

**RAILROAD COMMISSION OF TEXAS
OFFICE OF GENERAL COUNSEL**

**OIL AND GAS DOCKET
NO. 7C-0249267**

**IN THE RONNY (GOEN) FIELD, CONCHO
COUNTY, TEXAS**

**FINAL ORDER
ADOPTING TEMPORARY RULES AND REGULATIONS
FOR THE RONNY (GOEN) FIELD, CONCHO COUNTY, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on December 12, 2006, the presiding examiner has made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ordered by the Railroad Commission of Texas that the following rules shall be adopted on a temporary basis for the Ronny (Goen) Field, Concho County, Texas.

RULE 1: The entire correlative interval from 3,044 feet to 3,059 feet as shown on the log of the Alexander Well No. 1, Friedrich Schubert Survey #12, A-817, Concho County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Ronny (Goen) Field.

RULE 2: No gas well shall hereafter be drilled nearer than NINE HUNDRED THIRTY THREE (933) feet to any property line, lease line or subdivision line and no well shall be drilled nearer than ONE THOUSAND EIGHT HUNDRED SIXTY SEVEN (1,867) feet to any applied for, permitted or completed well in the same reservoir on the same lease, pooled unit or unitized tract. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well, and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefore shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rule 37 and 38, which applicable provisions of said rule are incorporated herein by reference.

In applying this rule the general order of the Commission with relation to the subdivision of property shall be observed.

most of the equipment and materials used in the construction of the railroad are owned by the railroad.

Done this 10 day of January, 2007.
