

**RAILROAD COMMISSION OF TEXAS
OFFICE OF GENERAL COUNSEL**

**OIL AND GAS DOCKET
NO. 04-0257502**

**IN THE ROLETA (WILCOX
CONSOLIDATED) FIELD, ZAPATA
COUNTY, TEXAS**

**FINAL ORDER
AMENDING FIELD RULES
FOR THE ROLETA (WILCOX CONSOLIDATED) FIELD
ZAPATA COUNTY, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on July 9, 2008, the presiding examiner has made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and recommendation the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ordered that field rules adopted in Final Order No. 04-0207009, effective January 9, 1995, for the Roleta (Wilcox Consolidated) Field, Zapata County, Texas, are hereby amended and renumbered as follows:

RULE 1: The entire correlative interval from 7,790 feet to 8,978 feet as shown on the Dual Induction Focused Compensated Densilog Compensated Neutron Gamma Ray log of the Enron Oil & Gas - Salvador Garcia "D" Well No. 21, in the Jose Antonio Ochoa, Porcion 20 Survey, Zapata County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Roleta (Wilcox Consolidated) Field.

RULE 2: No well for oil or gas shall hereafter be drilled nearer than FOUR HUNDRED SIXTY-SEVEN (467) feet to any property line, lease line, or subdivision line and no well shall be drilled nearer than NINE HUNDRED THIRTY-THREE (933) feet to any applied for, permitted or completed well in the same reservoir on the same lease, pooled unit or unitized tract. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well, and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefor shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rules 37 and 38, which applicable provisions of said rules are incorporated herein by reference. The standard drilling unit shall remain forty (40) acres per well.

In applying this rule, the general order of the Commission with relation to the subdivision of property shall be observed.

RULE 3: The daily allowable production of gas from individual wells completed in the subject field shall be determined by allocating the allowable production, after deductions have been made for wells which are incapable of producing their gas allowables, among the individual wells in the following manner:

TWENTY-FIVE percent (25%) of the field's total allowable shall be allocated equally among all the individual proratable wells producing from the field.

SEVENTY-FIVE percent (75%) of the field's total allowable shall be allocated among the individual wells in the proportion that the deliverability of such well, as evidenced by the most recent G-10 test filed with the Railroad Commission bears to the summation of the deliverability of all proratable wells producing from the field.

It is further ordered that the allocation formula in the Roleta (Wilcox Consolidated) Field will remain suspended. The allocation formula may be reinstated administratively, in accordance with the Commission's rules, if the market demand for gas in the Roleta (Wilcox Consolidated) Field drops below 100% of deliverability.

Done this 29th day of July, 2008.

RAILROAD COMMISSION OF TEXAS
