

**RAILROAD COMMISSION OF TEXAS
OFFICE OF GENERAL COUNSEL**

**OIL AND GAS DOCKET
NO. 04-0249845**

**IN THE FALFURRIAS (9200
VICKSBURG) FIELD, JIM WELLS
AND KLEBERG COUNTIES, TEXAS**

**FINAL ORDER
ADOPTING FIELD RULES FOR THE
FALFURRIAS (9200 VICKSBURG) FIELD
JIM WELLS AND KLEBERG COUNTIES, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on January 4, 2007, the presiding examiner has made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ordered by the Railroad Commission of Texas that the following field rules are hereby adopted for the Falfurrias (9200 Vicksburg) Field:

RULE 1: The entire correlative interval between 8,950 feet and 9,150 feet, as shown on the log of the Wright No. 4, API No. 273 32462, Section 32, R "El Paisano" De La Garza Survey, A-100, Kleberg County, shall be designated as a single reservoir for proration purposes and be designated as the Falfurrias (9200 Vicksburg) Field.

RULE 2: The daily allowable production of gas from individual wells completed in the subject field shall be determined by allocating the allowable production, after deductions have been made for wells which are incapable of producing their gas allowables, among the individual wells in the following manner:

FIVE percent (5%) of the field's total allowable shall be allocated equally among all the individual prorable wells producing from the field.

NINETY-FIVE percent (95%) of the field's total allowable shall be allocated among the individual wells in the proportion that the deliverability of such well, as evidenced by the most recent G-10 test filed with the Railroad Commission bears to the summation of the deliverability of all prorable wells producing from the field.

It is further ordered that the allocation formula in the Falfurrias (9200 Vicksburg) Field will remain suspended. The allocation formula may be reinstated administratively, in accordance with the Commission's rules, if the market demand for gas in the Falfurrias (9200 Vicksburg) Field drops below 100% of deliverability.

Done this 23rd day of January, 2007.

RAILROAD COMMISSION OF TEXAS
