Amend §3.86 and other rules re: UFT fields

Amend §3.86 and other rules re: UFT fields

(6) Plat requirements. All plats required by this section shall be prepared using blue or black ink and shall include a certification by a professional land surveyor registered in accordance with Texas Occupations Code, Chapter 1071, relating to Land Surveyors, or by a registered professional engineer registered in accordance with Texas Occupations Code, Chapter 1001, relating to Professional Engineers.

As a Land Surveyor Licensed by the State of Texas, I have put together RRC plats for Oil & Gas permitting purposes. Each plat is requires that the boundary lines (i.e. Unit Lines/Lease Lines) are determined the same way that we do a boundary survey plat, however professional engineers should not be allowed to certify a boundary survey plat or a RRC permit plat.
