculated separately for each billing cycle and rate schedule. The weather factor, determined for each rate schedule in the most recent rate case, shows the effect of one heating degree day on consumption for that rate schedule. During each billing cycle, the weather factor is multiplied by the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

difference between normal and actual heating degree days for the billing period and by the number of customers billed. This WNA volume adjustment is priced at the current cost of service rate per Ccf to determine a WNA revenue adjustment, which is spread to the customers in the billing cycle on a prorata basis. The WNA for each billing cycle and rate schedule shall be based on the following formula:

WNA Rate = WNAD, where
CV

CV = Current Volumes for the billing period.
WNAD = Weather Normalization Adjustment Dollars to be collected from each billing cycle and rate schedule. This factor shall be based on the following formula:
WNAD = (HDD Diff * CB * WF) * COS rate, where
HDD Diff = (Normal HDD ` Actual HDD), the difference between normal and actual heating degree days for the billing period.
CB = Number of customers billed for the billing period.
WF = Weather factor determined for each rate schedule in the most recent rate case.

FILING WITH THE CITIES AND THE RAILROAD COMMISSION OF TEXAS (RRC)
The Company will file monthly reports showing the rate adjustments for each applicable rate schedule. Supporting documentation will be made available for review upon request. By each October 1, the Company will file with the Cities and the RRC an annual report verifying the past year`s WNA collections or refunds.

The Company shall file the report with the RRC electronically at GUD_Compliance@rrc.texas.gov or at the following address:

CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

(the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

Tolerance Limit.
Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.
Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.
Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.
Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the

public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.

b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s

right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.
h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In

TARIFF CODE: DS **RRC TARIFF NO:** 34263

no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `
INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has

first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.
7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.
7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:
a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;
b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;
c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;
d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;
e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;
f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;
g) For Customers on transportation service, the Company may discontinue service upon request

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the following reasons:

a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.

b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.

c) Delinquency in payment for service by a previous occupant of the premises.

d) Failure to pay for merchandise or charges for non-utility service by the Company.

e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.

f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.

g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.

h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.

i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.

j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.

k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.

7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph. The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Classification System Violation Factors Factor Value (1-4) Points Tally Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this Section for 24 hours or more 4 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for less than 24 hours, but more than 12 hours 3 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for 12 hours or less 2 Demand for collection of full payment of bills due is made during an extreme weather emergency 3 The temperature is 10 degrees or less during the period of disconnection 4 The temperature is more than 10 degrees but less than or equal to 20 degrees during the period of disconnection 3 The temperature is more than 20 degrees but less than or equal to 32 degrees during the period of disconnection 2 Repeat violations based on Company`s history of compliance 3 Good faith effort to remedy violation -2 No effort to remedy violation during the extreme weather emergency 4 Total Penalty maximum per violation 10 points or more = Class A violation 7-9 points = Class B violation 4-6 points = Class C violation 1-3 points = Class D violation More than $5,000 $5,000.00 $4,000.00 $3,000.00 The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills. Beginning in the September or October billing periods, the Company shall give notice as follows:
a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.
b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.
c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.
7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.
7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.
7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS
8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.
8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.
8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:
a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;
b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or
c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.
d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.
e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.
8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.
8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.
8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.
8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.
8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.
8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12)

consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section 15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.

8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.

8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.

8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.

8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.

9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.

a) if the meter is read by the utility, the date and reading of the meter at the beginning and

end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.
9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.
9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.
9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.
9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.
9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:
a) Every deferred payment plan entered into due to the Customers inability to pay the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.
b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.
c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

CGSA-c

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)
f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law.

9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference.

A. TERMS AND CONDITIONS
1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing.
2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due.
3. Service is not available under this Plan for a term of less than twelve (12) months.

B. AVERAGE PAYMENT AMOUNT
1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment

amount.
2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay.
3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis.

SECTION 10 ` FACILITIES AND EQUIPMENT

10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical.

10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates

leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company. b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such

access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73 Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified

serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.
b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.
c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.
13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:
a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.
b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.
15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.
15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.
15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.
15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.
15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34263

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt collection of payment from Customer. $18.00

h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00

i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00

j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00

k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00

l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses

m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00

n) Meter Removal Fee $25.00

o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00

p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost

q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests

Texas Gas Service Company, a Division of ONE Gas, Inc.

RATE SCHEDULE

1Z
Central-Gulf Service Area

SMALL RESIDENTIAL SERVICE RATE

APPLICABILITY

Applicable to a small residential customer or builder in a single dwelling, or in a dwelling unit of a multiple dwelling or residential apartment, for domestic purposes. A residential customer includes an individually-metered residential unit or dwelling that is operated by a public housing agency acting as an administrator of public housing programs under the direction of the U.S. Department of Housing and Urban Development and builders prior to sale or re-sale of a property for domestic purposes.

TERRITORY

Environs of the Central-Gulf Service Area, which includes the unincorporated areas of Austin, Bastrop, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE

During each monthly billing period:

A customer charge per meter per month of $18.00 plus
Interim Rate Adjustments (IRA) $3.36 per month (Footnote 1)
Total Customer Charge $21.36 per month

All Ccf per monthly billing period @ $0.87646 per Ccf

The Company will initially assign each Customer to the rate schedule that is the most economical based on the annual normalized volume at the Customers service location for the prior twelve (12)-month period. An anticipated annual normalized usage level assessment will be conducted on each new service and for existing service that has less than twelve (12) months of service. The results of this

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

SCHEDULE ID	DESCRIPTION
	assessment will decide the initial rate assignment: Annual Normalized Volume Less than 352 Ccf Small Residential, Rate Schedule 1Z Annual Normalized Volume 352 Ccf or Greater Large Residential, Rate Schedule 1Y The Company will allow customers to elect service on a different rate schedule, provided that the customer must remain on the alternative rate schedule for a period of no less than twelve (12) months. Rate Schedule changes will be effective with the Customers next scheduled bill. OTHER ADJUSTMENTS Cost of Gas Component: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-ENV. Pipeline Integrity Testing Rider: The billing shall reflect adjustments in accordance with provisions of the Pipeline Integrity Testing Rider, Rate Schedule PIT and PIT-Rider, if applicable. Pipeline Safety and Regulatory Program Fees: The billing shall reflect adjustments in accordance with provisions of the Pipeline Safety and Regulatory Program Fees Rider, Rate Schedule PSF. Rate Case Expense Rider: The billing shall reflect adjustments in accordance with provisions of the Rate Case Expense Surcharge Rider, Rate Schedule RCE-ENV. Taxes: Plus applicable taxes and fees related to above. Weather Normalization Adjustment: The billing shall reflect adjustments in accordance with the provisions of the Weather Normalization Adjustment Clause, Rate Schedule WNA. CONDITIONS Subject to all applicable laws and orders, and the Companys rules and regulations on file with the regulatory authority. RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	Applicable to all Sales Customers for the purpose of collecting and remitting customer rate relief charges as authorized by the Railroad Commission of Texas (Commission) in accordance with Chapter 104, Subchapter I of the Texas Utilities Code and the Commission Financing Order issued in Docket No. OS-21-00007061. A. ABBREVIATIONS AND DEFINITIONS 1) Authority - The Texas Public Finance Authority, together with any successor to its duties and functions. 2) Bonds or Customer Rate Relief (CRR) Bonds - The Texas Natural Gas Securitization Finance Corporation Customer Rate Relief Bonds, Series 2023 and any additional or different designation or title by which each series of Bonds shall be known as determined by the Issuer Entity. 3) Ccf and Mcf - For Ccf, one hundred (100) standard cubic feet of gas, where one (1) standard cubic foot of gas is the amount of gas contained in one (1) cubic foot of space at a standard pressure of fourteen point sixty-five (14.65) pounds per square inch, absolute and a standard temperature of sixty (60) degrees Fahrenheit; and, for Mcf, 1,000 standard cubic feet of gas. 4) Central Servicer - The entity engaged in accordance with the terms of the Financing Order to, amongst other things, engage the Participating Gas Utilities as collection agents for the purposes of facilitating collection and remittance of CRR Charges by Participating Gas Utilities, and perform the other services required of it under the Servicing Agreement (as defined in the Financing Order). 5) Commission - The Railroad Commission of Texas, including its staff or delegate. 6) CRR Charge True-Up Adjustment - A True-Up Adjustment (as defined in the Financing Order). 7) CRR Charge True-Up Charge Adjustment Letter - A true-up adjustment letter substantially in the form of Exhibit 3 to the Financing Order. 8) CRR Scheduled Adjustment Date - January 1 and July 1 of each applicable year, provided that the CRR Scheduled Adjustment Date and any other deadlines or target dates related thereto, shall be subject to modification prior to the date the Bonds so as to reflect the terms of the Servicing Agreement. 9) Customer Rate Relief (CRR) Charge - A nonbypassable charge as defined in Tex. Util. Code Section 104.362(7). 10) Financing Order - The order adopted under Tex. Util. Code Section 104.366 approving the issuance of CRR Bonds and the creation of Customer Rate Relief Property and associated CRR Charges for the recovery of regulatory assets, including extraordinary costs, related financing costs, and other costs authorized by the Financing Order. 11) Gas Utility - Texas Gas Service Company, a Division of ONE Gas, Inc. and its successors and assignees, an operator of natural gas distribution pipelines that delivers and sells natural gas to the public and that is subject to the Commission's jurisdiction under Tex. Util. Code Section 102.001, or an operator that transmits, transports, delivers, or sells natural gas or synthetic natural gas to operators of natural gas distribution pipelines and whose rates for those services are established by the Commission in a rate proceeding filed under Chapter 104 of the Utilities Code, within the service area.?

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	12) Irrevocable - The Financing Order, together with the Customer Rate Relief Property as defined by Tex. Util. Code Section 104.362(8) and the CRR Charges authorized by the Financing Order, are irrevocable and not subject to reduction, impairment, or adjustment by further action of the Commission, except in connection with true-ups authorized by the Financing Order. 13) Issuer Entity - Texas Natural Gas Securitization Finance Corporation, a Texas nonprofit public corporation established by the Authority, or any successor created pursuant to Tex. Gov't Code Section 1232.1072. 14) Large Participating Gas Utility - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and any Participating Gas Utility or Successor Utility (as defined in the Financing Order) each of whose Normalized Sales Volumes exceed 2.0% of the total aggregate Normalized Sales Volumes among all Participating Gas Utilities. Any calculation performed in connection with the preceding sentence shall be made on the basis of the most recently reported Normalized Sales Volumes and such calculation shall be performed by the Central Servicer annually no later than one (1) month after Normalized Sales Volumes are reported as regularly scheduled under Paragraph H hereof; provided that the Commission and/or Central Servicer may perform such calculation without any limitation in order to give effect to any merger, acquisition, disposition, divesture, spin-off or other transaction that would impact a Participating Gas Utility's share of the total aggregate Normalized Sales Volumes. The Commission or the Central Servicer shall promptly thereafter provide written notice to a Participating Gas Utility that subsequently becomes a Large Participating Gas Utility, which change shall take effective beginning on January 1 of the following calendar year. 15) Nonbypassable - CRR Charges must be paid by all existing or future customers receiving service from a Participating Gas Utility or such gas utility's successors or assigns. 16) Normalized Sales Volumes - a) For Large Participating Gas Utilities: All natural gas volumes projected to be billed for the upcoming twelve (12) month period in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated to calculate the CRR Charges. b) For other Participating Gas Utilities: All natural gas volumes billed in the preceding calendar year in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs and normalized according to the methodology utilized in each Participating Gas Utility's application filed in Docket No. OS-21- 00007061, Consolidated Applications For Customer Rate Relief and Related Regulatory Asset Determinations In Connection With The February 2021 Winter Storm. ? For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated in order to calculate the CRR Charges. 17) Participating Gas Utilities - Atmos Energy Corporation on behalf of its Mid-Tex

	Division and West Texas Division; Rockin' M Gas LLC d/b/a Bluebonnet Natural Gas LLC; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Corix Utilities (Texas) Inc.; EPCOR Gas Texas Inc.; SiEnergy, LP; Summit Utilities Arkansas, Inc. , Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and Universal Natural Gas, LLC d/b/a Universal Natural Gas, Inc. or any Successor Utility (as defined in the Financing Order). 18) Sales Customer(s) - All active customers taking service under a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. B. APPLICABILITY This rate schedule sets out the rate, terms and conditions under which the CRR Charge shall be billed and collected by Texas Gas Service Company, a Division of ONE Gas, Inc. as a Participating Gas Utility for all Incorporated and Unincorporated Areas of the Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area under the terms of the Financing Order. Each individual Sales Customer is responsible for paying the CRR Charge billed to it in accordance with the terms of this rate schedule. Payment is to be made by an individual Sales Customer to the Participating Gas Utility of which it is a customer. The Participating Gas Utility is obligated to apply amounts collected from customers to pay any outstanding CRR Charges prior to applying such amounts for any other purpose. The Participating Gas Utility, as collection agent, shall remit collections of the CRR Charges to the Indenture Trustee in accordance with the terms of the Financing Order and any servicing or other similar agreement that is contemplated by the Financing Order. C. TERM This rate schedule shall remain in effect until the CRR Charges have been collected and remitted to the Indenture Trustee in an amount sufficient to satisfy all obligations in regard to paying principal and interest on the CRR Bonds together with all other financing costs, bond administrative expenses and other costs as provided in the Financing Order. This rate schedule and the CRR Charge are irrevocable and nonbypassable. D. SALES CUSTOMERS For the purposes of billing the CRR Charges, all Sales Customers of the Participating Gas Utility's Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area shall be assessed the uniform volumetric charge identified below. E. CRR CHARGE The CRR Charge will be a monthly volumetric rate of $0.118/Ccf. The CRR Charge is calculated in accordance with and subject to the provisions set forth in the Financing Order and will be adjusted at least annually based upon the CRR Charge true- up adjustment procedure. The CRR Charge shall be included in the Participating Gas Utility's Purchase Gas Adjustment, Cost of Gas Clause, or other

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

equivalent tariff established for the collection of natural gas costs. Participating Gas Utilities may reflect the CRR Charge according to the delivery pressures defined in Participating Gas Utilities' applicable tariffs. Such delivery pressure specific charges shall be equivalent to the CRR Charge as determined below at 14.65 per square inch, as defined above.

F. DETERMINATION OF CUSTOMER RATE RELIEF CHARGE
The CRR Charge will be adjusted no less frequently than annually, in accordance with the terms of the Servicing Agreement (as defined in the Financing Order), to ensure that the expected collection of CRR Charges is adequate to pay when due, pursuant to the expected amortization schedule, principal and interest on the CRR Bonds and together with all other financing costs, bond administrative expenses and other costs, as provided in the Financing Order, on a timely basis. The CRR Charge shall be computed according to the formula described below.

Step 1: Determination of Normalized Sales Volumes

(A) Total Large Participating Gas Utility Normalized Sales Volumes (Mcf)

(B) Assumed % of uncollectible sales
(C) Total Normalized Sales Volumes Billed and Collected: (A * (1 - B)) For the avoidance of doubt, Normalized Sales Volumes are assumed to be calculated without giving effect to volumes anticipated from Participating Gas Utilities making up less than two percent (2.0%) of the total Normalized Sales Volumes of all Participating Gas Utilities.

Step 2: Determination of CRR Charge
(D) Total CRR Charge Rate Revenue Requirement for Applicable Period

(E) CRR Charge per Normalized Sales Volumes (Mcf): (D / C)

Thereof: CRR Charge for Sales Customers

G. CRR CHARGE TRUE-UP
Changes to the CRR Charge will be effected through the filing of CRR Charge True-Up Adjustment Letters by the Central Servicer to the Commission as authorized by the Financing Order and in accordance with the Servicing Agreement. Not less than fifteen (15) days prior to each CRR Scheduled Adjustment Date and more frequently as required by the Central Servicer, the Central Servicer will submit the CRR Charge True-Up Adjustment Letter in the form of Exhibit 3 to the Financing Order to ensure that CRR Charge collections are sufficient to make all scheduled payments of CRR Bond principal and interest and meet other Ongoing Financing Costs (as defined in the Financing Order) on a timely basis during the payment period. In addition to the foregoing, the Central Servicer shall be authorized to file CRR Charge True-Up Adjustment Letters with the Commission that adjust the CRR Charge more frequently (but not more often than quarterly) as required under the provisions of

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

the Servicing Agreement (as defined in the Financing Order).

H. CRR CHARGE TRUE-UP PROCEDURE
Texas Gas Service Company, a Division of ONE Gas, Inc. shall annually file with the Commission and the Central Servicer by June 1 of each year its Normalized Sales Volumes; each Large Participating Gas Utility shall include projected volumes for each of the future twelve (12) months beginning July 1, and each other Participating Gas Utility shall include its Normalized Sales Volumes for the prior calendar year. Such filing and/or reporting may be more frequent to the extent required under the Servicing Agreement and applicable Collection and Reporting Arrangements. If Texas Gas Service Company, a Division of ONE Gas, Inc. is a Large Participating Gas Utility, the Participating Gas Utility shall, upon the request of the Central Servicer, provide the Commission and the Central Servicer updated Normalized Sales Volumes for the succeeding twelve (12) month period no later than the fifteenth (15th) day following such request to allow the Central Servicer to make Interim True-Up Adjustments. Each Participating Gas Utility shall have the right to provide the foregoing information to the Central Servicer on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). The Central Servicer shall submit to the Commission and the Participating Gas Utilities, not less than fifteen (15) days prior to the CRR Scheduled Adjustment Date, a CRR Charge True-Up Adjustment Letter applying the CRR Charge True-Up Adjustment based on Normalized Sales Volumes and other mathematical factors and requesting administrative approval from the Commission as provided for in the Servicing Agreement. The Commission's review and approval of the True-Up Adjustment Letter shall be as set forth in the Servicing Agreement (it being understood such review is limited to determining if any mathematical or clerical errors are present in the application of the CRR Charge True-Up Adjustment relating to the appropriate amount of any over-collection or under-collection of CRR Charges and the amount of an adjustment). If any CRR Charge True-Up Adjustment that is an Interim True-Up Adjustment is necessary, (i) the Central Servicer may request and the Large Participating Gas Utilities shall provide revised Normalized Sales Volumes for each of the immediately succeeding twelve (12) months and related data and (ii) within fifteen (15) days of receipt of such data, the Central Servicer shall file a revision to the CRR Rate Schedule in a True-Up Charge Adjustment Letter setting forth the adjusted CRR Charge to be effective for the upcoming period, in accordance with the Servicing Agreement. Texas Gas Service Company, a Division of ONE Gas, Inc. shall have the right to provide such information on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). A CRR Charge resulting from a true-up adjustment will become effective on the first (1st) billing cycle that is not less than fifteen (15) days following the making of the CRR Charge True-Up Adjustment filing.

PIT-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE PIT Central-Gulf Service Area PIPELINE INTEGRITY TESTING (PIT) RIDER PURPOSE The purpose of this Pipeline Integrity Testing Rider is to promote the public interest in pipeline safety by enabling Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) to recover the reasonable and necessary Pipeline Integrity Safety Testing expenses incurred by the Company during the prior year (including contractor costs but excluding the labor cost of Texas Gas Service Company employees). These legally mandated operating and maintenance expenses shall be recovered through a separate monthly volumetric charge (the Pipeline Integrity Testing or PIT Surcharge) that shall be shown as a separate line item on the customers monthly bill and calculated for each customer class as described below. Capital expenditures associated with the Pipeline Integrity Program shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Texas Utilities Code. APPLICABILITY This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers. TERRITORY This Rider shall apply to the following gas sales and standard transportation rate schedules of the Company`s Central-Gulf Service Area (CGSA) within the incorporated and unincorporated areas of Austin, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Georgetown, Gonzales, Hutto, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nixon, Pflugerville, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas and in the environs area of Bastrop, Texas: 10, 15, 20, 25, 30, 40, C-1, CNG-1, 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV. QUALIFYING EXPENSES This Rider applies only to the legally mandated safety testing of the Companys

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

transmission lines in the CGSA under the Pipeline Integrity Safety Testing Program. The operating and maintenance expense items that qualify for recovery under this Rider shall include the contractor costs associated with land and leak survey, permitting, and job order preparation and completion; the clearing of right-of-way; any needed notifications to adjacent businesses and residences; traffic control equipment and personnel; Direct Current Voltage Gradient (DCVG), Close Interval (CI), and other surveys to ensure the integrity of the pipeline system; any required rigid bypasses; flushing of the lines and testing and disposal of the flush water; hydrostatic testing of the lines and analysis and disposal of the test water; any required pigging of the lines in connection with safety testing; any required x-ray welding; metallurgical testing of the pipeline or components thereof; site restoration, painting, and clean-up; expenses associated with providing a supply of compressed natural gas (CNG) to ensure uninterrupted service to customers during testing; and any other operating and maintenance expenses reasonably necessary to safely and effectively perform required safety testing of the Companys pipelines in the CGSA. Neither capital expenditures by the Company, nor the labor cost of Company employees, shall be recovered under this Rider.

CALCULATION OF PIT SURCHARGES
The Pipeline Integrity Testing Surcharges established under this Rider shall be designed so as to recover the Total Testing Expense incurred in the prior year for Pipeline Integrity Safety Testing, and shall be calculated as follows:
The Total Annual Testing Expense shall be divided by the estimated average annual usage to produce the annual PIT Surcharge.

$$\text{PIT Surcharge} = \frac{\text{Total Annual Testing Expense}}{\text{Estimated Annual Usage}}$$

Based upon customer data for the prior calendar year and any other relevant factors, the estimated annual usage may be revised annually to account for customer growth, and the resulting revised PIT Surcharge shall be applied to each class for the ensuing 12-month recovery period.

ANNUAL RECONCILIATION
After completion of each annual recovery period, the total revenues collected under this Rider for that year shall be reconciled against the revenues previously calculated to be collected for that year, and the PIT Surcharge for each class shall be adjusted upward or downward so that the Company recovers any underrecoveries or refunds any overrecoveries that may have accrued under the Rider, plus monthly interest on those underrecoveries or overrecoveries at the cost of long-term debt approved in the Companys most recent general rate case in which rates were set for application to customers in the CGSA. The reconciliation shall be filed with the regulatory authority on or before February 21st of each year, and the regulatory authority shall complete its review of the reconciliation on or before March 21st of each year, so that the Company can implement the reconciled PIT Surcharges beginning with the first billing cycle for April of each succeeding

year.

DEFERRED ACCOUNTING
The Company is authorized and directed to defer, as a regulatory asset, all Pipeline Integrity Safety Testing expenses incurred during the testing cycle starting on January 1, 2016 and all revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Companys invested capital (rate base) for ratemaking purposes.

ANNUAL REPORT & APPLICABLE PSCC
On or before February 21st after each calendar year, the Company shall file a report with the Commission and the CGSA Cities showing all Pipeline Integrity Safety Testing expenses incurred during the previous calendar year and verifying the prior years collections and any underrecoveries or overrecoveries accruing to date under this Rider. The report shall separately identify and list such expenses by account number and project number. Prior to the effective date of this Rider and on or before February 21st of each succeeding year while this Rider is in effect, the Company shall also file an Addendum to this Rider with the Commission and the CGSA Cities (a) identifying the PIT Surcharges that will be applied during the ensuing 12-month recovery period from April through March billing cycles, and (b) providing the underlying data and calculations on which each PIT Surcharge for that period is based.

The Company shall file the report with the Commission electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Director of Oversight and Safety Division
Gas Services Department
Railroad Commission of Texas
P.O. Box 12967
Austin, TX 78711-2967

NOTICE TO AFFECTED CUSTOMERS
In addition to the annual report and Addendum to this Rider required above, the Company shall provide, on or before March 31st after each calendar year, written notice to each affected customer of (a) the PIT Surcharge that will be applied during the ensuing 12-month period from April through March billing cycles, and (b) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in both English and Spanish, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Companys monthly billing statements, including electronic billing statements. The Company shall also electronically file an affidavit annually with the Commission and the CGSA Cities certifying that notice has been provided to customers in this manner. The notice shall be presumed to be complete three

PIPELINE SAFETY AND REGULATORY PROGRAM FEES
TEXAS ADMINISTRATIVE CODE TITLE 16
ECONOMIC REGULATION PART 1
RAILROAD COMMISSION OF TEXAS CHAPTER 8
PIPELINE SAFETY REGULATIONS SUBCHAPTER C
REQUIREMENTS FOR GAS PIPELINES ONLY
Rule Section8.201

Pipeline Safety and Regulatory Program Fees

(a) Application of fees. Pursuant to Texas Utilities Code, 121.211, the Commission establishes a pipeline safety and regulatory program fee, to be assessed annually against operators of natural gas distribution pipelines and pipeline facilities and natural gas master metered pipelines and pipeline facilities subject to the Commission`s jurisdiction under Texas Utilities Code, Title 3. The total amount of revenue estimated to be collected under this section does not exceed the amount the Commission estimates to be necessary to recover the costs of administering the pipeline safety and regulatory programs under Texas Utilities Code, Title 3, excluding costs that are fully funded by federal sources for any fiscal year.
(b) Natural gas distribution systems. The Commission hereby assesses each operator of a natural gas distribution system an annual pipeline safety and regulatory program fee of $1.00 for each service (service line) in service at the end of each calendar year as reported by each system operator on the U.S. Department of Transportation (DOT) Gas Distribution Annual Report, Form PHMSA F7100.1-1 due on March 15 of each year.

(1) Each operator of a natural gas distribution system shall calculate the annual pipeline safety and regulatory program total to be paid to the Commission by multiplying the $1.00 fee by the number of services listed in Part B, Section 3, of Form PHMSA F7100.1-1, due on March 15 of each year.
(2) Each operator of a natural gas distribution system shall remit to the Commission on March 15 of each year the amount calculated under paragraph (1) of this subsection.
(3) Each operator of a natural gas distribution system shall recover, by a surcharge to its existing rates, the amount the operator paid to the Commission under paragraph (1) of this subsection.

The surcharge:
(A) shall be a flat rate, one-time surcharge;
(B) shall not be billed before the operator remits the pipeline safety and regulatory program fee to the Commission;
(C) shall be applied in the billing cycle or cycles immediately following the date on which the operator paid the Commission;
(D) shall not exceed $1.00 per service or service line (For the calendar year 2024 annual pipeline safety and regulatory program fee, billed effective with meters

SCHEDULE ID	DESCRIPTION
	read on and after March 27, 2025, Texas Gas Service Company, a Division of ONE Gas, Inc. will bill all customers a one-time customer charge per bill of $1.00, based on $1.00 per service line); and (E) shall not be billed to a state agency, as that term is defined in Texas Utilities Code, 101.003. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each operator of a natural gas distribution system shall file with the Commission`s Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. Reports for the Commission shall be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address: Compliance Filing Director of Oversight and Safety Division Gas Services Department Railroad Commission of Texas P.O. Box 12967 Austin, Texas 78711-2967 (5) Each operator of a natural gas distribution system that is a utility subject to the jurisdiction of the Commission pursuant to Texas Utilities Code, Chapters 101 - 105, shall file a generally applicable tariff for its surcharge in conformance with the requirements of 7.315 of this title (relating to Filing of Tariffs). (6) Amounts recovered from customers under this subsection by an investor-owned natural gas distribution system or a cooperatively owned natural gas distribution system shall not be included in the revenue or gross receipts of the system for the purpose of calculating municipal franchise fees or any tax imposed under Subchapter B, Chapter 182, Tax Code, or under Chapter 122, nor shall such amounts be subject to a sales and use tax imposed by Chapter 151, Tax Code, or Subtitle C, Title 3, Tax Code. (c) Natural gas master meter systems. The Commission hereby assesses each natural gas master meter system an annual pipeline safety and regulatory program fee of $100 per master meter system. (1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of $100 per master meter system no later than June 30 of each year. (2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year.

WNA-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE WNA Central-Gulf Service Area WEATHER NORMALIZATION ADJUSTMENT CLAUSE APPLICABILITY The Weather Normalization Adjustment Clause (WNA) shall apply to the following general service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) in the incorporated and unincorporated areas served in the Central-Gulf Service Area including Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, Texas: Rate Schedules 10, 15, 1Z, 1Y, 20, 25, 2Z, 2Y, 40, and 4Z. The WNA shall be effective during the September through May billing cycles.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

PURPOSE
The WNA refunds over-collections or surcharges under-collections of revenue due to colder or warmer than normal weather, as established in the Company`s most recent rate filing.

WNA MECHANISM
In order to reflect weather effects in a timely and accurate manner, the WNA adjustment shall be calculated separately for each billing cycle and rate schedule. The weather factor, determined for each rate schedule in the most recent rate case, shows the effect of one heating degree day on consumption for that rate schedule. During each billing cycle, the weather factor is multiplied by the difference between normal and actual heating degree days for the billing period and by the number of customers billed. This WNA volume adjustment is priced at the current cost of service rate per Ccf to determine a WNA revenue adjustment, which is spread to the customers in the billing cycle on a prorata basis. The WNA for each billing cycle and rate schedule shall be based on the following formula:

$$\text{WNA Rate} = \frac{\text{WNAD}}{\text{CV}}, \quad \text{where}$$

CV = Current Volumes for the billing period.
WNAD = Weather Normalization Adjustment Dollars to be collected from each billing cycle and rate schedule. This factor shall be based on the following formula:
WNAD = (HDD Diff * CB * WF) * COS rate, where
HDD Diff = (Normal HDD ` Actual HDD), the difference between normal and actual heating degree days for the billing period.
CB = Number of customers billed for the billing period.
WF = Weather factor determined for each rate schedule in the most recent rate case.

1-ENV-CenGulf-OS-COG	Texas Gas Service Company, a Division of ONE Gas, Inc. Rate Schedule 1-ENV Central-Gulf Service Area COST OF GAS CLAUSE A. APPLICABILITY This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all unincorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bastrop, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas. B. DEFINITIONS 1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	the revenue associated fees and taxes. 2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year. 3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall not include the cost of financial instruments unless the use of such financial instruments is approved in advance and in writing by the Director of the Oversight and Safety Division of the Railroad Commission of Texas. Such approval would be requested as part of the Companys annual gas purchase plan, which shall be submitted annually to the Commission no later than June 15. 4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule, which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7). 5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit. 6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases. 7. RNG - the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas. 8. Purchase/Sales Ratio - A ratio determined by dividing the total volumes

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

purchased for sales customers during the 12 month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority.

9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of approved natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s); (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.

10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

C. COST OF GAS

In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT

If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS

Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES
In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT
The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; f) the revenue associated fees and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from approved hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

H. ANNUAL RECONCILIATION REPORT
The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:
1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30.
2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues.
3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.
4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period. 5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period. 6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date. 7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination. Meters Read On and After November 27, 2024 Supersedes Rate Schedule Dated January 15, 2024

CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

Source Note: The provisions of this Section7.455 adopted to be effective July 29, 2002, 27 TexReg 6687; amended to be effective May 14, 2018, 43 TexReg 2997; amended to be effective September 1, 2022, 47 TexReg 2516

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

(the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

Tolerance Limit.
Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.
Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.
Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.
Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss,

claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.

b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.
h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `
INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15

of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has

first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.
7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.
7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:
a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;
b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;
c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;
d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;
e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;
f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;
g) For Customers on transportation service, the Company may discontinue service upon request

of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the following reasons:

a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.

b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.

c) Delinquency in payment for service by a previous occupant of the premises.

d) Failure to pay for merchandise or charges for non-utility service by the Company.

e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.

f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.

g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.

h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.

i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.

j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.

k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.

7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph. The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Classification System Violation Factors Factor Value (1-4) Points Tally Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this Section for 24 hours or more 4 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for less than 24 hours, but more than 12 hours 3 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for 12 hours or less 2 Demand for collection of full payment of bills due is made during an extreme weather emergency 3 The temperature is 10 degrees or less during the period of disconnection 4 The temperature is more than 10 degrees but less than or equal to 20 degrees during the period of disconnection 3 The temperature is more than 20 degrees but less than or equal to 32 degrees during the period of disconnection 2 Repeat violations based on Company`s history of compliance 3 Good faith effort to remedy violation -2 No effort to remedy violation during the extreme weather emergency 4 Total Penalty maximum per violation 10 points or more = Class A violation 7-9 points = Class B violation 4-6 points = Class C violation 1-3 points = Class D violation More than $5,000 $5,000.00 $4,000.00 $3,000.00 The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills. Beginning in the September or October billing periods, the Company shall give notice as follows:
a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.
b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.
c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.
7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the

condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.

7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.

7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS

8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.

8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.

8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:

a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;

b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or

c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.

d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.
e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.
8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.
8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.
8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.
8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.
8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.
8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12)

consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section 15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.

8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.

8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.

8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.

8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.

9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.

a) if the meter is read by the utility, the date and reading of the meter at the beginning and

end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.
9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.
9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.
9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.
9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.
9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:
a) Every deferred payment plan entered into due to the Customers inability to pay the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.
b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.
c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

CGSA-c

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)
f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law.

9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference.

A. TERMS AND CONDITIONS
1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing.
2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due.
3. Service is not available under this Plan for a term of less than twelve (12) months.

B. AVERAGE PAYMENT AMOUNT
1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment

amount.
2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay.
3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis.

SECTION 10 ` FACILITIES AND EQUIPMENT

10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical.

10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates

leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company. b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such

access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73 Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.
b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.
c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.
13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:
a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.
b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.
15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.
15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.
15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.
15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.
15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt collection of payment from Customer. $18.00

h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00

i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00

j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00

k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00

l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses

m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00

n) Meter Removal Fee $25.00

o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00

p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost

q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34264

such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

SCHEDULE ID	DESCRIPTION
1-INC-CenGulf-IS-COG	

Texas Gas Service Company, a Division of ONE Gas, Inc.
Rate Schedule 1-INC
Central-Gulf Service Area
COST OF GAS CLAUSE

A. APPLICABILITY This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all incorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

B. DEFINITIONS
1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees (including franchise fees) and taxes.
2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year.
3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall also include the cost of gas withdrawn from storage and shall include gains and losses from the utilization of natural gas financial instruments that are executed by the Company for the purpose of mitigating price volatility. Companies affiliated with, or sharing services with, the Company shall not be allowed to charge fees for transactions related to natural gas financial instruments utilized for purposes in this Cost of Gas Clause and hence cannot realize a profit in this regard.
4. Customer Rate Relief Component - The rate per billing unit charged in accordance

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule, which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7).
5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit.
6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees (including franchise fees) and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases.
7. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12-month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority.
8. RNG is the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity standards and is interchangeable with conventional natural gas.
9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees (including franchise fees) and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s), (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.
10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

factored into the resulting Reconciliation Component.

C. COST OF GAS In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

F. SURCHARGE OR REFUND PROCEDURES In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; (f) the revenue associated fees (including franchise

fees) and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

H. ANNUAL RECONCILIATION REPORT The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:
1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30.
2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues.
3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.
4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period.
5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period. 6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date.
7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority thereafter determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination.

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Texas Gas Service Company, a Division of ONE Gas, Inc.
RATE SCHEDULE 70
Central-Gulf Service Area
UNMETERED GAS LIGHT SERVICE RATE

APPLICABILITY
Applicable to any Customer on Texas Gas Service Company, a Division of ONE Gas, Inc.s system requiring natural gas service for gas lighting only, without the use of metering device. Gas service is only available to Customers utilizing standard gas lighting equipment manufactured with an orifice burner assembly or equivalent that is intended for lighting of sidewalks and other walkways. The Company, in its sole discretion, shall determine if Customers lighting equipment qualifies for this tariff and shall contract with Customer for the appropriate monthly charge based upon Customers complete installation of gas lighting equipment. Gas service under this rate schedule is available only with the Company as the sole supplier of gas for Customer and is not available for resale to others or for standby or supplemental service.

TERRITORY
The incorporated areas of the Central-Gulf Service Area which includes Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas.

COST OF SERVICE RATE
The total hourly rated consumption of all gas lighting equipment included, expressed in Ccf at the location, shall be multiplied by 730 for gas lighting equipment that runs continuously or 365 for gas lighting equipment with a light sensor, to determine the average monthly consumption of the service. The result, rounded to the next highest Ccf, shall then be billed the rates provided in this rate schedule:

Residential $0.87646 per Ccf
Commercial $0.27930 per Ccf
Industrial $0.14569 per Ccf
Public Authority $0.13768 per Ccf

OTHER ADJUSTMENTS
Cost of Gas Component: The basic rates for cost of service set forth above shall be increased by the amount of the Cost of Gas Component for the billing month computed in accordance with the provisions of Rate Schedule 1-INC.
Taxes: Plus applicable taxes and fees (including franchise fees) related to above.

CONDITIONS

TARIFF CODE: DS **RRC TARIFF NO:** 34265

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	The Customer shall ensure that the installation of lighting equipment conforms to industry safety standards. The Company reserves the right to review Customers installation of lighting equipment from time to time to determine if it conforms to terms and conditions as set forth in this tariff and the executed service agreement with the Customer. Customer shall notify Company in writing within 30 days of any change in number of gas lights or other material changes made to the gas lighting installation. Subject to all applicable laws and orders, and the Companys rules and regulations on file with the regulatory authority. CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

Source Note: The provisions of this Section7.455 adopted to be effective July 29, 2002, 27 TexReg 6687; amended to be effective May 14, 2018, 43 TexReg 2997; amended to be effective September 1, 2022, 47 TexReg 2516

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

QUALITY OF SERVICE

QUAL_SERVICE_ID	DESCRIPTION
CGSA-c	Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued) f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law. 9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference. A. TERMS AND CONDITIONS 1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing. 2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due. 3. Service is not available under this Plan for a term of less than twelve (12) months. B. AVERAGE PAYMENT AMOUNT 1. Each month under the Plan, a customer`s Average Payment Amount will be computed by averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment amount. 2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay. 3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis. SECTION 10 ` FACILITIES AND EQUIPMENT 10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical. 10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not

be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company.
b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required

to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.
c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater

than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.

Cities and their Environs	Atmospheric Pressure PSIA	Standard Serving Pressure PSIA
Austin	14.40	14.65
Bastrop	14.40	14.65
Bayou Vista	14.70	14.95
Beaumont	14.70	14.95
Bee Cave	14.40	14.65
Buda	14.40	14.65
Cedar Park	14.40	14.65
Cuero	14.48	14.73
Dripping Springs	14.40	14.65
Galveston	14.70	14.95
Gonzales	14.48	14.73
Groves	14.70	14.95
Hutto	14.40	14.65
Jamaica Beach	14.70	14.95
Kyle	14.40	14.65
Lakeway	14.40	14.65
Lockhart	14.48	14.73
Luling	14.48	14.73
Marble Falls	14.40	14.65
Mustang Ridge	14.40	14.65
Nederland	14.70	14.95
Nixon	14.48	14.73
Pflugerville	14.40	14.65
Port Arthur	14.70	14.95
Port Neches	14.70	14.95
Rollingwood	14.40	14.65
Shiner	14.48	14.73
Sunset Valley	14.40	14.65
Yoakum	14.48	14.73
West Lake Hills	14.40	14.65

The Consumer and the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.

b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.

c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.

13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:

a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.

b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.

15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.

15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.

a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00

b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00

c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling

e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------

f) Payment Re-processing Fee $25.00

g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

collection of payment from Customer. $18.00
h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00
i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00
j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00
k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00
l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses
m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00
n) Meter Removal Fee $25.00
o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00
p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost
q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

SECTION 1 ` GENERAL STATEMENT AND DEFINITIONS

1.1 TARIFF APPLICABILITY Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative Tolerance Limit.

Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.

Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.

Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.

Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss, claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for

operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.
b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.

h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15 of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due date.

7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.

7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:

a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;

b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;

c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;

d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;

e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;

f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;

g) For Customers on transportation service, the Company may discontinue service upon request of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;

h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;

i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or

j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.

7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

following reasons:
a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.
b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.
c) Delinquency in payment for service by a previous occupant of the premises.
d) Failure to pay for merchandise or charges for non-utility service by the Company.
e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.
f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.
g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.
h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.
i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.
j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.
k) The Company shall not disconnect a delinquent residential customer for a billing period in which the Company receives a written pledge, letter of intent, purchase order, or other written notification from an energy assistance provider that it is forwarding sufficient payment to continue service.
7.6 TIME OF DISCONNECTIONS Unless a dangerous condition exists, or unless the Customer requests disconnection, service shall not be disconnected before 7:00 AM or after 7:00 PM on any day, or on Friday, Saturday, Sunday, Holiday, or day before a Holiday unless Company personnel are available the following day for the purpose of making collections or reconnecting service.
7.7 SUSPENSION OF DISCONNECTIONS DURING EXTREME WEATHER EMERGENCY Except where there is a known dangerous condition or a use of natural gas service in a manner that is dangerous or unreasonably interferes with service to others, the Company shall not disconnect natural gas service in the following circumstances:
a) The Company shall not disconnect a delinquent residential customer during an extreme weather emergency. An extreme weather emergency means a day when the previous days highest temperature did not exceed 32 degrees Fahrenheit and the temperature is predicted to remain at or below that level for the next 24 hours according to the nearest National Weather Station for the county where the customer takes service. In accordance with Texas Utilities Code 105.023, the Office of the Attorney General of Texas on its own initiative or at the request of the Commission may file suit to recover a civil penalty for a violation of this paragraph.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

The table in this paragraph contains a classification system to be used by a court when such a suit is filed. Classification System Violation Factors Factor Value (1-4) Points Tally Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this Section for 24 hours or more 4 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for less than 24 hours, but more than 12 hours 3 Customer is disconnected in violation of 16 TAC Section 7.460, subsection (ab)(1) of this section for 12 hours or less 2 Demand for collection of full payment of bills due is made during an extreme weather emergency 3 The temperature is 10 degrees or less during the period of disconnection 4 The temperature is more than 10 degrees but less than or equal to 20 degrees during the period of disconnection 3 The temperature is more than 20 degrees but less than or equal to 32 degrees during the period of disconnection 2 Repeat violations based on Company`s history of compliance 3 Good faith effort to remedy violation -2 No effort to remedy violation during the extreme weather emergency 4 Total Penalty maximum per violation 10 points or more = Class A violation 7-9 points = Class B violation 4-6 points = Class C violation 1-3 points = Class D violation More than $5,000 $5,000.00 $4,000.00 $3,000.00 The Company shall defer collection of the full payment of bills that are due during an extreme weather emergency until after the emergency is over and shall work with customers to establish a payment schedule for deferred bills. Beginning in the September or October billing periods, the Company shall give notice as follows:
a) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to the social service agencies that distribute funds from the Low-Income Home Energy Assistance Program within the Companys service areas. The Company may provide a copy electronically.
b) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to any other social service agency of which the Company is aware that provides financial assistance to low-income customers in the Companys service areas. The Company may provide a copy electronically.
c) The Company shall provide a copy of Railroad Commission of Texas Rule 7.460, Suspension of Gas Utility Service Disconnection During an Extreme Weather Emergency, to all residential customers of the Company and customers who are owners, operators or managers of master metered systems. Owners, operators or managers of master metered systems shall provide a copy of this rule to all their customers. The Company may provide a copy electronically.
7.8 RECONNECTION OF SERVICE a) When service has been disconnected for non-payment, the Company shall require that the Customer pay the total amount of their account then due plus the prescribed reconnect fee or make satisfactory arrangements for that payment before service is reinstituted. In addition, the Company shall require that the Customer re-establish satisfactory credit in accordance with this Tariff. b) If disconnection has been made by the Company for reasons other than non-payment, service shall not be reinstated until the condition for which it was terminated has been corrected to the Companys satisfaction. The Customer shall also be required to pay a reconnect fee before service is turned on. When service has been disconnected at the Customers request for a period of one year or more, the request for service shall be treated as a new application. When service has been disconnected for less than one year, the request shall be treated in the same manner as a disconnection for non-payment. c) The Company shall restore service as soon as feasible after receipt of a reconnection request and compliance with the requirements of this Tariff. The Company shall charge a non-refundable reconnection fee for all Customers in accordance with Section 15. The restoration of service will be accomplished as expeditiously as scheduling permits. If the Customer requests service after hours or earlier than reconnection would otherwise be scheduled, the Company shall offer expedited service in accordance with Section 15. Customer shall be advised that an additional fee will be charged and must agree to pay such charge. In

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

the event the Company is required to make more than one call because the reason for disconnection has not been properly corrected, the reconnect fee may be charged for each call made. No fee shall be charged for any reconnection made after disconnection due to Companys operation. See Section 15 for fees.
7.9 RIGHT OF ENTRY TO DISCONNECT SERVICE The Company shall have the right to enter the Consumers premises at any reasonable time to shut off service in accordance with this Tariff and to remove its meter and any other Company property. If the Company is required to take legal action to enforce its rights hereunder, the Company shall be entitled to recover all of its necessary expenses and fees including, but not limited to attorneys fees, police escort fees, the cost to discontinue service at the main, and/or the cost to relocate the meter at the Customers expense.
7.10 ABANDONMENT OF SERVICE The Company may not abandon a Customer without written approval from the Regulatory Authority. The Company will comply with Commission Rule 7.465.

SECTION 8 ` SECURITY DEPOSITS
8.1 ESTABLISHMENT OF CREDIT FOR RESIDENTIAL APPLICANT The Company may require a residential Applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the Customer from complying with the rules and Tariff requirements for prompt payment of bills.
8.2 DEPOSIT REQUIRED a) The Company shall require a security deposit from any present or prospective Customer in accordance with this Tariff to guarantee payment of bills and b) From any present Customer who during the last 12 consecutive months has on more than one occasion paid its utility bill after becoming delinquent.
8.3 RESIDENTIAL DEPOSIT NOT REQUIRED A residential Applicant shall not be required to pay a deposit:
a) if the residential Applicant has been a Customer of any utility for the same kind of service within the last two years and is not delinquent in payment of any such utility service account and during the last 12 consecutive months of service did not have more than one occasion in which a bill for such utility service was paid after becoming delinquent and never had service disconnected for nonpayment;
b) if the residential Applicant furnishes in writing a satisfactory guarantee to secure payment of bills for the service required; or
c) if the residential Applicant furnishes in writing a satisfactory credit rating by appropriate means, including, but not limited to, the production of generally acceptable credit cards, letters of credit references, the names of credit references which may be quickly and inexpensively contacted by the Company, or ownership of substantial equity.
d) All Applicants for residential service who are 65 years of age or older will be considered as having established credit if such Applicant does not have an outstanding balance with the Company or another utility for the same utility service which accrued within the last two years. No cash deposit shall be required of such Applicant under these conditions.
e) Each gas utility shall waive any deposit requirement for residential service for an Applicant who has been determined to be a victim of family violence as defined in Texas Family Code, 71.004, by a family violence center, by treating medical personnel, by law enforcement agency personnel, or by a designee of the Attorney General in the Crime Victim Services Division of the Office of the Attorney General. This determination shall be evidenced by the applicants submission of a certification letter developed by the Texas Council on Family Violence and made available on its web site.
8.4 OTHER EXEMPTIONS FROM DEPOSIT The Company may not require a deposit if: a) The Applicant has been a Customer for the same kind of service within the last two (2) years and does not have more than one (1) occasion in which a bill for service from any such utility service

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

account was delinquent and never had service disconnected for nonpayment; b) The Applicant furnishes a letter of credit acceptable and satisfactory to the Company; or c) The application for service is made for or guaranteed by an agency of the federal, state or local government.

8.5 RE-ESTABLISHMENT OF CREDIT Every Applicant who has previously been a Customer of the Company and whose service has been discontinued for nonpayment of bills shall be required before service is rendered to pay all amounts due to the Company or execute a written deferred payment agreement, if offered, and re-establish credit as provided in Section 8.6.

8.6 AMOUNT OF DEPOSIT The required deposit shall not exceed an amount equivalent to one-sixth of the estimated annual billings. If actual use is at least twice the amount of the estimated billings, a new deposit requirement may be calculated and an additional deposit may be required within two (2) days. If such additional deposit is not made, the Company may disconnect service under the standard disconnection procedure for failure to comply with deposit requirements.

8.7 INTEREST ON DEPOSITS a) Each utility which requires deposits to be made by its customers shall pay a minimum interest on such deposits according to the rate as established by law. If a refund of deposit is made within 30 days of receipt of deposit, no interest payment is required. If the Company retains the deposit more than 30 days, payment of interest shall be made retroactive to the date of deposit. b) Payment of interest to the Customer shall be annually or at the time the deposit is returned or credited to the Customer`s account. c) The deposit shall cease to draw interest on the date it is returned or credited to the Customer`s account.

8.8 RECORDS OF DEPOSITS a) The Company shall keep records to show: i) the name and address of each depositor; ii) the amount and date of the deposit; and iii) each transaction concerning the deposit. b) The Company shall issue a receipt of deposit to each Applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost. c) A record of each unclaimed deposit must be maintained for at least four (4) years, during which time the Company shall make a reasonable effort to return the deposit.

8.9 REFUND OF DEPOSITS Deposits on residential accounts returned to the Customer in accordance with Section 8.6 above shall be applied in the first calendar quarter following the month in which the good payment record is established. Whenever the deposit of any Customer is returned to the Customer, the Company shall pay all previously unpaid interest with the payment. a) If service is not connected or after disconnection of service, the Company shall promptly and automatically refund the Customer`s deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. The transfer of service from one premise to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules and no additional deposit may be demanded unless permitted by these rules. b) When a residential Customer has paid bills for service for twelve (12) consecutive residential bills without having service disconnected for nonpayment of bill and without having more than two (2) occasions in which a bill was delinquent and when the Customer is not delinquent in the payment of the current bills, the Company shall promptly and automatically refund the deposit plus accrued interest to the Customer in the form of cash, check or credit to a Customer`s account.

8.10 ACCEPTABLE FORMS OF DEPOSIT Any one of the following forms of credit security may be accepted from Customers and Applicants for service: a) A cash deposit of as much as one-sixth (1/6) the estimated annual billings for service requested; but no less than the minimum deposit set forth in Section 15; b) For commercial customers only, a nontransferable, irrevocable letter of credit from an established financial institution, payable for as much as one-sixth (1/6) the estimated annual billings for services requested and, which can be drawn on for a minimum of two (2) years; but no less than the minimum deposit set forth in Section

15; or c) For commercial customers only, a surety bond issued by a reputable insurance company which can be drawn on for a minimum of 2 years.
8.11 DEPOSITS FOR TEMPORARY OR SEASONAL SERVICE The Company may require a deposit for temporary or seasonal service and for weekend or seasonal residences sufficient to reasonably protect it against the assumed risk, provided such a policy is applied in a uniform and nondiscriminatory manner.
8.12 SALE OR TRANSFER OF COMPANY Upon the sale or transfer of the Company or operating units thereof, the Company shall file with the Commission under oath, in addition to other information, a list showing the names and addresses of all customers served by the Company or unit who have to their credit a deposit, the date such deposit was made, the amount thereof, and the unpaid interest thereon.
8.13 COMPLAINT The Company shall direct its personnel engaged in initial contact with an Applicant or Customer for service seeking to establish or re-establish credit under the provisions of these rules to inform the Customer, if dissatisfaction is expressed with the Company`s decision, of the Customer`s right to file a complaint with the regulatory authority thereon.
8.14 FRANCHISE AGREEMENTS To the extent the terms of a franchise agreement are inconsistent with this Section, the terms of the franchise agreement control. Applicable to customers inside the corporate limits of an incorporated municipality that imposes a franchise fee to Company for the gas service provided to Customer.

SECTION 9 ` BILLING AND PAYMENT OF BILLS

9.1 RENDERING OF BILLS Bills for gas service shall be rendered monthly, unless otherwise authorized or unless service is rendered for a period less than a month. Bills shall be rendered as promptly as possible following the reading of meters. Bills shall be due and payable in full on or before the due date, which shall be stated on the face of the bill and shall not be earlier than fifteen (15) days after the bill is mailed (including electronic mail). Bills shall be considered to have been rendered when deposited in the United States Mail with postage prepaid thereon or, when the customer has elected to receive billings via electronic mail, when the electronic document has been sent. Payment shall be considered received when the correct amount has been received through a company authorized payment method. If not paid by the date due, the bill shall be considered delinquent.
9.2 REQUIRED BILL INFORMATION The Customer`s bill must show all the following information. The information must be arranged and displayed in such a manner as to allow the customer to compute their bill with the applicable rate schedule. The applicable rate schedule must be mailed to the Customer on request of the customer.
a) if the meter is read by the utility, the date and reading of the meter at the beginning and end of the period for which rendered;
b) the number and kind of units billed;
c) the applicable rate schedule title or code;
d) the total base bill;
e) the total of any adjustments to the base bill and the amount of adjustments per billing unit;
f) a distinct marking to identify an estimated bill.
9.3 ESTIMATED BILLS Where there is good reason for doing so, estimated bills may be submitted, provided that an actual meter reading is taken at least every six months. For the second consecutive month in which the meter reader is unable to gain access to the premises to read the meter on regular meter reading trips, or in months where meters are not read otherwise, the utility must provide the customer with a postcard and request that the customer read the

meter and return the card to the utility if the meter is of a type that can be read by the customer without significant inconvenience or special tools or equipment. If such a postcard is not received by the utility in time for billing, the utility may estimate the meter reading and render the bill accordingly.

9.4 DISPUTED BILLS a) In the event of a dispute between the Customer and the Company regarding the bill, the Company must make such investigation as is required by the particular case and report the results to the Customer. If the Customer wishes to obtain the benefits of subsection b) of this Section, notification of the dispute must be given to the Company prior to the date the bill becomes delinquent. In the event the dispute is not resolved, the Company shall inform the Customer of the complaint procedures of the appropriate Regulatory Authority. b) Notwithstanding any other subsection of this Section, the Customer shall not be required to pay the disputed portion of the bill which exceeds the amount of that Customers average usage for the billing period at current rates until the earlier of the following: resolution of the dispute or the expiration of the 60-day period beginning on the day the disputed bill is issued. For purposes of this Section only, the Customers average usage for the billing period shall be the average of the Customers usage for the same billing period during the preceding two (2) years. Where no previous usage history exists, the average usage shall be estimated on the basis of usage levels of similar customers and under similar conditions.

9.5 PAYMENT RE-PROCESSING FEE The Company may charge or add to the Customers account and collect a fee (as provided in Section 15) to recover costs for reprocessing any payment, including paper check, electronic transfer payment, and debit and credit card payment, that has been rejected or returned to the Company by the bank for any reason other than bank error.

9.6 ELECTRONIC BILLING STATEMENTS The Customer may at their option receive bills via electronic mail. Customers shall provide current, accurate and complete information to the Company and shall update their information as necessary so that it remains current, accurate and complete. The Company may verify Customer information at any time.

9.7 PAYMENT OPTIONS The Company, at its option and discretion, may contract with payment vendors to provide various payment options and authorize these vendors to accept payments from Customers on the Companys behalf. Payment options may be electronic, telephonic, in person, or by mail and may include automatic bank draft, credit/debit card, check or cash. Contracted payment vendors may charge Customers an additional fee for the use of that payment option and the contracted payment vendor shall be solely responsible for collecting any fee from the Customer.

9.8 DEFERRED PAYMENT PLANS The Company, at its sole discretion, may offer a deferred payment plan for delinquent Customer accounts. Deferred payment plans shall conform to the following guidelines:

a) Every deferred payment plan entered into due to the Customers inability to pay the outstanding bill in full must provide that service will not be discontinued if the customer pays current bills and a reasonable amount of the outstanding bill and agrees to pay the balance in reasonable installments until the bill is paid.

b) For purposes of determining reasonableness, the following shall be considered: i) size of delinquent account; ii) Customers ability to pay; iii) Customers payment history; iv) time that the debt has been outstanding; v) reasons why debt has been outstanding; and vi) other relevant factors concerning the circumstances of the Customer.

c) A deferred payment plan, if reduced to writing, shall state immediately preceding the space provided for the Customers signature and in bold-face print at least two sizes larger than any other used that, If you are not satisfied with this agreement, do not sign. If you are satisfied with this agreement, you give up your right to dispute the amount due under the agreement except for the Companys failure or refusal to comply with the terms of this

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

agreement.
d) A deferred payment plan may include a one-time penalty up to 5.0% for late payment on the original amount of the outstanding bill except in cases where the outstanding bill is unusually high as a result of the Company`s error (such as an inaccurately estimated bill or an incorrectly read meter). A deferred payment plan shall not include a finance charge.
e) If a Customer for utility service has not fulfilled the terms of a deferred payment agreement or refuses to sign the same if it is reduced to writing, the utility shall have the right to disconnect pursuant the disconnection rules in this Tariff, and under such circumstances, it shall not be required to offer a subsequent negotiation of a deferred payment agreement prior to disconnection.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

		schedules an appointment but fails to appear. $18.00 n) Meter Removal Fee $25.00 o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00 p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the Company to access a meter or other equipment. Actual cost q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00 15.7 DEPOSIT AMOUNTS a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost b) Residential Customer Deposit Minimum $75.00 c) Non-Residential Deposit Minimum $250.00
321547	CGSA -1a	Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 SERVICE FEES AND DEPOSIT AMOUNTS 15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc. 15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.

15.3 SERVICE WORK ON CHARGE BASIS
The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.

15.4 EXPEDITED SERVICE REQUEST
A Customer may request an expedited service, upon availability. Charges may apply.

321548 CGSA -1b

Central-Gulf Service Area - Inc and Env Areas from Rules of Service eff. 11/27/2024 (Continued)

15.5 SPECIFIC SERVICE TIME REQUEST
A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.

15.6 SERVICE FEES
All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.
a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00
b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00
c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34265

additional fee will be charged and must agree to pay such charge.
Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00
Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00

North Texas Service Area and Borger/Skellytown Service Area

CUSTOMER RATE RELIEF RATE SCHEDULE

Applicable to all Sales Customers for the purpose of collecting and remitting customer rate relief charges as authorized by the Railroad Commission of Texas (Commission) in accordance with Chapter 104, Subchapter I of the Texas Utilities Code and the Commission Financing Order issued in Docket No. OS-21-00007061.

A. ABBREVIATIONS AND DEFINITIONS

1) Authority - The Texas Public Finance Authority, together with any successor to its duties and functions.
2) Bonds or Customer Rate Relief (CRR) Bonds - The Texas Natural Gas Securitization Finance Corporation Customer Rate Relief Bonds, Series 2023 and any additional or different designation or title by which each series of Bonds shall be known as determined by the Issuer Entity.
3) Ccf and Mcf - For Ccf, one hundred (100) standard cubic feet of gas, where one (1) standard cubic foot of gas is the amount of gas contained in one (1) cubic foot of space at a standard pressure of fourteen point sixty-five (14.65) pounds per square inch, absolute and a standard temperature of sixty (60) degrees Fahrenheit; and, for Mcf, 1,000 standard cubic feet of gas.
4) Central Servicer - The entity engaged in accordance with the terms of the Financing Order to, amongst other things, engage the Participating Gas Utilities as collection agents for the purposes of facilitating collection and remittance of CRR Charges by Participating Gas Utilities, and perform the other services required of it under the Servicing Agreement (as defined in the Financing Order).
5) Commission - The Railroad Commission of Texas, including its staff or delegate.
6) CRR Charge True-Up Adjustment - A True-Up Adjustment (as defined in the Financing Order).
7) CRR Charge True-Up Charge Adjustment Letter - A true-up adjustment letter substantially in the form of Exhibit 3 to the Financing Order.
8) CRR Scheduled Adjustment Date - January 1 and July 1 of each applicable year, provided that the CRR Scheduled Adjustment Date and any other deadlines or target dates related thereto, shall be subject to modification prior to the date the Bonds so as to reflect the terms of the Servicing Agreement.
9) Customer Rate Relief (CRR) Charge - A nonbypassable charge as defined in Tex. Util. Code Section 104.362(7).

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	10) Financing Order - The order adopted under Tex. Util. Code Section 104.366 approving the issuance of CRR Bonds and the creation of Customer Rate Relief Property and associated CRR Charges for the recovery of regulatory assets, including extraordinary costs, related financing costs, and other costs authorized by the Financing Order. 11) Gas Utility - Texas Gas Service Company, a Division of ONE Gas, Inc. and its successors and assignees, an operator of natural gas distribution pipelines that delivers and sells natural gas to the public and that is subject to the Commission's jurisdiction under Tex. Util. Code Section 102.001, or an operator that transmits, transports, delivers, or sells natural gas or synthetic natural gas to operators of natural gas distribution pipelines and whose rates for those services are established by the Commission in a rate proceeding filed under Chapter 104 of the Utilities Code, within the service area.? 12) Irrevocable - The Financing Order, together with the Customer Rate Relief Property as defined by Tex. Util. Code Section 104.362(8) and the CRR Charges authorized by the Financing Order, are irrevocable and not subject to reduction, impairment, or adjustment by further action of the Commission, except in connection with true-ups authorized by the Financing Order. 13) Issuer Entity - Texas Natural Gas Securitization Finance Corporation, a Texas nonprofit public corporation established by the Authority, or any successor created pursuant to Tex. Gov't Code Section 1232.1072. 14) Large Participating Gas Utility - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and any Participating Gas Utility or Successor Utility (as defined in the Financing Order) each of whose Normalized Sales Volumes exceed 2.0% of the total aggregate Normalized Sales Volumes among all Participating Gas Utilities. Any calculation performed in connection with the preceding sentence shall be made on the basis of the most recently reported Normalized Sales Volumes and such calculation shall be performed by the Central Servicer annually no later than one (1) month after Normalized Sales Volumes are reported as regularly scheduled under Paragraph H hereof; provided that the Commission and/or Central Servicer may perform such calculation without any limitation in order to give effect to any merger, acquisition, disposition, divesture, spin-off or other transaction that would impact a Participating Gas Utility's share of the total aggregate Normalized Sales Volumes. The Commission or the Central Servicer shall promptly thereafter provide written notice to a Participating Gas Utility that subsequently becomes a Large Participating Gas Utility, which change shall take effective beginning on January 1 of the following calendar year. 15) Nonbypassable - CRR Charges must be paid by all existing or future customers receiving service from a Participating Gas Utility or such gas utility's successors or assigns. 16) Normalized Sales Volumes - a) For Large Participating Gas Utilities: All natural gas volumes projected to be billed for the upcoming twelve (12) month period in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

collection of natural gas costs. For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated to calculate the CRR Charges. b) For other Participating Gas Utilities: All natural gas volumes billed in the preceding calendar year in conjunction with the operation of a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs and normalized according to the methodology utilized in each Participating Gas Utility's application filed in Docket No. OS-21- 00007061, Consolidated Applications For Customer Rate Relief and Related Regulatory Asset Determinations In Connection With The February 2021 Winter Storm. ? For the avoidance of doubt, only the Normalized Sales Volumes of Large Participating Gas Utilities shall be aggregated in order to calculate the CRR Charges.
17) Participating Gas Utilities - Atmos Energy Corporation on behalf of its Mid-Tex Division and West Texas Division; Rockin' M Gas LLC d/b/a Bluebonnet Natural Gas LLC; CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Entex and CenterPoint Energy Texas Gas; Corix Utilities (Texas) Inc.; EPCOR Gas Texas Inc.; SiEnergy, LP; Summit Utilities Arkansas, Inc. , Texas Gas Service Company, a Division of ONE Gas, Inc., excluding the West Texas Service Area; and Universal Natural Gas, LLC d/b/a Universal Natural Gas, Inc. or any Successor Utility (as defined in the Financing Order).
18) Sales Customer(s) - All active customers taking service under a Participating Gas Utility's Purchased Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs.

B. APPLICABILITY
This rate schedule sets out the rate, terms and conditions under which the CRR Charge shall be billed and collected by Texas Gas Service Company, a Division of ONE Gas, Inc. as a Participating Gas Utility for all Incorporated and Unincorporated Areas of the Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area under the terms of the Financing Order. Each individual Sales Customer is responsible for paying the CRR Charge billed to it in accordance with the terms of this rate schedule. Payment is to be made by an individual Sales Customer to the Participating Gas Utility of which it is a customer. The Participating Gas Utility is obligated to apply amounts collected from customers to pay any outstanding CRR Charges prior to applying such amounts for any other purpose. The Participating Gas Utility, as collection agent, shall remit collections of the CRR Charges to the Indenture Trustee in accordance with the terms of the Financing Order and any servicing or other similar agreement that is contemplated by the Financing Order.

C. TERM
This rate schedule shall remain in effect until the CRR Charges have been collected and remitted to the Indenture Trustee in an amount sufficient to satisfy all obligations in regard to paying principal and interest on the CRR Bonds together with all other financing costs, bond administrative expenses and other costs as provided in the Financing Order. This rate schedule and the CRR Charge are irrevocable and nonbypassable.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

D. SALES CUSTOMERS
For the purposes of billing the CRR Charges, all Sales Customers of the Participating Gas Utility's Central-Gulf Service Area, Rio Grande Valley Service Area, North Texas Service Area and Borger/Skellytown Service Area shall be assessed the uniform volumetric charge identified below.

E. CRR CHARGE
The CRR Charge will be a monthly volumetric rate of $0.118/Ccf. The CRR Charge is calculated in accordance with and subject to the provisions set forth in the Financing Order and will be adjusted at least annually based upon the CRR Charge true- up adjustment procedure. The CRR Charge shall be included in the Participating Gas Utility's Purchase Gas Adjustment, Cost of Gas Clause, or other equivalent tariff established for the collection of natural gas costs. Participating Gas Utilities may reflect the CRR Charge according to the delivery pressures defined in Participating Gas Utilities' applicable tariffs. Such delivery pressure specific charges shall be equivalent to the CRR Charge as determined below at 14.65 per square inch, as defined above.

F. DETERMINATION OF CUSTOMER RATE RELIEF CHARGE
The CRR Charge will be adjusted no less frequently than annually, in accordance with the terms of the Servicing Agreement (as defined in the Financing Order), to ensure that the expected collection of CRR Charges is adequate to pay when due, pursuant to the expected amortization schedule, principal and interest on the CRR Bonds and together with all other financing costs, bond administrative expenses and other costs, as provided in the Financing Order, on a timely basis. The CRR Charge shall be computed according to the formula described below.

Step 1: Determination of Normalized Sales Volumes

(A) Total Large Participating Gas Utility Normalized Sales Volumes (Mcf)

(B) Assumed % of uncollectible sales
(C) Total Normalized Sales Volumes Billed and Collected: (A * (1 - B)) For the avoidance of doubt, Normalized Sales Volumes are assumed to be calculated without giving effect to volumes anticipated from Participating Gas Utilities making up less than two percent (2.0%) of the total Normalized Sales Volumes of all Participating Gas Utilities.

Step 2: Determination of CRR Charge
(D) Total CRR Charge Rate Revenue Requirement for Applicable Period

(E) CRR Charge per Normalized Sales Volumes (Mcf): (D / C)

Thereof: CRR Charge for Sales Customers

G. CRR CHARGE TRUE-UP

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

Changes to the CRR Charge will be effected through the filing of CRR Charge True-Up Adjustment Letters by the Central Servicer to the Commission as authorized by the Financing Order and in accordance with the Servicing Agreement. Not less than fifteen (15) days prior to each CRR Scheduled Adjustment Date and more frequently as required by the Central Servicer, the Central Servicer will submit the CRR Charge True-Up Adjustment Letter in the form of Exhibit 3 to the Financing Order to ensure that CRR Charge collections are sufficient to make all scheduled payments of CRR Bond principal and interest and meet other Ongoing Financing Costs (as defined in the Financing Order) on a timely basis during the payment period. In addition to the foregoing, the Central Servicer shall be authorized to file CRR Charge True-Up Adjustment Letters with the Commission that adjust the CRR Charge more frequently (but not more often than quarterly) as required under the provisions of the Servicing Agreement (as defined in the Financing Order).

H. CRR CHARGE TRUE-UP PROCEDURE
Texas Gas Service Company, a Division of ONE Gas, Inc. shall annually file with the Commission and the Central Servicer by June 1 of each year its Normalized Sales Volumes; each Large Participating Gas Utility shall include projected volumes for each of the future twelve (12) months beginning July 1, and each other Participating Gas Utility shall include its Normalized Sales Volumes for the prior calendar year. Such filing and/or reporting may be more frequent to the extent required under the Servicing Agreement and applicable Collection and Reporting Arrangements. If Texas Gas Service Company, a Division of ONE Gas, Inc. is a Large Participating Gas Utility, the Participating Gas Utility shall, upon the request of the Central Servicer, provide the Commission and the Central Servicer updated Normalized Sales Volumes for the succeeding twelve (12) month period no later than the fifteenth (15th) day following such request to allow the Central Servicer to make Interim True-Up Adjustments. Each Participating Gas Utility shall have the right to provide the foregoing information to the Central Servicer on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). The Central Servicer shall submit to the Commission and the Participating Gas Utilities, not less than fifteen (15) days prior to the CRR Scheduled Adjustment Date, a CRR Charge True-Up Adjustment Letter applying the CRR Charge True-Up Adjustment based on Normalized Sales Volumes and other mathematical factors and requesting administrative approval from the Commission as provided for in the Servicing Agreement. The Commission's review and approval of the True-Up Adjustment Letter shall be as set forth in the Servicing Agreement (it being understood such review is limited to determining if any mathematical or clerical errors are present in the application of the CRR Charge True-Up Adjustment relating to the appropriate amount of any over-collection or under-collection of CRR Charges and the amount of an adjustment). If any CRR Charge True-Up Adjustment that is an Interim True-Up Adjustment is necessary, (i) the Central Servicer may request and the Large Participating Gas Utilities shall provide revised Normalized Sales Volumes for each of the immediately succeeding twelve (12) months and related data

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	and (ii) within fifteen (15) days of receipt of such data, the Central Servicer shall file a revision to the CRR Rate Schedule in a True-Up Charge Adjustment Letter setting forth the adjusted CRR Charge to be effective for the upcoming period, in accordance with the Servicing Agreement. Texas Gas Service Company, a Division of ONE Gas, Inc. shall have the right to provide such information on a confidential basis if reasonably necessary to ensure compliance with applicable securities laws (subject to any (i) legal requirements necessitating the disclosure of such information, including compliance with (A) applicable securities laws and (B) other generally applicable laws and (ii) certain customary restrictions and exceptions to be agreed). A CRR Charge resulting from a true-up adjustment will become effective on the first (1st) billing cycle that is not less than fifteen (15) days following the making of the CRR Charge True-Up Adjustment filing. I. TAXABILITY The receipt of CRR Charges by a Participating Gas Utility is exempt from state and local sales and use taxes and utility gross receipts taxes and assessments and is excluded from revenue for purposes of franchise tax under Tex. Tax Code Section 171.1011. Meters Read On and After September 25, 2024 Supersedes Rate Schedule Dated September 26, 2023
PIT-CenGulf-ISOS	Texas Gas Service Company, a Division of ONE Gas, Inc. RATE SCHEDULE PIT Central-Gulf Service Area PIPELINE INTEGRITY TESTING (PIT) RIDER PURPOSE The purpose of this Pipeline Integrity Testing Rider is to promote the public interest in pipeline safety by enabling Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) to recover the reasonable and necessary Pipeline Integrity Safety Testing expenses incurred by the Company during the prior year (including contractor costs but excluding the labor cost of Texas Gas Service Company employees). These legally mandated operating and maintenance expenses shall be recovered through a separate monthly volumetric charge (the Pipeline Integrity Testing or PIT Surcharge) that shall be shown as a separate line item on the customers monthly bill and calculated for each customer class as described below. Capital expenditures associated with the Pipeline Integrity Program shall continue to be recovered through base rates and any interim rate adjustments implemented pursuant to Section 104.301 of the Texas Utilities Code. APPLICABILITY This Rider shall be applied to all gas sales and transportation customers within the service territory designated below, except special contract customers.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

TERRITORY
This Rider shall apply to the following gas sales and standard transportation rate schedules of the Company`s Central-Gulf Service Area (CGSA) within the incorporated and unincorporated areas of Austin, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Georgetown, Gonzales, Hutto, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nixon, Pflugerville, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas and in the environs area of Bastrop, Texas: 10, 15, 20, 25, 30, 40, C-1, CNG-1, 1Z, 1Y, 2Z, 2Y, 3Z, 4Z, C-1-ENV, CNG-1-ENV, T-1, and T-1-ENV.

QUALIFYING EXPENSES
This Rider applies only to the legally mandated safety testing of the Companys transmission lines in the CGSA under the Pipeline Integrity Safety Testing Program. The operating and maintenance expense items that qualify for recovery under this Rider shall include the contractor costs associated with land and leak survey, permitting, and job order preparation and completion; the clearing of right-of-way; any needed notifications to adjacent businesses and residences; traffic control equipment and personnel; Direct Current Voltage Gradient (DCVG), Close Interval (CI), and other surveys to ensure the integrity of the pipeline system; any required rigid bypasses; flushing of the lines and testing and disposal of the flush water; hydrostatic testing of the lines and analysis and disposal of the test water; any required pigging of the lines in connection with safety testing; any required x-ray welding; metallurgical testing of the pipeline or components thereof; site restoration, painting, and clean-up; expenses associated with providing a supply of compressed natural gas (CNG) to ensure uninterrupted service to customers during testing; and any other operating and maintenance expenses reasonably necessary to safely and effectively perform required safety testing of the Companys pipelines in the CGSA. Neither capital expenditures by the Company, nor the labor cost of Company employees, shall be recovered under this Rider.

CALCULATION OF PIT SURCHARGES
The Pipeline Integrity Testing Surcharges established under this Rider shall be designed so as to recover the Total Testing Expense incurred in the prior year for Pipeline Integrity Safety Testing, and shall be calculated as follows:
The Total Annual Testing Expense shall be divided by the estimated average annual usage to produce the annual PIT Surcharge.

$$\text{PIT Surcharge} = \frac{\text{Total Annual Testing Expense}}{\text{Estimated Annual Usage}}$$

Based upon customer data for the prior calendar year and any other relevant factors, the estimated annual usage may be revised annually to account for customer growth, and the resulting revised PIT Surcharge shall be applied to each class for the ensuing 12-month recovery period.

ANNUAL RECONCILIATION

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

After completion of each annual recovery period, the total revenues collected under this Rider for that year shall be reconciled against the revenues previously calculated to be collected for that year, and the PIT Surcharge for each class shall be adjusted upward or downward so that the Company recovers any underrecoveries or refunds any overrecoveries that may have accrued under the Rider, plus monthly interest on those underrecoveries or overrecoveries at the cost of long-term debt approved in the Companys most recent general rate case in which rates were set for application to customers in the CGSA. The reconciliation shall be filed with the regulatory authority on or before February 21st of each year, and the regulatory authority shall complete its review of the reconciliation on or before March 21st of each year, so that the Company can implement the reconciled PIT Surcharges beginning with the first billing cycle for April of each succeeding year.

DEFERRED ACCOUNTING
The Company is authorized and directed to defer, as a regulatory asset, all Pipeline Integrity Safety Testing expenses incurred during the testing cycle starting on January 1, 2016 and all revenues specifically collected under this Rider shall be applied to the deferred expense account. The Company shall not earn a return on any regulatory asset created under this provision, and no such regulatory asset shall be included in the Companys invested capital (rate base) for ratemaking purposes.

ANNUAL REPORT & APPLICABLE PSCC
On or before February 21st after each calendar year, the Company shall file a report with the Commission and the CGSA Cities showing all Pipeline Integrity Safety Testing expenses incurred during the previous calendar year and verifying the prior years collections and any underrecoveries or overrecoveries accruing to date under this Rider. The report shall separately identify and list such expenses by account number and project number. Prior to the effective date of this Rider and on or before February 21st of each succeeding year while this Rider is in effect, the Company shall also file an Addendum to this Rider with the Commission and the CGSA Cities (a) identifying the PIT Surcharges that will be applied during the ensuing 12-month recovery period from April through March billing cycles, and (b) providing the underlying data and calculations on which each PIT Surcharge for that period is based.

The Company shall file the report with the Commission electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Director of Oversight and Safety Division
Gas Services Department
Railroad Commission of Texas
P.O. Box 12967
Austin, TX 78711-2967

NOTICE TO AFFECTED CUSTOMERS

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	In addition to the annual report and Addendum to this Rider required above, the Company shall provide, on or before March 31st after each calendar year, written notice to each affected customer of (a) the PIT Surcharge that will be applied during the ensuing 12-month period from April through March billing cycles, and (b) the effect the PIT Surcharge is expected to have on the average monthly bill for each affected customer class. The written notice shall be provided in both English and Spanish, shall be the only information contained on the piece of paper on which it is printed, and may be provided either by separate mailing or by insert included with the Companys monthly billing statements, including electronic billing statements. The Company shall also electronically file an affidavit annually with the Commission and the CGSA Cities certifying that notice has been provided to customers in this manner. The notice shall be presumed to be complete three calendar days after the date the separate mailing or billing statement is deposited in a postage-paid, properly addressed wrapper in a post office or official depository under care of the United States Postal Service. The initial notice shall be filed with, reviewed, and approved by the regulatory authority, and each subsequent notice shall follow the same format as that of the approved initial notice. PSF-All-ISOS-PipeFee	Texas Gas Service Company, a Division of ONE Gas, Inc. All Service Areas RATE SCHEDULE PSF PIPELINE SAFETY AND REGULATORY PROGRAM FEES TEXAS ADMINISTRATIVE CODE TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 8 PIPELINE SAFETY REGULATIONS SUBCHAPTER C REQUIREMENTS FOR GAS PIPELINES ONLY Rule Section8.201 Pipeline Safety and Regulatory Program Fees (a) Application of fees. Pursuant to Texas Utilities Code, 121.211, the Commission establishes a pipeline safety and regulatory program fee, to be assessed annually against operators of natural gas distribution pipelines and pipeline facilities and natural gas master metered pipelines and pipeline facilities subject to the Commission`s jurisdiction under Texas Utilities Code, Title 3. The total amount of revenue estimated to be collected under this section does not exceed the amount the Commission estimates to be necessary to recover the costs of administering the pipeline safety and regulatory programs under Texas Utilities Code, Title 3, excluding costs that are fully funded by federal sources for any fiscal year. (b) Natural gas distribution systems. The Commission hereby assesses each operator of a natural gas distribution system an annual pipeline safety and regulatory program fee of $1.00 for each service (service line) in service at the end of each calendar year as reported by each system operator on the U.S. Department of Transportation (DOT) Gas Distribution Annual Report, Form PHMSA F7100.1-1 due on March 15 of each year. (1) Each operator of a natural gas distribution system shall calculate the annual pipeline safety and regulatory program total to be paid to the Commission by multiplying the $1.00 fee by the number of services listed in Part B, Section 3, of Form PHMSA F7100.1-1, due on March 15 of each year. (2) Each operator of a natural gas distribution system shall remit to the Commission on March 15 of each year the amount calculated under paragraph (1) of

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION

this subsection.
(3) Each operator of a natural gas distribution system shall recover, by a surcharge to its existing rates, the amount the operator paid to the Commission under paragraph (1) of this subsection.

The surcharge:
(A) shall be a flat rate, one-time surcharge;
(B) shall not be billed before the operator remits the pipeline safety and regulatory program fee to the Commission;
(C) shall be applied in the billing cycle or cycles immediately following the date on which the operator paid the Commission;
(D) shall not exceed $1.00 per service or service line (For the calendar year 2024 annual pipeline safety and regulatory program fee, billed effective with meters read on and after March 27, 2025, Texas Gas Service Company, a Division of ONE Gas, Inc. will bill all customers a one-time customer charge per bill of $1.00, based on $1.00 per service line); and
(E) shall not be billed to a state agency, as that term is defined in Texas Utilities Code, 101.003.

(4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each operator of a natural gas distribution system shall file with the Commission`s Oversight and Safety Division a report showing:
(A) the pipeline safety and regulatory program fee amount paid to the Commission;
(B) the unit rate and total amount of the surcharge billed to each customer;
(C) the date or dates on which the surcharge was billed to customers; and
(D) the total amount collected from customers from the surcharge. Reports for the Commission shall be filed electronically at GUD_Compliance@rrc.texas.gov or at the following address:

Compliance Filing
Director of Oversight and Safety Division
Gas Services Department
Railroad Commission of Texas
P.O. Box 12967
Austin, Texas 78711-2967

(5) Each operator of a natural gas distribution system that is a utility subject to the jurisdiction of the Commission pursuant to Texas Utilities Code, Chapters 101 - 105, shall file a generally applicable tariff for its surcharge in conformance with the requirements of 7.315 of this title (relating to Filing of Tariffs).
(6) Amounts recovered from customers under this subsection by an investor-owned natural gas distribution system or a cooperatively owned natural gas distribution system shall not be included in the revenue or gross receipts of the system for the purpose of calculating municipal franchise fees or any tax imposed under Subchapter B, Chapter 182, Tax Code, or under Chapter 122, nor shall such amounts be subject to a sales and use tax imposed by Chapter 151, Tax Code, or Subtitle C, Title 3,

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	Tax Code. (c) Natural gas master meter systems. The Commission hereby assesses each natural gas master meter system an annual pipeline safety and regulatory program fee of $100 per master meter system. (1) Each operator of a natural gas master meter system shall remit to the Commission the annual pipeline safety and regulatory program fee of $100 per master meter system no later than June 30 of each year. (2) The Commission shall send an invoice to each affected natural gas master meter system operator no later than April 30 of each year as a courtesy reminder. The failure of a natural gas master meter system operator to receive an invoice shall not exempt the natural gas master meter system operator from its obligation to remit to the Commission the annual pipeline safety and regulatory program fee on June 30 each year. (3) Each operator of a natural gas master meter system shall recover as a surcharge to its existing rates the amounts paid to the Commission under paragraph (1) of this subsection. (4) No later than 90 days after the last billing cycle in which the pipeline safety and regulatory program fee surcharge is billed to customers, each natural gas master meter system operator shall file with the Oversight and Safety Division a report showing: (A) the pipeline safety and regulatory program fee amount paid to the Commission; (B) the unit rate and total amount of the surcharge billed to each customer; (C) the date or dates on which the surcharge was billed to customers; and (D) the total amount collected from customers from the surcharge. (d) Late payment penalty. If the operator of a natural gas distribution system or a natural gas master meter system does not remit payment of the annual pipeline safety and regulatory program fee to the Commission within 30 days of the due date, the Commission shall assess a late payment penalty of 10 percent of the total assessment due under subsection (b) or (c) of this section, as applicable, and shall notify the operator of the total amount due to the Commission. RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

WEATHER NORMALIZATION ADJUSTMENT CLAUSE

APPLICABILITY
The Weather Normalization Adjustment Clause (WNA) shall apply to the following general service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (the Company) in the incorporated and unincorporated areas served in the Central-Gulf Service Area including Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, Texas: Rate Schedules 10, 15, 1Z, 1Y, 20, 25, 2Z, 2Y, 40, and 4Z. The WNA shall be effective during the September through May billing cycles.

PURPOSE
The WNA refunds over-collections or surcharges under-collections of revenue due to colder or warmer than normal weather, as established in the Company`s most recent rate filing.

WNA MECHANISM
In order to reflect weather effects in a timely and accurate manner, the WNA adjustment shall be calculated separately for each billing cycle and rate schedule. The weather factor, determined for each rate schedule in the most recent rate case, shows the effect of one heating degree day on consumption for that rate schedule. During each billing cycle, the weather factor is multiplied by the difference between normal and actual heating degree days for the billing period and by the number of customers billed. This WNA volume adjustment is priced at the current cost of service rate per Ccf to determine a WNA revenue adjustment, which is spread to the customers in the billing cycle on a prorata basis. The WNA for each billing cycle and rate schedule shall be based on the following formula:

$$\text{WNA Rate} = \frac{\text{WNAD}}{\text{CV}}, \quad \text{where}$$

CV = Current Volumes for the billing period.
WNAD = Weather Normalization Adjustment Dollars to be collected from each billing cycle and rate schedule. This factor shall be based on the following formula:
WNAD = (HDD Diff * CB * WF) * COS rate, where
HDD Diff = (Normal HDD ` Actual HDD), the difference between normal and actual heating degree days for the billing period.
CB = Number of customers billed for the billing period.
WF = Weather factor determined for each rate schedule in the most recent rate case.

1-INC-CenGulf-IS-COG	Texas Gas Service Company, a Division of ONE Gas, Inc. Rate Schedule 1-INC Central-Gulf Service Area COST OF GAS CLAUSE A. APPLICABILITY This Cost of Gas Clause shall apply to all gas sales service rate schedules of Texas Gas Service Company, a Division of ONE Gas, Inc. (Company) in all incorporated areas of its Central-Gulf Service Area including Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills and Yoakum, Texas. B. DEFINITIONS 1. Cost of Gas - The rate per billing unit or the total calculation under this clause, consisting of the Commodity Cost, the Customer Rate Relief Component, the Reconciliation Component, any surcharges or refunds, Uncollectible Cost of Gas, and the revenue associated fees (including franchise fees) and taxes. 2. Commodity Cost - The Cost of Purchased Gas multiplied by the Purchase/Sales Ratio plus an adjustment to correct any known and quantifiable under or over collection prior to the end of the reconciliation period for the objective of minimizing the impact of under or over collection by the reconciliation factor in the next year.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID	DESCRIPTION
	3. Cost of Purchased Gas - The estimated cost for gas purchased by the Company from its suppliers or the estimated weighted average cost for gas purchased by the Company from all sources where applicable. Such cost shall include not only the purchase cost of natural gas, but shall also include all reasonable costs for services such as gathering, treating, processing, transportation, capacity and/or supply reservation, applicable line loss charges, storage, balancing including penalties, swing services, and any other related costs and expenses necessary for the movement of gas to the Company`s city gate delivery points and customers. The Cost of Purchased Gas may also include costs related to the purchase and transportation of Renewable Natural Gas (RNG). The Cost of Purchased Gas shall also include the cost of gas withdrawn from storage and shall include gains and losses from the utilization of natural gas financial instruments that are executed by the Company for the purpose of mitigating price volatility. Companies affiliated with, or sharing services with, the Company shall not be allowed to charge fees for transactions related to natural gas financial instruments utilized for purposes in this Cost of Gas Clause and hence cannot realize a profit in this regard. 4. Customer Rate Relief Component - The rate per billing unit charged in accordance with and specified on Rate Schedule CRR, the Customer Rate Relief Rate Schedule, which is a non-bypassable charge as defined in Tex. Util. Code 104.362(7). 5. Reconciliation Component - The amount to be returned to or recovered from sales customers each month from October through June as a result of the Reconciliation Audit. 6. Reconciliation Audit - An annual review of the Company`s books and records for each 12-month period ending with the production month of June to determine the amount of over or under collection occurring during such 12-month period. The audit shall determine: (a) the total amount paid for gas purchased by the Company (per Section B(3) above) to provide service to its sales customers during the period, including gains or losses on the use of natural gas financial instruments; (b) the revenues received from operation of the provisions of this Cost of Gas Clause reduced by the amount of revenue associated fees (including franchise fees) and taxes paid by the Company on those revenues; (c) the total amount of surcharges or refunds made to sales customers during the period and any other revenues or credits received by the Company as a result of relevant gas purchases or operation of this Cost of Gas Clause; (d) the total amount accrued for imbalances under the transportation rate schedule(s) net of fees and applicable taxes; (e) the total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, to remove lost and unaccounted for gas costs during the period for volumes in excess of 5 percent of purchases. 7. Purchase/Sales Ratio - A ratio determined by dividing the total volumes purchased for sales customers during the 12-month period ending June 30 by the sum of the sales volumes sold to sales customers. For the purpose of this computation all volumes shall be stated at 14.65 psia. Such ratio as determined shall in no event exceed 1.0526 i.e. 1/(1 - 0.05) unless expressly authorized by the applicable Regulatory Authority. 8. RNG is the term used to describe pipeline-quality biogas produced from various biomass sources through a biochemical process that has been processed to purity

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

standards and is interchangeable with conventional natural gas.
9. Reconciliation Account - The account maintained by the Company to assure that over time it will neither over nor under collect revenues as a result of the operation of the Cost of Gas Clause. Entries shall be made monthly to reflect: (a) the total amounts paid to the Company`s supplier(s) for gas applicable to sales customers as recorded on the Company`s books and records (per Section B(3) above), including gains or losses on the use of natural gas financial instruments; (b) the revenues produced by the operation of this Cost of Gas Clause reduced by the amount of fees (including franchise fees) and taxes; (c) refunds, payments, or charges provided for herein or as approved by the Regulatory Authority; (d) amounts accrued pursuant to the treatment of imbalances under any transportation rate schedule(s), (e) total amount of Uncollectible Cost of Gas during the period; and (f) an adjustment, if necessary, for lost and unaccounted for gas during the period in excess of 5 percent of purchases.
10. Uncollectible Cost of Gas ` The amounts actually written off after the effective date of this rate schedule related to cost of gas will be tracked along with any subsequent recovery/credits related to the Cost of Gas Clause. Annually the charge offs minus recoveries will be included in the annual reconciliation and factored into the resulting Reconciliation Component.

C. COST OF GAS In addition to the cost of service as provided under its gas sales rate schedules, the Company shall bill each sales customer for the Cost of Gas incurred during the billing period. The Cost of Gas shall be clearly identified on each customer bill.

D. DETERMINATION AND APPLICATION OF THE RECONCILIATION COMPONENT If the Reconciliation Audit reflects either an over-recovery or under-recovery of revenues, such amount, plus or minus the amount of interest calculated pursuant to Section E below, if any, shall be divided by the sales volumes, adjusted for the effects of weather, growth, and conservation for the period beginning with the October billing cycle through the June billing cycle preceding the filing of the Reconciliation Audit. The Reconciliation Component so determined to collect any revenue shortfall or to return any excess revenue shall be applied, subject to refund, for a 9 month period beginning with the October billing cycle and continuing through the next June billing cycle at which time it will terminate.

E. INTEREST ON FUNDS Concurrently with the Reconciliation Audit, the Company shall determine the amount by which the Cost of Gas was over or under collected for each month within the period of audit. The Company shall debit or credit to the Reconciliation Account for each month of the reconciliation period: (1) an amount equal to the outstanding over collected balance multiplied by interest of 6 percent per annum compounded monthly; or (2) an amount equal to the outstanding under collected balance multiplied by interest of 6 percent per annum compounded monthly. The Company shall also be allowed to recover a carrying charge calculated based on the arithmetic average of the beginning and ending balance of gas in storage inventory for the prior calendar month times the authorized rate of return.

TARIFF CODE: DS **RRC TARIFF NO:** 34267

RATE SCHEDULE

SCHEDULE ID **DESCRIPTION**

F. SURCHARGE OR REFUND PROCEDURES In the event that the rates and charges of the Company`s supplier are retroactively reduced and a refund of any previous payments is made to the Company, the Company shall make a similar refund to its sales customers. Similarly, the Company may surcharge its sales customers for retroactive payments made for gas previously delivered into the system. Any surcharge or refund amount will be included in the Reconciliation Account. Refunds or charges shall be entered into the Reconciliation Account as they are collected from or returned to the customers. For the purpose of this Section F, the entry shall be made on the same basis used to determine the refund or charge component of the Cost of Gas and shall be subject to the calculation set forth in Section (E) Interest on Funds, above.

G. COST OF GAS STATEMENT The Company shall file a Cost of Gas Statement with the Regulatory Authority by the beginning of each billing month. The Cost of Gas Statement shall set forth: (a) the estimated Cost of Purchased Gas; (b) that cost multiplied by the Purchase/Sales Ratio; (c) the amount of the Cost of Gas caused by any surcharge or refund; (d) the Customer Rate Relief Component; (e) the Reconciliation Component; (f) the revenue associated fees (including franchise fees) and taxes to be applied to revenues generated by the Cost of Gas; (g) the Cost of Gas calculation, including gains and losses from hedging activities for the month; and (h) the beginning and ending date of the billing period. The statement shall include all data necessary for the Regulatory Authority to review and verify the calculations of the Cost of Gas. The Company shall include in its monthly Cost of Gas Statement filed pursuant to the Cost of Gas Clause the separate cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas.

H. ANNUAL RECONCILIATION REPORT The Company shall file an Annual Reconciliation Report with the Regulatory Authority which shall include but not necessarily be limited to:
1. A tabulation of volumes of gas purchased and costs incurred listed by account or type of gas, supplier and source including but not limited to the purchase cost of natural gas, renewable gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas, by month for the 12 months ending June 30.
2. A tabulation of gas units sold to sales customers and related Cost of Gas Clause revenues.
3. A tabulation of all other costs and refunds made during the year and their effect on the Cost of Gas Clause to date.
4. A description of the hedging activities conducted each month during the 12 months ending June 30, including the types of transaction used, resulting gains and losses, any changes in the hedging program implemented during the period and the rationale for the changes. The report should include the customer impact of hedging activities stated as costs to the average residential and commercial customer during the period.
5. A description of the imbalance payments made to and received from the Companys transportation customers within the service area, including monthly imbalances

SCHEDULE ID	DESCRIPTION
	incurred, the monthly imbalances resolved, and the amount of the cumulative imbalance. The description should reflect the system imbalance and imbalance amount for each supplier using the Companys distribution system during the reconciliation period. 6. A tabulation of Uncollectible Cost of Gas during the period and its effect on the Cost of Gas Clause to date. 7. A tabulation of cost of each type of purchased gas, including but not limited to the purchase cost of natural gas, renewable natural gas, hydrogen, and any other type of gas included in the Cost of Purchased Gas. This report shall be filed concurrently with the Cost of Gas Statement for October. If the Regulatory Authority thereafter determines that an adjustment to the Reconciliation Component is required, such adjustment shall be included in the Reconciliation Component for the next annual Reconciliation Audit following the date of such determination. CURTAILMENT PLAN

PLAN ID	DESCRIPTION
7455	Texas Gas Service Company, a Division of ONE Gas, Inc. Curtailment Plan All Service Areas Texas Administrative Code TITLE 16 ECONOMIC REGULATION PART 1 RAILROAD COMMISSION OF TEXAS CHAPTER 7 GAS SERVICES SUBCHAPTER D CUSTOMER SERVICE AND PROTECTION RULE Section7.455 Curtailment Standards (a) Definitions. The following words and terms, when used in this section, shall have the following meanings, unless the context clearly indicates otherwise. (1) Balancing authority--The Electric Reliability Council of Texas or other responsible entity that integrates resource plans ahead of time, maintains electricity demand and resource balance within a balancing authority area, and supports interconnection frequency in real time for a power region in Texas. (2) Commission--The Railroad Commission of Texas. (3) Curtailment event--When a gas utility determines that its ability to deliver gas may become inadequate to support continuous service to firm customers on its system and it reduces deliveries to one or more firm customers. For the purposes of this section, an interruption of delivery or service to interruptible gas customers does not constitute a curtailment event. Prior to reducing deliveries to one or more firm customers, a gas utility interrupts deliveries to interruptible customers pursuant to mutually agreed upon contracts and/or tariffs. (4) Electric generation facilities--Facilities registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and backup power systems. (5) Firm or firm deliveries--Natural gas deliveries that are described as firm under a contract or tariff. (6) Gas utility--An entity that operates a natural gas transmission pipeline system or a local distribution company that is subject to the Commission's jurisdiction as defined in Texas Utilities Code, Title 3. (7) Human needs customers--Residences, hospitals, water and wastewater facilities, police, fire, military and civil defense facilities, and locations where people may congregate in an emergency such as schools and places of worship. A human needs customer also includes small commercial customers that cannot practicably be curtailed without curtailing human needs. (8) Interruptible or interruptible deliveries--Natural gas deliveries that are not described as firm under a contract or tariff. (b) Applicability. This section takes effect on September 1, 2022. This section applies when any gas utility experiences a curtailment event affecting intrastate service on any of its intrastate natural gas pipelines. When a gas utility experiences a curtailment event, the gas utility shall curtail deliveries according to the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan pursuant to subsection (d) of this section. The curtailment priorities in this section apply to sales of natural gas owned by a gas utility and/or deliveries utilizing a gas utility's transportation capacity. The priorities in this section do not apply to sales of gas owned by an entity that is not a gas utility. The term deliveries in this section includes sales and/or transportation service.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

(c) Priorities.

(1) Unless a gas utility has an approved curtailment plan pursuant to subsection (d) of this section, a gas utility shall apply the following priorities in descending order during a curtailment event:

(A) firm deliveries to human needs customers and firm deliveries of natural gas to local distribution systems which serve human needs customers;
(B) firm deliveries to electric generation facilities;
(C) firm deliveries to industrial and commercial users of the minimum natural gas required to prevent physical harm and/or ensure critical safety to the plant facilities, to plant personnel, or the public when such protection cannot be achieved through the use of an alternate fuel;
(D) firm deliveries to small industrials and regular commercial loads that use less than 3,000 Mcf per day;
(E) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material cannot be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed;
(F) firm deliveries to large industrial and commercial users for fuel or as a raw material where an alternate fuel or raw material can be used and operation and plant production would be curtailed or shut down completely when natural gas is curtailed; and
(G) firm deliveries to customers that are not covered by the priorities listed in subparagraphs (A) - (F) of this paragraph.

(2) Deliveries to customers within the same priority on the portion of the system which is subject to curtailment shall be curtailed to the extent practicable on a pro rata basis according to scheduled quantities. If a customer's end-use requirements fall under two or more priorities, then such requirements must be treated separately when applying this schedule of priorities to the extent practicable. Transportation customers have equivalent end-use priorities as sales customers.

(3) When applying the priorities of this section, a gas utility may rely on the representations of its customers and/or their end users regarding the nature of customers' deliveries.

(d) Curtailment plans. Order 489 and any curtailment plan approved by the Commission prior to the effective date of this section is superseded by this section. A gas utility may file its own curtailment plan for approval with the Oversight and Safety Division. A gas utility shall follow the priorities listed in subsection (c) of this section unless and until the gas utility has an approved curtailment plan on file with the Commission. The first three priorities in any individual curtailment plan must be consistent with the first three priorities listed in subsection (c)(l)(A) - (C) and (2) of this section. A gas utility shall provide to its customers notice of an application for a curtailment plan. A gas utility shall provide notice on the same day the gas utility files its application with the Commission. The gas utility may provide notice by hand delivery, by first class, certified, registered mail, commercial delivery service, electronic methods, or by such other manner as the Commission may require. The notice shall be in the form prescribed by the Commission. The Oversight and Safety Division may administratively approve the curtailment plan if no request for hearing is filed within thirty days of such notice. The Commission shall set the matter for hearing if it receives a timely request for hearing from a customer of the gas utility.

TARIFF CODE: DS **RRC TARIFF NO:** 34267

(e) Required tariff filings. Within 90 days of the effective date of this section, each gas utility shall electronically file with the Commission, in the manner prescribed by the Commission, tariffs that shall include either:

(1) the curtailment priorities as specified in this section; or
(2) a curtailment plan approved by the Commission as specified in subsection (d) of this section.

(f) Curtailment emergency contact information. Each gas utility shall maintain current curtailment emergency contact information with the Commission and shall submit curtailment emergency contact information on or before November 1 of each year.

LINE EXTENSION POLICY

POLICY ID	DESCRIPTION
1255	Texas Gas Service Company, a Division of ONE Gas, Inc. Central-Gulf Service Area Incorporated and Unincorporated Areas of Austin, Bastrop (environs only), Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero, Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, TX (From Rules of Service effective November 27, 2024) EXTENSION OF FACILITIES 11.1 LINE EXTENSION AND CONSTRUCTION CHARGES a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy. b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation. 11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant. 11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities. 11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES
As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES
The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS
The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS
Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

(the Company) operates as a gas utility under Texas Utilities Code 101.003(7) within the State of Texas. This Tariff applies to all incorporated areas, unincorporated areas and census designated places in the Companys Central-Gulf Service Area comprised of the incorporated and unincorporated areas of Austin, Bayou Vista, Beaumont, Bee Cave, Buda, Cedar Park, Cuero,

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

Dripping Springs, Galveston, Georgetown, Gonzales, Groves, Hutto, Jamaica Beach, Kyle, Lakeway, Lockhart, Luling, Marble Falls, Mustang Ridge, Nederland, Nixon, Pflugerville, Port Arthur, Port Neches, Rollingwood, Shiner, Sunset Valley, West Lake Hills, and Yoakum, and the environs of Bastrop, Texas. Service under this Tariff is subject to the original jurisdiction of the municipalities in the Central-Gulf Service Area and the Railroad Commission of Texas. The Company will provide service to any person and/or business within its service area in accordance with the rates, terms and conditions provided for in its Tariff and regulations.

1.2 RATE SCHEDULES All Customers shall be served under rate schedules filed with the municipality or Railroad Commission of Texas. Customers shall be assigned to rate schedules in accordance with the class of the particular Customer, the usage which will be made of the gas and that Customers volume requirements. The Company shall advise an Applicant or Customer regarding the most economical rate for their usage if more than one rate is applicable. A Customer assigned to a rate schedule shall remain on that schedule for a minimum of one year except that an assignment made in error may be corrected immediately. In the event of a question regarding the Customers classification, the questions shall be resolved by reference to the coding of the Customers primary business in the latest edition of the Standard Industrial Classification Manual of the United States Governments Office of Management and Budget.

1.3 DEFINITIONS The following definitions shall apply to the indicated words as used in this Tariff:

Adder: Shall mean the Companys incremental cost to purchase natural gas.

Aggregation Areas: Shall mean aggregation pools established by the Company within geographic, operational, administrative, and/or other appropriate parameters, for the purposes of nominating and imbalances. Agricultural Service: Service to Consumers engaged in agricultural production.

Applicant: Any person, organization or group of persons or organizations making a formal request either orally or in writing for gas service from the Company.

Automated Meter Reading (AMR): The process of remotely reading a gas meter.

Average Day Usage: The gas demand of a given Customer for gas in any one month divided by 30. Gas demand is considered to be equivalent to consumption during each billing month, provided however, that when service has been curtailed, demand shall be considered to be actual consumption plus estimated curtailment during the period.

Blanket Builder: A builder or someone acting for a builder who requests the installation of service lines.

Btu: Shall mean British thermal unit(s) and shall be computed on a temperature base of sixty degrees (60) Fahrenheit and at the standard pressure base of the applicable service area and on a gross-real-dry basis and shall not be corrected for real water vapor as obtained by means commonly acceptable to the industry, and MMBtu shall mean one million (1,000,000) Btu.

Commercial Service: Service to Consumers engaged primarily in the sale or furnishing of goods and services and any usage not otherwise provided for.

Commission or The Commission: The Railroad Commission of Texas.

Company: Texas Gas Service Company, a Division of ONE Gas, Inc.

Consumer: Any person or organization receiving gas service from the Company for his or her own appliances or equipment whether or not the gas is billed directly to him or her. (For example, a rental unit where the utilities are part of the rent, the landlord is a Customer and the tenant is a Consumer.)

Consumption Period: Shall mean a volumetric billing period.

Cumulative Tolerance Limit: Shall mean the percent of aggregate historical annual deliveries of a Qualified Suppliers Aggregation Area pool of customers for the most recent year ended on June 30. The Company, at its sole discretion, may make adjustments to the Cumulative

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

Tolerance Limit.
Customer: Any person or organization now being billed for gas service whether used by him or her, or by others.
Day or Gas Day: Shall mean the 24-hour period commencing at 9:00 a.m. (Central Standard Time) on one calendar day and ending at 9:00 a.m. (Central Standard Time) the following calendar day.
Dekatherm (Dth): Shall mean 1,000,000 Btus (1 MMBtu). This unit will be on a dry basis.
Domestic Service: Service to any Consumer which consists of gas service used directly for heating, air conditioning, cooking, water heating and similar purposes whether in a single or multiple dwelling unit. Electric Generation Service: Service to customers operating electric generation assets and that are registered with the applicable balancing authority including bulk power system assets, co-generation facilities, distributed generation, and/or backup power systems. This service may also be provided to those known Customers who use thermal energy to produce electricity with recapture of by-product heat in the form of steam, exhaust heat, etc. for industrial process use, space heating, food processing or other purposes.
Electronic Document: Any document sent electronically via email or the internet.
Electronic Flow Measurement (EFM): An electronic means of obtaining readings on a gas meter.
Electronic Fund Transfer (EFT): The process to convert a paper check or electronic bill payment request to an electronic transfer. Paper checks received by Company or their agents are destroyed.
Electronic Radio Transponder (ERT): A device that assists with remotely reading a gas meter.
Excess Flow Valve (EFV): A safety device installed on a natural gas service line. The EFV is designed to automatically shut off the flow of natural gas in the service line and mitigate the impact of a significant break, puncture or severance in the line. EFVs are not designed to shut off the flow of gas in the line breaks at the connection of a gas appliance in a residence or in the customers piping system (interior or exterior) on the customers side of the gas meter.
Expedited Service: Customer request for same day service or service during non-business hours for connection or reconnection of gas service.
Firm Service: Services offered to Customers (regardless of service class) under schedules or contracts that anticipate no interruptions. Service may be interrupted or curtailed at the discretion of the Company during Force Majeure events or at the direction of a regulatory or government agency.
Force Majeure: If either Company or Customer is rendered unable, wholly or in part, by reason of force majeure or any other cause of any kind not reasonably within its control, other than financial, to perform or comply with their obligations hereunder, then such party`s obligations or conditions shall be suspended during the continuance of such inability and such party shall be relieved of liability for any damage or loss for failure to perform the same during such period; provided, however, obligations to make payments when due hereunder shall not be suspended. The term Force Majeure as used herein means acts of God; strikes, lockouts, or other industrial disturbances; acts of the public enemy; wars; blockades; insurrections; riots; epidemics; pandemics; landslides; lightning; earthquakes; fires; storms; floods; washouts; arrests and restraints of the government, or any agency thereof, either federal or state, civil or military; civil disturbances; explosions; breakage or accident to machinery or lines of pipe; freezing of wells or lines of pipe; shortage of gas supply, whether resulting from inability or failure of a supplier to deliver gas; partial or entire failure of natural gas wells or gas supply; depletion of gas reserves; mandatory testing or maintenance necessary for compliance and safe operation, and any other causes, whether of the kind herein enumerated or otherwise. If due to a Force Majeure the Company curtails or temporarily discontinues the receipt or delivery of Gas hereunder, Customer agrees to hold Company harmless from any loss,

claim, damage, or expense that Customer may incur by reason of such curtailment or discontinuance.
Gas or Natural Gas: Shall mean the effluent vapor stream in its natural, gaseous state, including gas-well gas, casing head gas, residue gas resulting from processing both casing head gas and gas-well gas, and all other hydrocarbon and non-hydrocarbon components thereof.
General Rate Schedule: A rate schedule available to all Customers of the appropriate class or classes for usages indicated therein.
Industrial Service: Service to Consumers engaged primarily in a process which changes raw or unfinished materials into another form of product. This classification shall embrace all Consumers included in Division A (except Major Groups 01 and 02) and Division D of the Standard Industrial Classification Manual.
Irrigation or Irrigation Pumping Service: (SIC Division A - Major Group 01) who use gas for operating engine-driven pumping equipment.
Master Meter: A single large volume gas measurement device by which gas is metered and sold to a single purchaser who distributes the gas to one or more additional persons downstream from that meter. Master meter operators shall comply with the minimum safety standards in 49 CFR Part 192.
Mcf: Shall mean one thousand (1,000) cubic feet of Gas.
Month: Shall mean the period beginning at 9:00 a.m. Central Standard Time on the first Day of each calendar month and ending at 9:00 a.m. Central Standard Time on the first Day of the next succeeding calendar month.
Monthly Tolerance Limit: Shall mean five percent (5%) of the aggregate deliveries for a Qualified Suppliers Aggregation Area pool of customers for such month.
Optional Rate Schedule: A General Rate Schedule which may be selected by a Customer in lieu of another general schedule but which may require installation of special equipment.
Overtime Rate: The fee charged by the Company to perform work outside its normal business hours or on holidays and includes changes to previously scheduled work that must be performed outside the Companys normal business hours.
Payment in Kind (PIK): Shall mean a reimbursement for lost and unaccounted for gas.
PDA: Shall mean a predetermined allocation method.
Pipeline System: Shall mean the current existing utility distribution facilities of the Company located in the State of Texas.
Point of Delivery: Shall mean the point or points where gas is delivered from the Pipeline System to Customer.
Point of Receipt: Shall mean the point or points where the Company shall receive Gas into the Pipeline System from Customer.
Point Operator: Shall mean the person or entity that controls the Point of Receipt or Point of Delivery.
Qualified Supplier: Shall mean an approved supplier of natural gas for transportation to customers through the Companys pipeline system.
Regulatory Authority: The City Council or equivalent municipal governing body of each respective city in the Central-Gulf Service Area, or the Railroad Commission of Texas, as applicable.
Service Area: The area receiving gas utility service provided by the Company under the terms of this Tariff.
Special Rate Schedule: A rate schedule designed for a specific Customer.
System: Any group of interconnected pipelines and appurtenances owned or operated by the Company and independent from any other such group of facilities.
Tariff: Shall mean every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the regulatory authorities or agencies

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

having jurisdiction over the Company or the services provided hereunder.
Temporary Service: Any service which will not be utilized continuously at the same location for a period of two or more years.
Transportation Form: Shall mean the Company approved selection of transportation service document.
Transportation Rate Schedule: A rate schedule designed for service to any Customer for the transportation of Customer-owned natural gas through the Companys distribution system.
Transportation Service: The transportation by the Company of natural gas owned by someone other than the Company through the Companys distribution system.
Week: Shall mean a period of seven (7) consecutive Days beginning at 9:00 a.m. Central Standard Time on each Monday and ending at the same time on the next succeeding Monday.
Year: Shall mean a period of three hundred sixty-five (365) consecutive Days, or three hundred sixty-six (366) consecutive Days when such period includes a February 29.

SECTION 2. [Reserved for future rules]

SECTION 3.
RATES AND UTILITY CHARGES Current Rate Schedules are on file with each applicable Regulatory Authority and available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

SECTION 4 `
CONDITIONS OF SERVICE
4.1 PROVISION OF SERVICE The Company will provide gas service to any person or organization located within the Central-Gulf Service Area from the Companys facilities or in certain cases, the facilities of its supplier, in accordance with the provisions of this Tariff and other applicable Rate Schedules. The Customer shall make or procure, and hereby agrees to make or procure, conveyance to the Company of perpetual right-of-way across the property owned or controlled by the Customer that is required to install natural gas facilities and is in a location and condition satisfactory to the Company, provides clear access to Companys facilities, and enables the Company to provide service to Customers property or the premises of the Consumer.
4.2 FEES AND CHARGES All fees and charges assessed by the Company to provide and maintain utility services are as provided for in this Tariff. If the Customer elects transportation service, the commodity cost of gas shall be determined between the Customer and the Customers selected supplier.
4.3 RESALE OF GAS Gas delivered by the Company shall not be redelivered or resold for the use thereof by others unless otherwise expressly agreed to in writing by the Company; provided, however, that those Customers receiving gas for redistribution to the Customers tenants may separately meter each tenants distribution point for the purpose of prorating the Customers actual amount of gas delivered among the various tenants on a per unit basis.
4.4 CONTINUITY OF SERVICE
a) Service interruptions i) The Company shall make all reasonable efforts to prevent interruptions of Firm Service. When interruptions occur, the Company shall re-establish service within the shortest possible time consistent with prudent operating principles so that the smallest number of Customers are affected. ii) The Company shall make reasonable provisions to meet emergencies resulting from failure of service and shall issue instructions to its employees covering procedures to be followed in the event of an emergency in order to prevent or mitigate interruption or impairment of service. iii) In the event of a national emergency or local disaster resulting in disruption of normal service, the Company may, in the

public interest, interrupt service to other Customers to provide necessary service to civil defense or other emergency service agencies on a temporary basis until normal service to these agencies can be restored. iv) Curtailment of Firm Service will be done in accordance with Texas Administrative Code Title 16, Part 1, Chapter 7, Subchapter D, Rule 7.455 Curtailment Standards.

b) Record of interruption. Except for momentary interruptions which do not cause a major disruption of service, the Company shall keep a complete record of all interruptions, both emergency and scheduled. This record shall show the cause of interruptions, date, time duration, location, approximate number of Customers affected, and, in cases of emergency interruptions, the remedy and steps taken to prevent recurrence, if applicable. Report to Railroad Commission of Texas. The Commission shall be notified in writing within 48 hours of interruptions in service affecting the entire system or any major division thereof lasting more than four hours. The notice shall also state the Companys belief as to the cause of such interruptions. If any service interruption is reported to the Commission otherwise (for example, as a curtailment report or safety report), such other report is sufficient to comply with the terms of this Section.

c) The Company does not guarantee uninterrupted service to any Customer and shall not be liable for damages resulting from any loss of service to any Customer.

4.5 AVAILABILITY OF TARIFFS A copy of this Tariff and other Rate Schedules can be requested through TGSs customer service number at 1-800-700-2443 (non-emergency number) or requested under the Contact Us section of www.texasgasservice.com and are available on the Company`s website at https://www.texasgasservice.com/rateinformation/home.

4.6 CUSTOMER INFORMATION The Company shall:

a) Maintain a current set of maps showing the physical locations of its facilities. All distribution facilities shall be labeled to indicate the size or any pertinent information which will accurately describe the Company`s facilities. These maps, or such other maps as may be required by the Regulatory Authority, shall be kept by the Company in a central location and will be available for inspection by the Regulatory Authority during normal working hours. Each business office or service center shall have available up-to-date maps, plans or records of its immediate area, with such other information as may be necessary to enable the Company to advise applicants and others entitled to the information as to the facilities available for serving that locality;

b) Assist the Customer or Applicant in selecting the most economical rate schedule;

c) In compliance with applicable law or regulations, notify customers affected by a change in rates or schedule or classification;

d) Post a notice in a conspicuous place in each business office of the utility where applications for service are received informing the public that copies of the rate schedules and rules relating to the service of the utility as filed with the Commission are available for inspection;

e) Upon request inform its customers as to the method of reading meters;

f) Make available, during normal business hours, such additional information on rates and services as any Customer or Applicant may reasonably request; and

g) Provide to new customers, at the time service is initiated or as an insert in the first billing, a pamphlet or information packet containing the following information. The Company may provide this notification to customers electronically. This information shall be provided in English and Spanish as necessary to adequately inform the customers; provided, however, the Regulatory Authority upon application and a showing of good cause may exempt the Company from the requirement that the information be provided in Spanish: i) the Customer`s right to information concerning rates and services and the Customer`s right to inspect or obtain at reproduction cost a copy of the applicable tariffs and service rules; ii) the Customer`s

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

right to have their meter checked without charge under Section (7) of the Commission`s Rule 7.45, if applicable; iii) the time allowed to pay outstanding bills; iv) grounds for termination of service; v) the steps the Company must take before terminating service; vi) how the Customer can resolve billing disputes with the Company and how disputes and health emergencies may affect termination of service; vii) information on alternative payment plans offered by the Company; viii) the steps necessary to have service reconnected after involuntary termination; ix) the appropriate Regulatory Authority with whom to register a complaint and how to contact such authority; x) the hours, addresses and telephone numbers of utility offices where bills may be paid and information may be obtained; and xi) the Customer`s right to be instructed by the Company how to read their meter.
h) At least once each calendar year, the Company shall notify Customers that information is available upon request, at no charge to the Customer, concerning the items listed in subsection (g) above. This notice may be accomplished by use of a billing insert or a printed statement upon the bill itself. The Company may provide this notification to Customers electronically.

4.7 CUSTOMER COMPLAINTS Upon complaint to the Company by residential or small commercial customers either at its office, by letter, by telephone or by email, the Company shall promptly make a suitable investigation and advise the complainant of the results thereof. The Company shall keep a record of all complaints which shall show the name and address of the complainant, the date and nature of the complaint, and the adjustment or disposition thereof for a period of one year subsequent to the final disposition of the complaint.

4.8 COMPANY RESPONSE Upon receipt of a complaint, either by letter, by telephone or by email from the Regulatory Authority on behalf of a customer, the utility shall make a suitable investigation and advise the Regulatory Authority and complainant of the results thereof. An initial response must be made by the next working day. The Company must make a final and complete response within 15 days from the date of the complaint, unless additional time is granted within the 15-day period. The Commission encourages all customer complaints to be made in writing to assist the regulatory authority in maintaining records of the quality of service of the Company; however, telephone communications will be acceptable.

4.9 LIMITATION OF LIABILITY THE CUSTOMER ASSUMES ALL RESPONSIBILITY FOR ALL FACILITIES AND THEIR INSTALLATION, MAINTENANCE, OPERATION, FUNCTIONALITY, TESTING AND CONDITION THEREOF ON THE CUSTOMERS SIDE OF THE POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISES OF THE CONSUMER, AS DEFINED IN SECTION 12.11. THE COMPANY IS NOT LIABLE TO A CUSTOMER, AND CUSTOMER SHALL INDEMNIFY, HOLD HARMLESS, AND DEFEND THE COMPANY AND ITS EMPLOYEES OR AGENTS FROM ANY AND ALL CLAIMS OR LIABILITY FOR DAMAGES OF ANY KIND OR NATURE INCLUDING, BUT NOT LIMITED TO, PERSONAL INJURY, DAMAGE TO PROPERTY, ANY INCIDENTAL, CONSEQUENTIAL, BUSINESS INTERRUPTION, OR OTHER ECONOMIC OR OTHER DAMAGES OR LOSSES IN ANY MANNER DIRECTLY, INDIRECTLY OR ARISING FROM, OR CAUSED BY ACTS OR OMISSIONS OF ANY PERSON OR PARTY ON THE CUSTOMER`S SIDE OF SAID POINT OF DELIVERY OF GAS TO THE PROPERTY OF THE CUSTOMER OR TO THE PREMISE OF THE CONSUMER, AS DEFINED IN SECTION 12.11. The Company shall be liable to the Customer or Consumer only for personal injury or property damages directly caused by the negligent acts or omissions of the Company or its employees occurring on the Companys side of the point of delivery. The Company shall not be liable or responsible for damages of any kind or nature including, but not limited to, personal injury, property damages, or any other loss or damages arising from or caused by the acts or conduct, negligence or intentional act or omission of any person, other than an employee of the Company, who adjusts, repairs, disconnects, changes, alters, or tampers with the Companys meter or facilities in any way. In

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

no event shall the Company or its employees be liable for any indirect, incidental, consequential, business interruption, or other economic damages or losses of Customer, Consumer, or third parties including, but not limited to, lost time, lost money, lost profits, or out of pocket expenses whether in contract, tort, or otherwise, and whether such damages are seen or unforeseen in any manner, directly or indirectly, arising from, caused by, or growing out of the interruption or termination of gas utility service. If Company becomes unable to provide gas utility service, either wholly or in part, by an event of Force Majeure, the obligations affected by the event of Force Majeure will be suspended only during the continuance of that inability. Company will remedy its inability to provide gas utility service as soon as possible.

SECTION 5 `
INITIATION OF SERVICE

5.1 REGULAR SERVICE Application for service can be made by telephone or through the internet. Each Applicant must comply with the appropriate requirements of this Tariff before service shall be instituted. No written agreement shall be required for residential service under the standard provisions of this Tariff; commencement of service by the Company and the use of gas service by the Customer shall be evidence of such agreement. Any Customer requesting service under any special provision of this Tariff must execute a written agreement for service in the form prescribed by the Company designating those provisions which shall apply. Each Applicant may be required to produce two forms of verifiable identification; one being a government-issued identification card bearing a photograph of Applicant; and verifiable proof of their right to occupy a specific service address as of a specific date of occupancy.

5.2 RESPONSE TO REQUEST FOR SERVICE Every gas utility must serve each qualified applicant for service within its service area as rapidly as practical. As a general policy, those applications not involving line extensions or new facilities should be filled within seven (7) working days. Those applications for individual residential service requiring line extensions should be filled within 90 days unless unavailability of materials or other causes beyond the control of the Company result in unavoidable delays. In the event the residential service is delayed in excess of 90 days after an applicant has met credit requirements and made satisfactory arrangements for payment of any required construction charges, a report must be made to the Regulatory Authority listing the name of the applicant, location and cause for delay. Unless such delays are due to causes which are reasonably beyond the control of the utility, a delay in excess of 90 days may be found to constitute a refusal to serve.

5.3 SPECIAL CONTRACTS Under certain special conditions, the Company may agree to rates, terms or conditions of service other than those provided in this Tariff. Such service must be established under the terms of a special contract or service agreement. To the extent that the provisions of any special contract are at variance with this Tariff, the provisions of the contract shall apply.

5.4 TEMPORARY SERVICE Temporary Service shall be furnished under the same rate schedules applicable to regular service of a similar kind.

5.5 FEES AND CHARGES The Company shall charge a non-refundable fee to each Applicant to compensate for the cost involved in initiation or reconnection of service or when service is transferred from one name to another at any location, or whenever a meter is reset or relocated on the same premises at the request of the Customer, all as specified in Section 15

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

of this Tariff. Whenever the Applicant requests expedited service, the Company will accomplish the work as expeditiously as possible and the Customer will be charged at the Companys approved rate for service work. Expedited service and the charges therefore shall be made only on request of the Applicant. Whenever service is furnished from the facilities of a third party and the Company must pay any special fees to that third party, the Company may, at its option, pass that charge plus 20% for handling through to the Applicant requesting service. See Section 15 relating to fees.

SECTION 6 ` REFUSAL OF SERVICE 6.1 COMPLIANCE BY APPLICANT The Company may decline to serve an Applicant for whom service is available from previously installed facilities until such Applicant has complied with the state and municipal regulations and approved rules and regulations of the Company on file with the Commission governing the service applied for or for the following reasons: a) If the Applicant`s installation or equipment is known to be hazardous or of such character that satisfactory and safe service cannot be given. The existence of an unsafe condition, such as a leak in the Applicant`s piping system, shall be in the Company`s sole opinion of endangerment to life or property; b) If the Applicant is indebted to the Company for the same kind of service as that applied for; provided, however, that in the event the indebtedness of the Applicant for service is in dispute, the Applicant shall be served upon complying with the applicable deposit requirement; c) For refusal to make a deposit if Applicant is required to make a deposit under this Tariff; d) Failure to pay fees, advances or contributions required for service under this Tariff; e) Delinquency in payment for gas service by another occupant if that person still resides at the premises to be served; f) To any Applicant who refuses Company or Companys representatives access to or entry for observation or whose facilities do not comply with the applicable provision of this Tariff. g) Failure of the Applicant to furnish any service or meter location specified for service under this Tariff; or

CGSA-c

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

f) The Company shall not refuse a Customer participation in a deferred payment plan on the basis of race, color, creed, sex, marital status, age, or any other form of discrimination prohibited by law.

9.9 AVERAGE PAYMENT PLAN Any residential Customer or non-residential Customer with annual usage less than 500 Ccf may elect to participate in the Companys Average Payment Plan (APP Plan). The terms, conditions, and other information regarding the Average Payment Plan are set forth herein by reference.

A. TERMS AND CONDITIONS

1. The Average Payment Plan (Plan) is available to residential and qualifying nonresidential customers that have a minimum of six (6) months consumption history available at the premise. Residential and Non-residential customers may request participation in the Plan at any time during the year. Request for participation can be made by telephone or in writing.
2. A customer`s account should be current at the time the customer elects to participate in the Plan and at all times during Plan enrollment, which means the account does not have a previous balance and the current billing is not past due.
3. Service is not available under this Plan for a term of less than twelve (12) months.

B. AVERAGE PAYMENT AMOUNT

1. Each month under the Plan, a customer`s Average Payment Amount will be computed by

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

averaging the amount actually billed to the customer`s account during the last 12 months (current + 11), plus or minus one-twelfth (1/12) of the Average Payment Plan Settlement amount and then rounded to the nearest dollar. In the event 12 months history is not available, Company may estimate the missing months in order to determine the appropriate average payment amount.
2. The Average Payment Amount is identified as a separate item on the gas bill so the participating consumer will know the amount to pay.
3. Gas costs and/or rate changes shall be factored into the monthly average payment calculations on a rolling basis.

SECTION 10 ` FACILITIES AND EQUIPMENT

10.1 STANDARDS OF CONSTRUCTION The Company is to construct, install, operate, and maintain its plant, structures, equipment, and lines in accordance with the provisions of such codes and standards that are generally accepted by the industry as modified by rule or regulation of the Regulatory Authority or otherwise by law, and in such a manner to best accommodate the public and prevent interference with service furnished by other public utilities insofar as practical.

10.2 COMPANY OWNED FACILITIES The Company shall maintain all facilities owned by it and shall be responsible for the safe conduct and handling of the gas until it passes the point of delivery. The Companys representative shall have the right to enter the Customers premises at any reasonable time, in the event of an emergency at any time, to read the meter or make any necessary inspection, repair, adjustment, or replacement of any property owned by the Company. No one other than a Company representative or other person authorized by Company shall be permitted to repair or remove Company`s meter or facilities, or any of the property of Company on or about customer`s premises. Any seals placed by Company on meters or regulators shall not be broken or disturbed by anyone other than authorized representatives of Company. Any unauthorized tampering with Company`s meter or facilities is in violation of this restriction and such tampering shall be considered cause for immediate discontinuance of service by Company.

10.3 CUSTOMER OWNED FACILITIES
a) The Customer shall maintain all facilities owned by them and shall be responsible for the safe conduct and handling of the gas after it passes the point of delivery. Any facilities downstream of the meter installed by the Customer shall remain the property and responsibility of the Customer. Whenever the condition of the facility is such that replacement is required, the work shall be done by the Company pursuant to the provisions of Section 10.8 of this Tariff. New facilities will continue to be installed pursuant to Sections 10.5 and 10.6 of this Tariff.
b) The Customer shall remove, repair or adjust any Customer-owned property which may pose a threat of damage to the property of the Company. The Customer shall take all reasonable means to assure that no one other than an employee of the Company shall adjust, repair, disconnect or change the meter or other Company facilities in any way.
c) Nothing in this Section shall make the Company responsible for the safe upkeep of any Customer or Consumer-owned facilities.
d) In case of loss or damage to the Companys property from the negligence or willful acts of the Customer or Consumer or the Customers or Consumers representatives, the Customer will reimburse the Company for all costs of repairing or replacing the damaged property, including any costs of collection such as attorneys fees.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

10.4 LEAKS The Customer or Consumer shall give the Company notice of any leaking or escaping gas as soon as it is detected. Upon receipt of this notice, the Company shall investigate the matter as promptly as feasible under the circumstances. If the Companys test indicates leakage in the Customers or Consumers facilities, the Company shall have the right to disconnect service immediately until the Customer or Consumer has had the condition corrected. If leakage is found to be from Company owned facilities, the Company shall have the right to disconnect service for a reasonable period of time until the leakage can be corrected by the Company. The Company shall have the right to disconnect service immediately if any of the Customers or Consumers appliances or equipment is, in the Companys opinion, operating in an unsafe manner.

10.5 MATERIALS OR EQUIPMENT FURNISHED BY THE COMPANY a) The Company shall furnish and install at its expense, the service pipe from the Companys existing main to the property line nearest the meter and the equipment related thereto, including meter valve and service regulator. Although affixed to or buried in the Customers property, the entire service line and meter set shall become the property of the Company and shall be operated and maintained by the Company. b) Whenever the meter is located at any point other than the property line, the Company shall determine the estimated cost of that portion of the service between the property line and the meter set. This estimate shall be based on the size and footage to be installed and charged in accordance with Section 11 and other applicable provisions of this Tariff. This estimated amount shall be contributed by the Applicant to the Company before construction, unless the Applicant is a qualified Blanket Builder.

10.6 MATERIALS OR EQUIPMENT FURNISHED BY THE APPLICANT a) The Applicant shall furnish and install at their expense all piping, equipment and appliances required to conduct and utilize the gas furnished by the Company and conversions of existing equipment and appliances required to conduct and utilize the gas furnished by the Company from the outlet of the meter set to the point(s) of utilization and those portions of the service line and meter set not furnished by the Company as described in Section 10.5. b) The adequacy, safety and compliance with applicable codes and ordinances of piping, conversion equipment and appliances shall be the responsibility of the Applicant and no action of the Company in accordance with this Tariff shall release the Applicant of the responsibility for the facilities installed or furnished by them. All piping, installations, and conversion equipment owned by the Applicant shall comply with all applicable federal, state, and county requirements and municipal ordinances, or otherwise, and shall be properly designed for the pressures and volumes to be handled. Where there are none, the most current International Fuel Gas Code shall apply.

10.7 RELOCATION OF COMPANY FACILITIES a) A charge of not more than actual cost may be made for relocating a meter or other Company equipment on the same premises at the request of the Customer or Consumer. b) If the Company shall for its own convenience and not for the safety or convenience of the Customer, change the point of delivery or change the location of its equipment on private property, the Company shall bear the expense.

10.8 REPLACEMENT OF CUSTOMER-OWNED PIPING
a) When repair or replacement of Customer-owned piping becomes necessary due to deterioration of the Companys line, damage to the Companys line (except when caused by Customer or Customers agent), relocation of the Companys distribution main, or for other safety reasons determined by the Company, the Company may relocate the Customers meter to the exterior of the building wall, as close as possible to the existing stub out (where piping exits the structure), and may replace the service piping up to the stub out. The Company will own and be responsible

for all service piping from the main line to the meter, and Customer will own and be responsible for all piping from the meter to the building.
b) The Customer may be billed for all costs of the meter relocate and pipeline replacement.
c) In the absence of any provision contained in a deed of dedication authorizing the Company to install the service piping and meter on Customers premises, the owner of the premises shall execute an agreement establishing the meter location, authorizing the Company to install or replace the line, and granting Company access for such work. If the Customer or owner of the premises refuses to give Company personnel or Company authorized personnel appropriate access to the property for purposes of installation, the Customer will retain responsibility for their facilities and shall bear the expense of any replacement or repairs.

SECTION 11 ` EXTENSION OF FACILITIES

11.1 LINE EXTENSION AND CONSTRUCTION CHARGES
a) Every utility must file its extension policy. The policy must be consistent, nondiscriminatory, and is subject to the approval of the Regulatory Authority. No contribution in aid of construction may be required of any customer except as provided for in the extension policy.
b) The Company shall install the necessary facilities to provide service to Applicants whose premises are located beyond the Companys existing distribution facilities in accordance with the provisions of this Section. The expenditure for such extensions must either be cost justified or the Applicant(s) and Company must mutually agree to terms that justify the installation.

11.2 DESIGN AND COST OF FACILITIES As soon as practical after a completed application for service is received, the Company shall determine the extent of the facilities required to serve the new customer and the cost thereof. This cost shall include all amounts to be spent for system improvements necessary to deliver the required gas, in accordance with the Companys current practice. Whenever the Company chooses to install facilities of greater capacity than would be required to serve the new customer for which the application is being made or to permit supply from another source, the estimate of costs shall be based on only the size and capacity normally used to serve requirements similar to that of the Applicant.

11.3 ALLOWANCE FOR NEW BUSINESS The Company shall also determine the number of existing permanent Customers located along the route of the extension expected to be served therefrom. To be included, the occupant of each premise must request service and demonstrate capability for using such service through a major gas burning appliance. Single or groups of individually owned mobile homes shall be included only if the wheels and hitch have been removed from each mobile home and/or substantial improvements have been made to the property. Mobile home parks may be served either through a master meter or individual meters served by a Company-owned system, provided that required mains can be installed and dedicated streets or rights-of-way have been provided to the Company for installation of facilities as evidenced by agreement executed on the Companys form. An allowance to be determined by the Company may be given for each Customer whose premises exist at the time of application to be served from the proposed main extension. In order to qualify for this allowance, the Customer must file an application and agree to initiate gas service upon completion of the Companys facilities.

11.4 ADVANCES The mutually agreed upon terms will determine the amount of advance required. The Applicant shall have 30 calendar days after notification of the amount required to execute an extension agreement on the Companys form and pay the required advance. At the end of that

time, the Company may revise its estimates to reflect any changes in costs or conditions which will affect the amount of the advance. The Company may waive or reduce collection of any advance based on an economic analysis of the project.

11.5 CONSTRUCTION OF FACILITIES As soon as practical after the advance has been paid or it has been determined that no advance will be required, the Company shall begin construction of the required facilities and thereafter prosecute the work with reasonable diligence. The Company shall not be responsible for delays in the construction of the facilities occasioned by events or conditions reasonably beyond the Companys control. Whenever the construction of the new facilities requires the acquisition of rights-of-way across the Applicants(s) land(s), these rights-of-way shall be provided by the Applicant(s) in the Companys name and on its form at no cost to the Company (except for fees involved in the recording of documents).

11.6 REVIEW OF ADVANCES The Company shall review each extension agreement on the first anniversary of the signing of that agreement. Upon the Applicant(s) request if the extension provided for in the agreement has not been installed through no fault of the Company, the agreement shall be considered to be terminated and a complete refund made to the Applicant(s). Once the extension has been installed and service has been initiated, the Company shall thereafter review the extension agreement at its second through fifth execution dates. At each review, the number of Customers then served directly from the extension shall be compared with the number served on the last prior anniversary date. A refund, shall be given for each additional Customer served, based on mutually agreed upon terms provided that the total of the refunds given does not exceed the cost of the extension of facilities.

11.7 REFUND LIMITATIONS The Company may, at its sole option, make a refund at any time. In no case, however, shall a refund be given unless the number of Customers then served is greater than the number for whom refunds have previously been given. No refund shall be given which shall cause the total refunds to be greater than the total amount of the advance. No interest shall be paid on any advance made under the provisions of this Section. At the end of the five-year period, any remaining amount of the advance shall be retained by the Company as a contribution in aid of construction.

11.8 DELIVERY OF REFUNDS Upon Applicant(s) request, when a refund is due, a check in the appropriate amount and a letter setting forth the method of calculation of the refund and the balance remaining un-refunded shall be made to the person or business in whose name the extension agreement is made or to their assignee. If that letter is returned undelivered, the check shall be cancelled and the next review made without regard to that refund. All sums described in this Section which are returned undelivered and remain unclaimed in the Companys possession for a period of six months following expiration of the five-year period of the extension agreement shall be retained by the Company and considered a contribution in aid of construction.

SECTION 12 ` METERS

12.1 METER REQUIREMENTS a) All gas sold by the Company must be charged for by meter measurements, except where otherwise provided for by applicable law, regulation of the Regulatory Authority, or tariff. b) Unless otherwise authorized by the Regulatory Authority, the Company must provide and install and will continue to own and maintain all meters necessary for measurement of gas delivered to its customers. c) The Company may not furnish, set up, or put in use any meter which is not reliable and of a standard type which meets

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

generally accepted industry standards; provided, however, special meters not necessarily conforming to such standard types may be used for investigation, testing, or experimental purposes.

12.2 METER READING Meters shall be read as nearly as may be practical on the same day of each calendar month. Whenever a reading of a general service meter is missed or the meter is not registering, the Company shall estimate the amount of gas used during the period. Such estimates shall be based on either - a) That Customers use of gas during the same period(s) in previous years; b) That Customers normal use of gas during preceding months; or c) The use of a similar Customer for the period missed. If practical, an actual reading shall be made after two consecutive estimated bills. All meters in Special Service shall be read at least once a month. Whenever such a meter fails to register or is misread, the amount of gas used during the preceding period shall be estimated using data applicable to that Special Service Customer only. The Company will make a special reading of any meter upon request and may assess a service charge in accordance with Section 15. The time of the special reading shall be agreed upon with the Customer so that they may be present. If the original reading was in error (subject to consumption between the two readings) the service charge will be refunded to the Customer.

12.3 METER LOCATION The Company shall have the sole right to determine the location of the meter in accordance with the needs of the service. Each Applicant shall furnish and subsequently maintain a suitable location on his or her premises for the Companys meter and related facilities at a point selected by the Company. Meters shall be located where they will be safely accessible for reading and service, adequately ventilated, and not subject to damage. Meters shall not be located within any enclosed area unless the enclosure is solely intended as a meter house or in the Companys opinion, conditions prohibit installation outside. It may be necessary for the Company to install bollards or guard posts around the meters for safety.

12.4 METER RECORDS The Company must keep the following records: a) The Company must keep a record of all its meters, showing the Customer`s address and date of the last test. b) All meter tests must be properly referenced to the meter record provided for therein. The record of each test made on request of a Customer must show the identifying number and constants of the meter, the standard meter and other measuring devices used, the date and kind of test made, by whom made, the error (or percentage of accuracy) at each load tested, and sufficient data to permit verification of all calculations. c) In general, each meter must indicate clearly the units of service for which charge is made to the Customer.

12.5 METER ACCURACY The accuracy limit of all Company meters is established at two percent (2%) fast or slow. Any meter found to be registering outside of the limits of accuracy shall immediately be removed or repaired. As long as the meter is operating within the limits of accuracy, it shall be the conclusive determination as to the quantities of gas delivered to the Customer on whose service it is set.

12.6 PERIODIC TESTS The Company shall make periodic tests of meters, associated devices and instruments to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month, or earlier when the interval is stated in months. The basic periodic test interval shall be no longer than provided for in the manufacturers recommendations, a copy of which is available upon request.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

12.7 ACCESS TO THE METER The Customer shall permit the Company safe access to the meter at all reasonable times for reading thereof and at all reasonable times for reading, maintenance, testing, or replacement of the meter. Upon the Customers failure or refusal to grant such access, the Company may issue a written notice to the Customer, advising them the situation must be corrected and access granted within 5 working days and that failure to do so can result in the disconnection of service and removal of the meter. Additional fees may apply and will be assessed to such Customer as specified in Section 15.

12.8 METER TESTING AT CUSTOMER REQUEST a) The Company must, upon request of a Customer, make a test of the accuracy of the meter serving that Customer. The Company must inform the Customer of the time and place of the test and permit the Customer or his authorized representative to be present if the Customer so desires. If no such test has been performed within the previous four (4) years for the same Customer at the same location, the test is to be performed without charge. If such a test has been performed for the same Customer at the same location within the previous four (4) years, the Company is entitled to charge a fee for the test not to exceed $15 or such other fee for the testing of meters as may be set forth in Section 15 of this Tariff properly on file with the Regulatory Authority. The Customer must be properly informed of the result of any test on a meter that serves him. b) Notwithstanding subsection (a) of this Section, if the meter is found to be more than nominally defective, to either the Customer`s or the Company`s disadvantage, any fee charged for a meter test must be refunded to the Customer. More than nominally defective means a deviation of more than 2.0% from accurate registration.

12.9 BILLING ADJUSTMENTS DUE TO METER ERROR a) If any meter test reveals a meter to be more than nominally defective, the Company must correct previous readings consistent with the inaccuracy found in the meter for the period of either: i) the last six months; or ii) the last test of the meter, whichever is shorter. Any resulting underbillings or overbillings are to be corrected in subsequent bills, unless service is terminated, in which event a monetary adjustment is to be made. This requirement for a correction may be foregone by the Company if the error is to the Company`s disadvantage. b) If a meter is found not to register for any period of time, the Company may make a charge for units used but not metered for a period not to exceed three months previous to the time the meter is found not to be registering. The determination of amounts used but not metered is to be based on consumption during other like periods by the same customer at the same location, when available, and on consumption under similar conditions at the same location or of other similarly situated customers, when not available.

12.10 PROVISIONS FOR SPECIAL SERVICE The following modifications shall apply to the provisions of this Section for all Special Service rate schedules and service under special written agreements: a) Turbine meters shall be tested at least once each calendar year. Orifice meters shall be tested at a minimum: every 6 months for 0-500 Mcf/d; every 3 months for volumes 500-2000 Mcf/d; and every month for volumes 2000 Mcf/d and greater. Should the Customer so elect, tests shall be made in the presence of his or her representative. b) Whenever a meter is found to be registering above or below the limits of accuracy, adjustment of the bill (either up or down) shall be limited to the monthly billing subsequent to the last meter test. The adjustment shall be made upon the basis of the best data available, using the first of the following methods, whichever is most appropriate: i) by using registration of Customers check meter(s); ii) by correcting the error, if the percentage of error is ascertainable by calibration test or mathematical calculation; or iii) by estimating the quantity of gas delivered by comparison with deliveries during the preceding period under

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

similar conditions when accurate registration was obtained.

12.11 POINT OF DELIVERY The point of delivery of gas sold by the Company to the Customer shall be at the outlet side of the Companys meter, provided that in those cases in which the Customer owns a section of the underground pipe between the Customers property line and the meter, the point of delivery shall be at the property line. The title of all gas sold by the Company to the Consumer shall pass from the Company at the point of delivery. The point(s) of delivery and point(s) of redelivery for Transportation Service shall be as provided in the contract entered into between the Customer and the Company.

12.12 CONNECTION TO COMPANY FACILITIES No Consumer shall make any connection or alteration of any kind on any of the Companys facilities upstream of the Companys meter or shall permit any other person to make such connection or alteration.

12.13 MULTIPLE METERS Each Customer or group of Customers located on the same lot or tract of land may be served from a single meter location. The Company may, at its option, permit additional meter locations to simplify installation of facilities or provide better service. Whenever more than one meter location is permitted for the same Customer, the Company shall bill the usage through each meter separately, provided that any combined billings in effect at the time of adoption of this Tariff may be continued until the affected Customer discontinues service or upon order by the Regulatory Authority.

12.14 INDIVIDUALLY METERED SYSTEMS The Company shall not render service to any Customer through a meter not connected to a system owned by the Company or one of the Companys suppliers.

12.15 MASTER METERS The Company shall provide service through a master meter into the piping systems of others to be distributed to more than one Consumer, except when the gas served is resold to those Consumers on either a commodity or separate cost of service basis; provided, however, that those Customers purchasing gas for redistribution to the Customers own tenants only on the Customers premises may separately meter each tenant distribution point for the purpose of prorating the Consumers actual purchase price of gas delivered among the various tenants on a per unit basis, and further provided that the provisions of this Section shall not preclude the Company from supplying natural gas to a third party for resale to the public as fuel for natural gas powered vehicles (NGVs).

SECTION 13 ` GAS MEASUREMENT

13.1 PRESSURE The standard serving and measurement pressure shall be 4 ounces (0.25 psig) or 7 Water Column above the standard atmospheric pressure in the area served. The atmospheric pressure and standard serving pressure determined to be the average in the cities and environs of the Central-Gulf Service Area are listed below.
Cities and their Environs Atmospheric Pressure PSIA Standard Serving Pressure PSIA Austin 14.40 14.65 Bastrop 14.40 14.65 Bayou Vista 14.70 14.95 Beaumont 14.70 14.95 Bee Cave 14.40 14.65 Buda 14.40 14.65 Cedar Park 14.40 14.65 Cuero 14.48 14.73 Dripping Springs 14.40 14.65 Galveston 14.70 14.95 Gonzales 14.48 14.73 Groves 14.70 14.95 Hutto 14.40 14.65 Jamaica Beach 14.70 14.95 Kyle 14.40 14.65 Lakeway 14.40 14.65 Lockhart 14.48 14.73 Luling 14.48 14.73 Marble Falls 14.40 14.65 Mustang Ridge 14.40 14.65 Nederland 14.70 14.95 Nixon 14.48 14.73

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

Pflugerville 14.40 14.65 Port Arthur 14.70 14.95 Port Neches 14.70 14.95 Rollingwood 14.40 14.65 Shiner 14.48 14.73 Sunset Valley 14.40 14.65 Yoakum 14.48 14.73 West Lake Hills 14.40 14.65 The Consumer and the Company may, at the Companys option, agree to a higher serving pressure. Service regulators shall be set as close as practical to the standard serving pressure under a load condition of approximately 10 percent of meter capacity. Increases in serving pressure because of the inadequacy of the Consumers facilities shall not be permitted.

13.2 UNIT OF MEASUREMENT The standard unit of measurement shall be one hundred cubic feet (Ccf). A cubic foot shall be defined as the amount of gas which occupies a volume of one cubic foot at the standard serving pressure and at a temperature of 60 degrees Fahrenheit. Whenever the Company delivers gas at any pressure other than the standard serving pressure, volumes shall be corrected to the standard serving pressure in the manner provided in this Tariff, provided however, that such correction may be made to any other standard provided in the rate schedules or special agreement under which the Customer is served. The Company may, at its sole option, waive the correction of measurement for temperature deviation.

13.3 BILLING UNIT Unless otherwise specified on the rate schedules or by special agreement, Customers shall be billed on the basis of Ccf measured at or corrected to the standard serving pressure. The index of the meter shall be the sole determinant of volumes passing through the meter. Whenever the meter reads directly in hundreds or smaller units, a reading of one-half a billing unit or more (500 Ccf or more) shall be considered a whole billing unit. Readings of less than one-half a unit shall be disregarded for billing. In those cases in which heating value is used as the billing unit, the calculation of the heating value in BTUs shall be made in accordance with Section 13.7 of this Tariff.

13.4 PRESSURE CORRECTION - STANDARD METERING Whenever gas is delivered to any Customer served under a rate schedule which provides for standard metering, the Company shall correct actual volumes measured to volumes which would have been measured if the gas had been delivered at the standard serving pressure. Corrections shall be made by one of the following methods. a) The Company may install pressure or pressure and temperature compensating measurement equipment whenever the cost of this equipment is justified by the volumes served. Such measurements shall be equipped with devices which mechanically or electronically correct the actual measured volumes in accordance with Boyles Law. Variations in actual atmospheric pressure shall not be considered. b) The Company may use factor billing whenever the volumes to be delivered are too small to justify special metering. The factor shall be determined by dividing the actual serving pressure by the standard serving pressure, both expressed in absolute units based on the standard atmospheric pressure in the area as specified in Section 13.1 hereof. This factor shall be applied to the measured volumes to determine the correct number of billing units.

CGSA-d

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service - Central-Gulf Service Area (Continued)

13.5 METERING - SPECIAL POSITIVE DISPLACEMENT Whenever gas is delivered to any Customer served under a rate schedule which provides for special metering and positive displacement or turbine type metering is used, all volumes shall be determined in accordance with the recommendations of the manufacturer of the meter. Meters may be read in actual volumes which shall then be corrected to the standard billing unit or may be furnished with devices designed to correct the actual volumes to the standard billing units. The following criteria shall be used in the correction of volumes or design and calibration of correcting devices.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

a) Pressure correction shall be made in accordance with Boyles Law. Calculations based on pressure reading on a continuously recording chart shall use the average pressure indicated thereon applied to the measured volumes. Correcting devices shall be set at the specified serving pressure and the service regulators shall be adjusted as close to that pressure as practical. Corrections for deviations from Boyles Law (supercompressibility) may be made whenever the volumes delivered justify the cost of making such corrections.
b) The flowing temperature of the gas shall be assumed to be 60 degrees Fahrenheit unless temperature correction is provided. Corrections shall be made in accordance with Charles Law.
c) Whenever a continuously recording instrument is used, the average temperature indicated thereon shall be applied to the measured volumes. The specific gravity of the gas shall be assumed to be the value last indicated by test or reported by the upstream pipeline supplier prior to the installation of the metering facilities. Whenever subsequent reports or test indicate significant changes in gravity, volume calculations shall be changed prospectively to reflect the new gravity.
13.6 METERING - SPECIAL ORIFICE Whenever gas is delivered to any Customer served under a rate schedule with provisions for special metering and orifice metering is used, all volumes shall be determined in accordance with the recommendations for measuring gas contained in the American Gas Associations Gas Measurement Committee Report No. 3, Orifice Metering of Natural Gas (1992), and subsequent revisions thereof. Orifice meter charts shall be calculated using a standard integrating device or other method recognized in the industry. The following criteria shall be used in the correction of volumes or design and calibration of orifice metering:
a) Correction for deviation of gas from Boyles Law shall be made in accordance with Report No. 3.
b) Temperature of gas passing the meter shall be assumed to be 60 degrees Fahrenheit unless suitable equipment has been installed to measure actual flowing temperature. The arithmetical average of the temperature recorded during each meter charge period while the gas is flowing shall be used in the computations of volumes during the period.
c) The standard atmospheric pressure for the area served shall be used for measurement irrespective of any variation in the actual barometric pressure.
d) The specific gravity of the gas shall be assumed to be the value last obtained in a spot test made with a gravity balance, impact type unit or other acceptable method. Tests shall be made as frequently as found necessary to assure accurate measurement.
13.7 BTU MEASUREMENT The heating value of gas for use in billing shall be defined as the gross thermal value of one cubic foot of gas at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit on a dry basis. The number of billing units delivered shall be determined by multiplying the heating value determined in accordance with this Section by the volumes delivered during the period, expressed in the same units and measured at, or corrected to 14.73 psia and 60 degrees Fahrenheit, and multiplying by the factor necessary to convert the heating value/measurement units to the billing units provided in the appropriate rate schedule. The heating value of the gas shall be determined using one of the following methods:
a) Processing a continuous sample of the main stream at the meter location through a recording calorimeter of a standard type;
b) Analysis of gas samples accumulated from the main stream at the meter location in a sample bottle of an approved type; i) passing the sample through a recording calorimeter of a standard type; ii) passing the sample through a flow calorimeter of a standard type; or iii) passing the sample through a chromatograph to determine the chemical composition and calculating the total heating value from the sum of the constituents.
13.8 CUSTOMER-INSTALLED AND OPERATED METERS A Customer may install and operate a meter or any

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

other device to measure gas volumes, pressure, temperature, BTU content or specific gravity downstream of the point of delivery. Unless expressly otherwise agreed to by the Company and Customer, however, the Companys meter and equipment shall be the sole determinant of volumes for Companys billing purposes.

SECTION 14 ` QUALITY OF GAS

14.1 HEATING VALUE Gas delivered to Consumers in all service areas shall have an average gross heating value of at least 900 British Thermal Units per cubic foot measured when saturated with water vapor at a pressure of 14.73 psia and temperature of 60 degrees Fahrenheit. Gas of lesser heating value may be delivered for short periods, provided that the average heating value for the calendar month in which the reduction occurs is equal to or greater than the standard and that the burning characteristics of the gas are not significantly altered.
14.2 CHARACTER OF GAS All gas furnished to Consumers in the Central-Gulf Service Area shall be of merchantable quality suitable for use in standard gas burning appliances. Merchantable quality shall mean that the gas must be commercially free from dust, resins, water and hydrocarbons in liquid form at the pressure and temperature at which the gas is delivered.
14.3 ODORIZATION All gas shall be odorized with a chemical odorant at a sufficient rate to make it readily detectable. Gas containing enough natural odorant as prescribed by the Railroad Commission of Texas need not be odorized unless the odorant level drops below the acceptable level.

SECTION 15 ` SERVICE FEES AND DEPOSIT AMOUNTS

15.1 ADJUSTMENTS TO FEES AND CHARGES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable. All fees and charges (excluding advances, contributions in aid of construction and deposits) shall be adjusted by the amount which represents the actual gross receipts, occupation, revenue taxes and franchise fees paid by Texas Gas Service Company, a Division of ONE Gas, Inc.
15.2 LEAKAGE AND PRESSURE INVESTIGATION When a Customer or Consumer smells or detects natural gas and contacts the Company, the Company shall provide to the Consumer, at no-charge to the Customer or Consumer, leakage and pressure investigations to ensure that unsafe conditions do not exist. Where leakage or unsafe conditions are determined by the Company to be in the Customers or Consumers piping or equipment, the Customer or Consumer will be so advised and service will be discontinued until such time that all leakage and other unsafe conditions have been properly corrected by the Customer or Consumer. In addition, when service is initiated, gas air adjustments on a standard domestic and commercial gas range and water heater will be made. Any other work performed on any Consumers appliances or house piping will be on a charge basis.
15.3 SERVICE WORK ON CHARGE BASIS The Company may have personnel available for and may undertake other service work on the Consumers premises on a charge basis, as time permits. Charges shall be made at the Companys standard rate in the Service Area and such service work and any associated revenues and costs shall be considered non-utility.
15.4 EXPEDITED SERVICE REQUEST A Customer may request an expedited service, upon availability. Charges may apply.
15.5 SPECIFIC SERVICE TIME REQUEST A no access fee may be charged to a Customer who requests a specific time for service if the Company agrees to the time and sends appropriate personnel to the appointed location and the Customer is not present to allow access to the premises.
15.6 SERVICE FEES All fees and charges shall be adjusted by taxes and fees (including franchise fees) where applicable.

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

a) Connection Fee A connection fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when a meter is set and/or gas turned on. $38.00
b) Read-In Fee A read-in fee shall be charged to any Applicant for the cost involved in initiation of service. This fee shall be charged when only a meter reading is required. $18.00
c) Special Handling & Expedited Service In addition to initiation of service fee, a fee may be charged to any Applicant whose request to initiate service cannot be worked during normal business hours or requires special handling. Applicant must be advised that an additional fee will be charged and must agree to pay such charge. Special Handling Fee - The Company may, at Applicant or Customers request, provide special handling in order to meet the Applicant or Customers requirements. Special handling does not include calling the Applicant/Customer in advance or A.M. or P.M. scheduling. $18.00 Expedited Service Fee and Overtime Rate - The Applicant or Customers request for expedited service may be scheduled at any time to fit the Companys work schedule, and an Expedited Service charge shall be collected. The Company shall not be obligated to provide Expedited Service when the personnel and resources to do so are not reasonably available. $70.00
d) Services from Others Whenever service is furnished from the facilities of others and the Company must pay any special fees to the supplying Company, the Applicant may be requested to reimburse the Company for such charge. Actual cost plus 20% for handling
e) Customer Requested Meter Test Positive Displacement Up to 1500 cubic feet per hour $150.00 Over 1500 cubic feet per hour $225.00 ---------- Orifice Meters $200.00 All sizes ----------
f) Payment Re-processing Fee $25.00
g) Collection Fee A Collection Fee shall be charged to any Customer whose failure to respond to a termination notice necessitates the dispatch of a Company representative to attempt collection of payment from Customer. $18.00
h) Reconnect Fees A reconnect fee shall be charged to any Customer whose service is terminated and then re-initiated unless terminated in error by the Company. This fee is the same as the Standard Initiation Fee charged for new service. Related, non-routine services including but not limited to high bill investigations and building meter loops may be charged. $38.00
Regular Labor Rate $50.00 After Hours Rate $70.00
i) Special Read Fee A special read fee shall be charged for customer requested reading of a meter of which estimated billing has been made. This is not in connection with Section 12.8. $20.00
j) Meter Exchange Fee - Customer Request A fee will be charged for customer requested meter exchanges when a meter is working properly or done for the Customers convenience. $180.00
k) Meter Tampering Fee - Residential A fee will be charged to Customers who knowingly tamper with Company property (i.e. broken meter locks, broken stop cocks, tampered meter dials, and broken meter blind seals). $180.00
l) Unauthorized Consumption Fee Charges for the replacement of an illegally broken meter seal or locking device to the Customer who could be reasonably expected to benefit from gas service received through said meter. $30.00 plus expenses
m) No Access Fee A fee charged to a Customer who schedules an appointment but fails to appear. $18.00
n) Meter Removal Fee $25.00
o) Account Research Fee An hourly fee will be charged for Customer account information requiring research of accounting/billing information. $20.00
p) Police Escort Fee A fee charged when the Company is required to use law enforcement personnel to escort it into locked sites or sites requiring animal control in order for the

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

Company to access a meter or other equipment. Actual cost
q) Excess Flow Valve Installation Fee Pursuant to Code of Federal Regulations, 192.383(d) a fee for installation of an excess flow valve (EFV) will be assessed when a Customer requests such installation on the Customers service line. The EFV will be installed at a date mutually agreeable to both Company and Customer, but after January 1, 2018. The Company reserves the sole right to conduct any required maintenance that may result from the installation. The customer shall be assessed a one-time installation fee. $400.00

15.7 DEPOSIT AMOUNTS
a) Advanced Deposit Estimated expenditure to serve the premises of new business beyond the existing distribution facilities of the Company. Actual cost
b) Residential Customer Deposit Minimum $75.00
c) Non-Residential Deposit Minimum $250.00

CGSA-b

Texas Gas Service Company, a Division of ONE Gas, Inc. Rules of Service `
Central-Gulf Service Area (Continued)

h) Failure of the Applicant to provide satisfactory identifying information as required by the Federal Trade Commission`s Red Flag Rules and the Company`s Identity Theft Prevention Program. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve in a manner satisfactory to the Company.

6.2 APPLICANT`S RECOURSE In the event that the Company shall refuse to serve an Applicant under this Section, the Company must inform the Applicant of the basis of its refusal and that the Applicant may file a complaint with the municipal regulatory authority or Commission, whichever is appropriate. The right to refuse service shall terminate when the Applicant has complied with the Companys requirements or corrected the cause for the refusal to serve.
6.3 INSUFFICIENT GROUNDS FOR REFUSAL TO SERVE The following shall not constitute sufficient cause for refusal of service to a present Customer or Applicant:
a) Delinquency in payment for service by a previous occupant of the premises to be served;
b) Failure to pay for merchandise or charges for non-utility service purchased from the utility;
c) Failure to pay a bill to correct previous underbilling due to misapplication of rates more than six months prior to the date of application;
d) Violation of the Companys rules pertaining to operation of nonstandard equipment or unauthorized attachments which interfere with the service of others unless the customer has first been notified and been afforded reasonable opportunity to comply with these rules;
e) Failure to pay a bill of another customer as guarantor thereof unless the guarantee was made in writing to the Company as a condition precedent to service; and
f) Failure to pay the bill of another customer at the same address except where the change of customer identity is made to avoid or evade payment of the Companys bill.
SECTION 7 ` DISCONTINUANCE OF SERVICE
7.1 CUSTOMER REQUESTED DISCONTINUANCE The Customer shall be responsible for all charges and amounts billed from the time Customer gives notice of their intention to discontinue service until the Company has read the meter, or for 5 working days from the date of such notice, whichever is the shorter period of time.
7.2 DUE DATE OF BILL The due date of the bill for the Company`s service shall not be less than 15 days after issuance, or such other period of time as may be provided by order of the Regulatory Authority. A bill for the Company`s service is delinquent if unpaid by the due

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

date.
7.3 DELINQUENT ACCOUNT A Customer`s utility service may be disconnected if the bill or other charges authorized by this Tariff or the applicable rate schedules have not been paid or a deferred payment plan pursuant to this Tariff has not been entered into within five (5) working days after the bill has become delinquent and proper notice has been given. Proper notice consists of a deposit in the United States mail, postage prepaid, or hand delivery to the Customer at least five (5) working days prior to the stated date of disconnection, with the words TERMINATION NOTICE or similar language prominently displayed on the notice. The notice shall be provided in English and Spanish as necessary to adequately inform the Customer, and shall include the date of termination, the hours, address, and telephone number where payment may be made, and a statement that if a health or other emergency exists, the Company may be contacted concerning the nature of the emergency and the relief available, if any, to meet such emergency. If a representative of the Company makes an attempt to collect a past due amount, a collection fee per visit shall be assessed to such Customers as specified in Section 15.
7.4 REASONS FOR DISCONNECTION The Companys service may be disconnected for any of the following reasons:
a) Without notice for the presence of what the Company considers to be an unsafe condition on the Consumers premises or if an emergency exists or where a known dangerous condition exists for as long as the condition exists;
b) Without notice for willful destruction or damage to or tampering with or bypassing the Companys meter or equipment by the Consumer or by others with knowledge or negligence of the Consumer;
c) Within 5 working days after written notice for violation of the Companys rules pertaining to the use of service in a manner which interferes with the service of others or the operation of nonstandard equipment, if a reasonable attempt has been made to notify the Customer and the Customer is provided with a reasonable opportunity to remedy the situation;
d) Without notice if failure to curtail by such Consumer endangers the supply to Consumers in higher priority classes pursuant to applicable Commission rules;
e) 5 working days after written notice from the Company for refusal to grant Company personnel or its designees access to the Consumers premises at any reasonable time for any lawful purpose;
f) 5 working days after written notice from the Company for use, sale or delivery of gas in violation of the provisions of this Tariff or violation of any applicable laws, orders or ordinances, provided that disconnection may be made without notice if the violation creates an unsafe condition;
g) For Customers on transportation service, the Company may discontinue service upon request of a Qualified Supplier, provided however, that the Qualified Supplier represents to the Company that notice has been given to the Customer by the Qualified Supplier of delinquency in payment at least 5 working days prior to Qualified Suppliers request for disconnection, and provided that Qualified Supplier agrees to indemnify and hold harmless the Company from any potential resulting liability;
h) Failure to pay a delinquent account or failure to comply with the terms a deferred payment plan for installment payment of a delinquent account;
i) Failure to comply with deposit or guarantee arrangements where required by this Tariff; or
j) Within 5 working days after written or electronic notice, for Consumers enrolled in e-bill, that any payment including paper check, electronic transfer payment, and debit or credit card payment, that has been rejected or returned to the Company by the bank.
7.5 DISCONNECTION NOT ALLOWED The Company`s service may not be disconnected for any of the following reasons:

RRC COID: 6310 COMPANY NAME: TEXAS GAS SERVICE COMPANY

TARIFF CODE: DS **RRC TARIFF NO:** 34267

a) Within a period of 5 working days after mailing of the notice or the day following the date indicated in the notice, whichever is the later time.
b) After full payment of the delinquent bill except when there is not sufficient time to advise Companys service personnel of receipt of the payment.
c) Delinquency in payment for service by a previous occupant of the premises.
d) Failure to pay for merchandise or charges for non-utility service by the Company.
e) Failure to pay for a different type or class of utility service unless fee for such service is included on the same bill.
f) Failure to pay the account of another customer as guarantor thereof, unless the Company has in writing the guarantee as a condition precedent to service.
g) Failure to pay charges arising from an underbilling occurring due to any misapplication of rates more than six months prior to the current billings.
h) Failure to pay charges arising from an underbilling due to any faulty metering, unless the meter has been tampered with or unless such underbilling charges are due.
i) Failure to pay an estimated bill other than a bill rendered pursuant to an approved meter reading plan, unless the Company is unable to read the meter due to circumstances beyond its control.
j) The Company may not discontinue service to a delinquent residential Customer permanently residing in an individually metered dwelling unit when that Customer establishes that discontinuance of service will result in some person residing at that residence becoming seriously ill or more seriously ill in the service is discontinued. Any Customer seeking to avoid termination of service under this Section must make a written request supported by a written statement from a licensed physician. Both the request and the statement must be received by the Company not more than five (5) working days after the date of delinquency of the bill. The prohibition against service termination provided by this Section shall last twenty (20) days from the date of receipt by the Company of the request and statement or such lesser period as may be agreed upon by the Company and the Customer. The Customer who makes such request shall sign an installment agreement which provides for payment of such service along with timely payments for subsequent monthly billings.
