RAILROAD COMMISSION OF TEXAS
HEARINGS DIVISION

OIL AND GAS DOCKET IN THE SALT FLAT (EDWARDS)
NO. 01-0276080 FIELD, CALDWELL COUNTY, TEXAS

FINAL ORDER
APPROVING THE APPLICATION OF EAGLE ENERGY ACQUISITIONS, L.P.
FOR AUTHORITY PURSUANT TO STATEWIDE RULE 9
MOSES-WATSON LEASE, WELL NO. 1SW
SALT FLAT (EDWARDS) FIELD
CALDWELL COUNTY, TEXAS

The Commission finds that after statutory notice in the above-numbered docket
heard on June 6, & October 29, 2012, the presiding examiners have made and filed a
report and proposal for decision containing findings of fact and conclusions of law, which
was served on all parties of record; that the proposed application is in compliance with all
statutory requirements; and that this proceeding was duly submitted to the Railroad
Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiners’ report and
proposal for decision, the findings of fact and conclusions of law contained therein, and any
exceptions and replies thereto, hereby adopts as its own the findings of fact and
conclusions of law contained therein, and incorporates said findings of fact and
conclusions of law as if fully set out and separately stated herein.

Therefore, it is ORDERED by the Railroad Commission of Texas that Eagle Energy
Acquisitions, L.P. is hereby authorized to conduct salt water and H₂S gas disposal
operations in the Moses-Watson Lease (15871), Well No. 1SW, Salt Flat (Edwards) Field,
Caldwell County, Texas subject to the following terms and conditions.

SPECIAL CONDITIONS:

1. Oil and gas waste shall only be injected into the subsurface depth interval from
   2,950 and 3,600 feet.

2. The liquid injection volume shall not exceed 40,000 barrels per day.

3. The gas injection volume shall not exceed 500 MCF per day.

4. The maximum operating surface injection pressure for liquid shall not exceed 1,200
   psig.

5. The maximum operating surface injection pressure for gas shall not exceed 1,200
   psig.
6. The authority to dispose of oil and gas waste is limited to the disposal of salt water and H₂S gas.

7. Injection fluids are limited to those produced on the Moses-Watson lease from the Upper Edwards formation.

STANDARD CONDITIONS:

1. Injection must be through tubing set on a packer. The packer must be set no higher than 100 feet above the top of the permitted interval.

2. The District Office must be notified 48 hours prior to:
   a. running tubing and setting packer;
   b. beginning any workover or remedial operation;
   c. conducting any required pressure tests or surveys.

3. The wellhead must be equipped with a pressure observation valve on the tubing and for each annulus.

4. Prior to beginning injection and subsequently after any work over, an annulus pressure test must be performed. The test pressure must equal the maximum authorized injection pressure or 500 psig, whichever is less, but must be at least 200 psig. The test must be performed and the results submitted in accordance with the instructions of Form H-5.

5. The injection pressure and injection volume must be monitored at least monthly and reported annually on Form H-10 to the Commission's Austin office.

6. Within 30 days after completion, conversion to disposal, or any work over which results in a change in well completion, a new Form W-2 or G-1 must be filed in duplicate with the District Office to show the current completion status of the well. The date of the disposal well permit and the permit number must be included on the new Form W-2 or G-1.

7. Written notice of intent to transfer the permit to another operator by filing Form P-4 must be submitted to the Commission at least 15 days prior to the date of the transfer.

8. Unless otherwise required by conditions of the permit, completion and operation of the well shall be in accordance with the information represented on the application (Form W-14).

9. This permit will expire when the Form W-3, Plugging Record, is filed with the Commission. Furthermore, permits issued for wells to be drilled will expire three (3) years from the date of the permit unless drilling operations have commenced.
The permit number shall be 13317 Amendment.

Provided further that, should it be determined that such injection fluid is not confined to the approved interval, then the permission given herein is suspended and the disposal operation must be stopped until the fluid migration from such interval is eliminated. Failure to comply with all of the conditions of this permit may result in the operator being referred to enforcement to consider assessment of administrative penalties and/or the cancellation of the permit.

Each exception to the examiners' proposal for decision not expressly granted herein is overruled. All requested findings of fact and conclusions of law which are not expressly adopted herein are denied. All pending motions and requests for relief not previously granted or granted herein are denied.

This order will not be final and effective until 20 days after a party is notified of the Commission's order. A party is presumed to have been notified of the Commission's order three days after the date on which the notice is actually mailed. If a timely motion for rehearing is filed by any party at interest, this order shall not become final and effective until such motion is overruled, or if such motion is granted, this order shall be subject to further action by the Commission. Pursuant to TEX. GOVT CODE §2001.146(e), the time allotted for Commission action on a motion for rehearing in this case prior to its being overruled by operation of law, is hereby extended until 90 days from the date the parties are notified of the order in accordance with TEX. GOVT CODE §2001.144.

Done this 25th day of August, 2015.
