

**RAILROAD COMMISSION OF TEXAS  
HEARINGS DIVISION**

**OIL AND GAS DOCKET  
NO. 7B-0289660**

**IN THE TOMPKINS (CANYON SD. 4900)  
FIELD, STONEWALL COUNTY, TEXAS**

**FINAL ORDER  
AMENDING FIELD RULES FOR THE  
TOMPKINS (CANYON SD. 4900) FIELD,  
STONEWALL COUNTY, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on July 16 and October 2, 2014, the presiding examiners have made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiners' report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is **ORDERED** by the Railroad Commission of Texas that the Field Rules for the Tompkins (Canyon Sd. 4900) Field, Stonewall County, Texas, are hereby amended. The amended Field Rules for the Tompkins (Canyon Sd. 4900) Field are set out in their entirety as follows:

**RULE 1:** The entire correlative interval from 4,812 feet to 4,896 feet, as shown on the log of the L.C.S. Production Company, Ferguson Lease, Well No. 15E (API No. 42-) in the W. Vardeman Survey (A-441), Section 347, Stonewall County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Tompkins (Canyon Sd. 4900) Field.

**RULE 2:** No well for oil shall hereafter be drilled nearer than **THREE HUNDRED AND THIRTY (330)** feet to any property line, lease line, or subdivision line and no vertical well shall be drilled nearer than **SIX HUNDRED AND SIXTY (660)** feet to any applied for, permitted or completed well in the same reservoir on the same lease, pooled unit or unitized tract. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well, and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit in the field. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefore shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rules 37 and 38, which applicable provisions of said rules are incorporated herein by reference.

**RULE 3:** The acreage assigned to an individual oil well for the purpose of allocating allowable oil production thereto shall be known as a proration unit. The standard drilling and proration units are established hereby to be FORTY (40) acres. No proration unit shall consist of more than FORTY (40) acres except as hereinafter provided. All proration units shall consist of continuous and contiguous acreage which can reasonably be considered to be productive of oil. No double assignment of acreage will be accepted.

If after the drilling of the last well on any lease and the assignment of acreage to each well thereon in accordance with the regulations of the Commission there remains an additional unassigned acreage of less than FORTY (40) acres, then and in such event the remaining unassigned acreage up to and including a total of TWENTY (20) acres may be assigned as tolerance acreage to the last well drilled on such lease or may be distributed among any group of wells located thereon, so long as the proration units resulting from the inclusion of such additional acreage meet the limitations prescribed by the Commission.

An operator, at his option, shall be permitted to form optional drilling units of TWENTY (20) acres. A proportional acreage allowable credit will be given for a well on a fractional proration unit. There is no maximum diagonal limitation in the Tompkins (Canyon Sd. 4900) Field.

For the determination of acreage credit in this field, operators shall file for each oil or gas well in this field a Form P-15 Statement of Productivity of Acreage Assigned to Proration Units. On that form or an attachment thereto, the operator shall list the number of acres that are being assigned to each well on the lease or unit for proration purposes. For oil and gas wells, operators shall be required to file, along with the Form P-15, a plat of the lease, unit or property; provided that such plat shall not be required to show individual proration units.

**RULE 4:** The Tompkins (Canyon Sd. 4900) Field is classified as salvage with no allowable restrictions on oil or casinghead gas production.

Done this 27<sup>th</sup> day of January, 2015.

**RAILROAD COMMISSION OF TEXAS**

**(Order approved and signatures affixed by  
Hearings Divisions' Unprotested Master  
Order dated January 27, 2015)**
