

**THE APPLICATION OF CHESAPEAKE MIDSTREAM DEVELOPMENT, LP TO  
CONSTRUCT AND OPERATE A HYDROGEN SULFIDE GAS PIPELINE, LAMMERTS  
LATERAL, DILLEY GGS AREA, LA SALLE COUNTY, TEXAS**

---

**APPLICATION REVIEWED BY:** Andres J. Trevino, P.E.

**DATE APPLICATION FILED:** June 23, 2011

**DATE REVIEWED:** August 4, 2011

**EXAMINER'S REPORT AND RECOMMENDATION**  
**STATEMENT OF THE CASE**

This is the unopposed application of Chesapeake Midstream Development LP for Commission authority to construct and operate a hydrogen sulfide (H<sub>2</sub>S) gas pipeline in La Salle County, pursuant to Statewide Rules 106, 70 and 36.

The Commission's Field Operations section has reviewed the application and has determined that the application complies with the applicable provisions of Rule 36. In addition, the Commission's Safety Division and Gas Services Division have reviewed the application. The examiner recommends approval of the application.

**DISCUSSION OF THE EVIDENCE**

Chesapeake Midstream Development LP proposes construction of a gas gathering pipeline to transport produced gas from the Lammerts A2H well site to the Dilley Amine Plant in the Dilley Gas Gathering System (GGS) Area. The line will be 8<sup>5</sup>/<sub>8</sub> inches in diameter and approximately 4.7 miles long. The line will carry a maximum 2 MMCFD of gas containing up to 4,500 parts per million (ppm) of H<sub>2</sub>S. The maximum operating pressure will be 720 psig.

The 100 ppm ROE is 399 feet and the 500 ppm ROE is 182 feet. The 500 ppm ROE and 100 ppm ROE includes County Road 4827 and portions of private ranch roads. There are numerous deer blinds (5), deer camps (2), a residence and a travel trailer within the 100 & 500 ppm ROE. The submitted contingency plan for the gathering line complies with the provisions of Rule 36(c)(9).

All materials will satisfy the requirements described in the latest editions of NACE Standard MR-0175-2003. The gathering line is constructed of API-5L X-52 FBE grade steel pipe. The line will be equipped with cathodic protection to prevent external corrosion. The line will be chemically treated as needed for internal corrosion and monitored with

corrosion coupons. The line will be buried a minimum of 4 feet.

H<sub>2</sub>S warning signs compliant with Rule 36(c)(6)(A) and (c)(6)(B) will be posted at all road crossings as well as intervals along the pipeline frequent enough as to provide warning to avoid accidental rupture of the line by excavation. The signs will indicate poison gas, company name and emergency phone numbers.

The proposed line will comply with Statewide Rule 36(c)(8). Chesapeake Midstream Development LP will use safety controls and automatic devices. This will also trigger closure of the block valves. Low and high pressure shutdown valves at the wellheads will to prevent the over pressuring of the pipeline and reduce escaping gases. Monitors will trigger audible, visual and dial-out alarms if an H<sub>2</sub>S concentration of 10 ppm to 50 ppm is detected. The pipeline pressure will be monitored 24/7 by a SCADA gas detection system.

Chesapeake Midstream Development LP published notice of the application in a newspaper of general circulation in La Salle County. The notice was published in the *Frio-Nueces Current* on June 9, 2011. The application was filed with the La Salle County Clerk on May 17, 2011.

#### FINDINGS OF FACT

1. On June 23, 2011, Chesapeake Midstream Development LP filed an application for a permit to construct a hydrogen sulfide gas gathering pipeline in La Salle County.
2. Chesapeake Midstream Development LP published notice of the application in a newspaper of general circulation in La Salle and Frio Counties. The notice was published in *Frio-Nueces Current* on June 9, 2011. The application was filed with the La Salle County Clerk on May 17, 2011.
3. Chesapeake Midstream Development LP proposes construction of a gas gathering pipeline to transport produced gas from the Lammerts A2H well site to the Dilley Amine Plant in the Dilley Gas Gathering System (GGS) Area.
  - a. The line will be 8<sup>5</sup>/<sub>8</sub> inches in diameter and approximately 4.7 miles long.
  - b. The line will carry a maximum 2 MMCFD of gas containing up to 4,500 parts per million (ppm) of H<sub>2</sub>S.
  - c. The maximum operating pressure will be 720 psig.
  - d. The 100 ppm ROE is 399 feet and the 500 ppm ROE is 182 feet.
  - e. There is one public road (CR 4827) within the 100 & 500 ppm ROE.
  - f. The proposed pipeline will be in a rural area, however there are 9 public

receptors along the route within the 100 & 500 ppm ROE. These include numerous deer blinds (5), deer camps (2), a residence and a travel trailer.

4. Pipeline materials and construction meet the NACE and API standards as required by Statewide Rule 36 for hydrogen sulfide service.
5. The submitted contingency plan for the line is in accordance and complies with the provisions of Rule 36(c)(9).
6. The pipeline will be constructed subject to Commission inspections for compliance with the appropriate Commission Rules pursuant to Statewide Rule 36(c)(6)(7)(8) and (13).
7. The Commission's Field Operations Section recommends approval. The Commission's Pipeline Safety Division and Gas Services Division have reviewed the application.

#### **CONCLUSIONS OF LAW**

1. Proper notice was timely given to all parties entitled to notice pursuant to applicable statutes and rules.
2. All things have occurred and have been accomplished to give the Commission jurisdiction in this case.
3. The application complies with Statewide Rules 36, 70 and 106.
4. Approving the application for a permit to construct and operate the proposed gas pipeline is consistent with the rules and safety standards adopted by the Commission.

#### **EXAMINER'S RECOMMENDATION**

The examiner recommends that the application of Chesapeake Midstream Development LP for Commission authority pursuant to Statewide Rules 106, 70 and 36, to construct and operate the proposed hydrogen sulfide gas pipeline in La Salle County, be approved.

Respectfully submitted,

Andres J. Trevino, P.E.  
Technical Examiner
