Comments concerning proposed rulemakings

These weather preparedness rules must go further to truly help Texans in our times of need. I urge you to also: - Require energy producers to operate when we need them most - Impose and enforce penalties on any energy producers that do not operate when needed - Clarify who needs to comply with these rules and who does not; we deserve transparency Your commission has failed to keep Texans safe and with power. I urge you to finally require accountability of yourselves and of power companies to do what is right by Texans.
