Who's Using CNG

HALLIBURTON

Fuel Costs

US gas price hits five-month high

March 10, 2014

Bloomberg News

The average price for regular gasoline at U.S. pumps gained 9.87 cents in the past two weeks to \$3.5098 a gallon, the highest since Sept. 20, 2013

Today the price at the pump was:

- **Regular** **\$3.15-3.19 per gallon**
- **Diesel** **\$3.70 per gallon**

***Independence Fuel Systems* current price is:**

- ***CNG \$2.05 per Gas Gallon Equivalent (GGE)***

Saving you the consumer \$1.10 over regular gasoline and \$1.65 over diesel

IFS Locations and Projected Dates

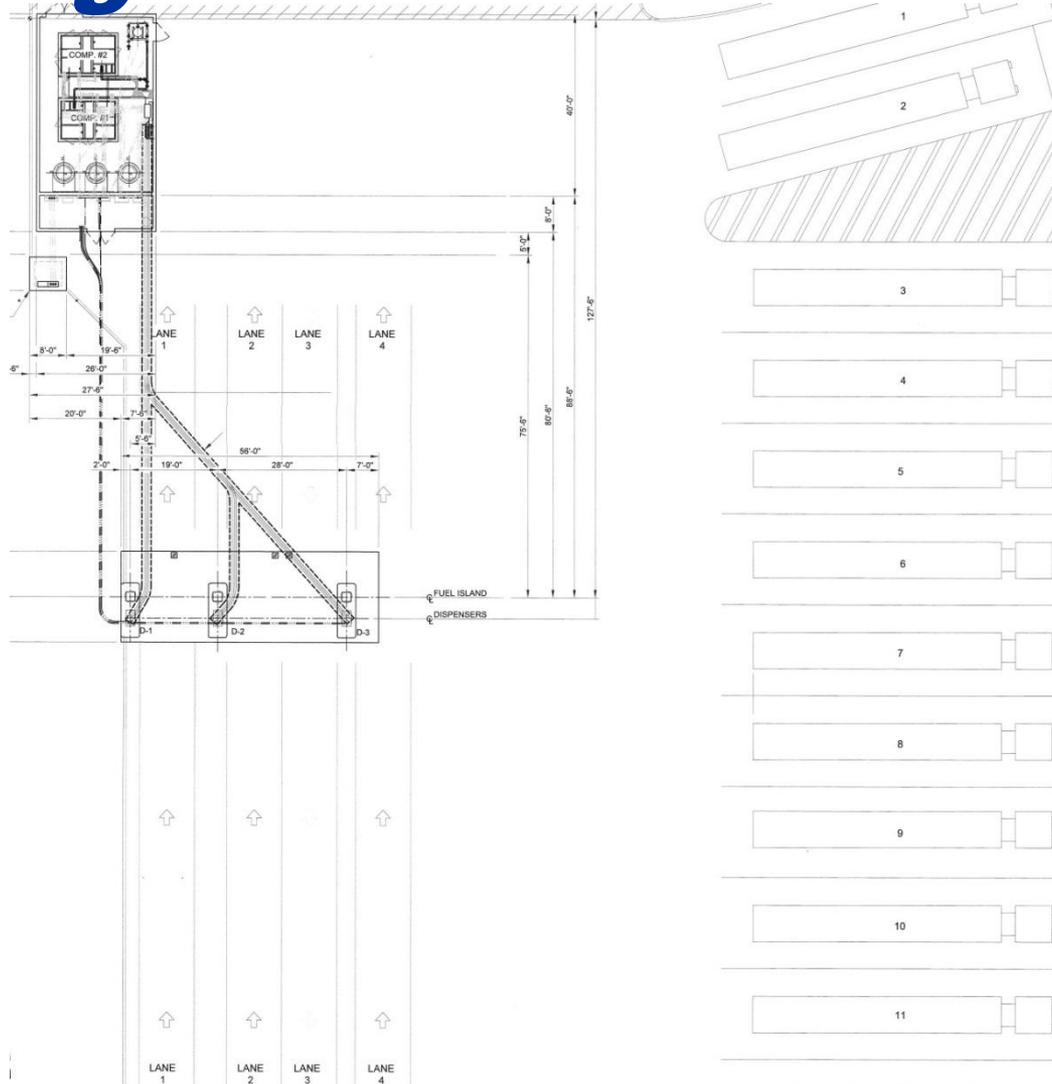

<u>Location</u>	<u>Intersection</u>	<u>Projected Opening Date</u>
Texas Best Longview	I-20 and Hwy 259	Open; June 2013
Texas Best Carthage	Hwy 59 and SW Loop 436	March 2014
Longview West	Harrison Rd/902 Mobile Dr.	May 2014
Centerville, TX	I-45 and Hwy 7	July 2014
Texas Best Kilgore	I-20 and Hwy 42	TBD

Why These Locations?

- Highly visible locations
- Many of your fleets are currently fueling at or near these locations
- Covering routes on I-20, I-45, Hwys 59, 80 & 259
- Locations are easily accessible for local, long haul and municipal fleets

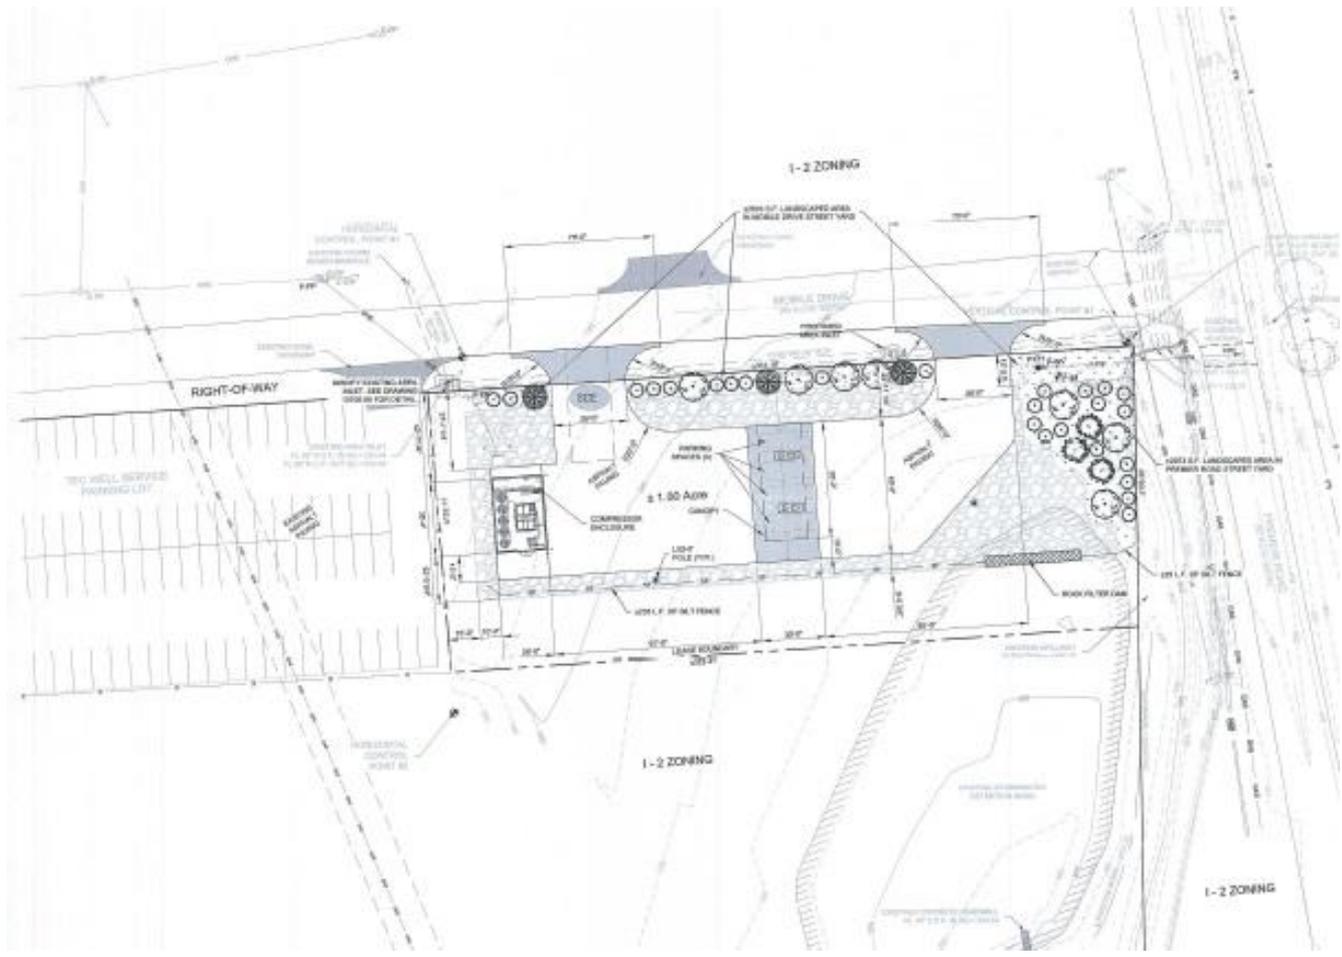

Our Stations Longview

Longview West

Our Fuel Dispensers **INDEPENDENCE** FUEL SYSTEMS

Flow Rate/Fuel Times **INDEPENDENCE** FUEL SYSTEMS

- IFS infrastructure engineered to exceed capability of flow for dispenser.
- Heavy Duty, high flow dispensers capable of dispensing 18-20 GGE per/min @3600 psi (temperature compensated @70 degrees F)
- Light Duty, light flow dispensers capable of flowing 12 GGE per/min @3600 psi (temperature compensated @70 degrees F)
- Fill times for up to 50 GGE on heavy duty/high flow dispenser engineered to be less than 6-7 minutes from handle lift to completed fill
- Carthage and Longview West will introduce a new proprietary technology that will enable prioritization of fueling load, allowing for faster and complete fueling experiences

Fuel Cards

IFS accepts:

- All Fuel Man, Wright Express, and Voyager fleet card brands
- American Express, Visa, Master Card, and Discover

IFS also issues Independence Fleet Cards that can assist your fleet to manage fuel costs and track mileage.

CNG Technologies

Dual fuel CNG Conversions for existing fleets have made considerable progress in the past year, allowing fleet operators to purchase conversions to run their fleets on both diesel and CNG.

This allows the fleet operator considerable fuel savings (upwards of 33%) with the added benefit of automatic operation of the truck on 100% diesel if the natural gas tank runs dry, or if the truck was operating in an area without CNG.
