Subject: Proposed rule changes for Sections 3.13, 3.99, and 3.100

Apr 13, 2013

RRC Rules Coordinator
TX

Dear Coordinator,

Please make the cementing/casing rules as strong as possible to protect groundwater.

Waste injection can contaminate aquifers and even trigger earthquakes.

Please adopt stricter standards for the casing of injection wells and require more detailed surveying and plugging of nearby wells to protect water supplies and prevent waste water from escaping.

This is important for Texas.

Sincerely,

Kevin Riley
