Dear Rules Coordinator,

Please set virtual and in-person public hearings for this rulemaking, with at least 2 weeks notice. Don't end the comment period before the hearings. Direct public feedback is essential to the RRC's mission of stewarding natural resources & the environment and protecting personal & community safety.

To adequately address Texas' inactive well problem, please make these changes to the rules:

-As statute requires, specify that an extension isn't an option unless the RRC fully considers "risk to public safety, health, and the environment; wellbore and wellhead integrity, including the ability to monitor casing pressure; and regional risk considerations, including penetration of corrosive or over-pressured formations and completion in zones containing hydrogen sulfide."
-Set stricter well integrity standards & monitoring; ban extensions in high-risk zones. Require annual mechanical integrity testing of these wells, not annual reporting of past results.
-Establish statutorily required penalties for violations

Thank you,
jaynell Nicholson jaynell Nicholson
