RAILROAD COMMISSION OF TEXAS  
HEARINGS DIVISION

OIL AND GAS DOCKET  
NO. 7C-0289088

IN THE SPRABERRY (TREND AREA)  
FIELD, REAGAN COUNTY, TEXAS

FINAL ORDER

GRANTING THE APPLICATION OF V-F PETROLEUM, INC.,  
PURSUANT TO STATEWIDE RULE 9 FOR A PERMIT TO DISPOSE OF OIL AND  
GAS WASTE BY INJECTION INTO A POROUS FORMATION NOT PRODUCTIVE OF  
OIL OR GAS, J. L. WATKINS LEASE, WELL NO. 3D,  
SPRABERRY (TREND AREA) FIELD, REAGAN COUNTY, TEXAS

The Commission finds that after statutory notice in the above-numbered docket  
heard on July 28, 2015, the presiding Examiners have made and filed a report and  
recommendation containing findings of fact and conclusions of law, for which service was  
not required; that the proposed application is in compliance with all statutory requirements;  
and that this proceeding was duly submitted to the Railroad Commission of Texas at  
conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the Examiners' proposal for  
decision, the findings of fact and conclusions of law contained therein, hereby adopts as  
its own the findings of fact and conclusions of law contained therein, and incorporates said  
findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ORDERED by the Railroad Commission of Texas that the application  
of V-F Petroleum, Inc., is hereby granted and V-F Petroleum, Inc., is authorized to conduct  
saltwater disposal operations in the J. L. Watkins Lease (No. 06723), Well No. 3D,  
Spraberry (Trend Area) Field, Reagan County, Texas, subject to the following terms and  
conditions:

SPECIAL CONDITIONS:

1. Fluid shall be injected into the San Andres Formation in the subsurface  
depth interval between 3,200 feet and 4,000 feet.

2. The injection volume shall not exceed 3,000 barrels per day.

3. The maximum operating surface injection pressure shall not exceed 400  
psig.

4. Injected fluid shall be limited to saltwater produced on the J. L. Watkins  
Lease (No. 06723).
STANDARD CONDITIONS:

1. Injection must be through tubing set on a packer. The packer must be set no higher than 100 feet above the top of the permitted interval.

2. The District Office must be notified 48 hours prior to:
   a. running tubing and setting packer;
   b. beginning any workover or remedial operation;
   c. conducting any required pressure tests or surveys.

3. The wellhead must be equipped with a pressure observation valve on the tubing and for each annulus.

4. Prior to beginning injection and subsequently after any workover, an annulus pressure test must be performed. The test pressure must equal the maximum authorized injection pressure or 500 psig, whichever is less, but must be at least 200 psig. The test must be performed annually and the results submitted in accordance with the instructions of Form H-5.

5. The injection pressure and injection volume must be monitored at least monthly and reported annually on Form H-10 to the Commission's Austin office.

6. Within 30 days after completion, conversion to disposal, or any workover which results in a change in well completion, a new Form W-2 or G-1 must be filed to show the current completion status of the well. The date of the disposal well permit and the permit number must be included on the new Form W-2 or G-1.

7. Written notice of intent to transfer the permit to another operator by filing Form P-4 must be submitted to the Commission at least 15 days prior to the date of the transfer.

8. Unless otherwise required by conditions of the permit, completion and operation of the well shall be in accordance with the information represented on the application (Forms W-14).

9. This permit will expire when the Form W-3, Plugging Record, is filed with the Commission. Furthermore, permits issued for wells to be drilled will expire three (3) years from the date of the permit unless drilling operations have commenced.
10. The permit number shall be ____________.

Provided further that, should it be determined that such injection fluid is not confined to the approved interval, then the permission given herein is suspended and the disposal operation must be stopped until the fluid migration from such interval is eliminated. Failure to comply with all of the conditions of this permit may result in the operator being referred to enforcement to consider assessment of administrative penalties and/or the cancellation of the permit.

Each exception to the Examiners' proposal for decision not expressly granted herein is overruled. All requested findings of fact and conclusions of law which are not expressly adopted herein are denied. All pending motions and requests for relief not previously granted or granted herein are denied.

It is further ORDERED by the Commission that this order shall not be final and effective until 25 days after the Commission's order is signed, unless the time for filing a motion for rehearing has been extended under Tex. Gov't Code §2001.142, by agreement under Tex. Gov't Code §2001.147, or by written Commission Order issued pursuant to Tex. Gov't Code §2001.146(e). If a timely motion for rehearing of an application is filed by any party at interest, this order shall not become final and effective until such motion is overruled, or if such motion is granted, this order shall be subject to further action by the Commission. Pursuant to Tex. Gov't Code §2001.146(e), the time allotted for Commission action on a motion for rehearing in this case prior to its being overruled by operation of law is hereby extended until 90 days from the date Commission Order is signed.

Done this 8th day of December, 2015.
