Amend §3.86 and other rules re: UFT fields

Amend §3.86 and other rules re: UFT fields

I generally support the proposed rule changes as they are a needed step in the right direction. However, professional engineers should not be allowed to certify a boundary survey plat. A professional engineer typically does not have the experience nor the training/education necessary to adequately supervise the field and office work required to prepare a well plat. I am not in favor of including a professional engineer in the wording for the proposed rule change.
