RAILROAD COMMISSION OF TEXAS
HEARINGS DIVISION

OIL & GAS DOCKET NO. 08-0309600

APPLICATION PROBITY SWD, LLC (679304) PURSUANT TO STATEWIDE RULE 9 FOR A COMMERCIAL PERMIT TO DISPOSE OF OIL AND GAS WASTE BY INJECTION INTO A POROUS FORMATION NOT PRODUCTIVE OF OIL OR GAS FOR THE HOSS 846 SWD LEASE, WELL NO. 1, LUTHER SE. (SILURIAN-DEVONIAN) FIELD, HOWARD COUNTY, TEXAS

FINAL ORDER

The Commission finds that after statutory notice in the above-numbered docketed case heard on November 6, 2018, the presiding Technical Examiner and Administrative Law Judge (collectively, "Examiners") have made and filed a proposal for decision containing findings of fact and conclusions of law, for which service was required; that the proposed application of Probity SWD, LLC is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at a conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the Examiners' proposal for decision and the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ORDERED by the Railroad Commission of Texas that the application of Probity SWD, LLC, Operator No. 679304, pursuant to Statewide Rule 9, for a permit to dispose of oil and gas waste by injection into a porous formation not productive of oil or gas for the Hoss 846 SWD Lease, Well No. 1, Luther SE. (Silurian-Devonian) Field, Howard County, Texas, is hereby GRANTED in accordance with the attached permit.

Each exception to the Examiners' proposal for decision not expressly granted herein is overruled. All requested findings of fact and conclusions of law which are not expressly adopted herein are denied. All pending motions and requests for relief not previously granted or granted herein are denied.

It is further ORDERED by the Commission that this order shall not be final and effective until 25 days after the order is signed, unless the time for filing a motion for rehearing has been extended under Tex. Gov't Code § 2001.142, by agreement under Tex. Gov't Code § 2001.147, or by written Commission order issued pursuant to Tex. Gov't Code § 2001.146(e). If a timely motion for rehearing is filed by any party at interest, this order shall not become final and effective until such motion is overruled, or if such motion is granted, this order shall be subject to further action by the Commission.
Pursuant to Tex. Gov't Code § 2001.146(e), the time allotted for Commission action on a motion for rehearing in this case prior to its being overruled by operation of law is hereby extended until 100 days from the date the parties are notified of this order in accordance with Tex. Gov't Code § 2001.144.

SIGNED on April 9, 2019.

ATTEST:

SECRETARY
RAILROAD COMMISSION OF TEXAS

OIL AND GAS DIVISION
PERMIT TO DISPOSE OF NON-HAZARDOUS OIL AND GAS WASTE BY INJECTION INTO A POROUS FORMATION NOT PRODUCTIVE OF OIL AND GAS

PERMIT NO. 15998 COMMERCIAL

PROBITY SWD, LLC
PO BOX 7307
MIDLAND TX 79708

[DRAFT PERMIT ONLY] Authority is granted to inject Non-Hazardous Oil and Gas waste into the well identified herein in accordance with Statewide Rule 9 of the Railroad Commission of Texas and based on information contained in the application (Form W-14) dated October 21, 2017 for the permitted interval of the MONTOYA and ELLENBURGER formations and subject to the following terms and special conditions:

HOSS 846 SWD (000000) LEASE
LUTHER, SE. (SILURIAN-DEVONIAN) FIELD
HOWARD COUNTY
DISTRICT 08

<tbody>
<tr>
<td>1</td>
<td>22700000</td>
<td>1. For wells with long string casing set more than 100 feet below the permitted injection interval, the plug back depth shall be within 100 feet of the bottom of the permitted injection interval.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2. Operator shall provide an electric log, and if available a mud log, to the UIC section of the subject well or a copy of the nearby log submitted with the permit application annotated with the top(s) and bottom(s) of the permitted formations.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>3. Injection shall be no deeper than 100 feet above the estimated base of the Ellenburger Formation as determined by the RRC using the log and/or the estimated Ellenburger thickness at the well location.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>4. The disposal well shall be cased, and the casing cemented in compliance with Statewide Rule 13 (related to Casing, Cementing, Drilling, and Completion Requirements), in such a manner that the injected fluids will not endanger oil, gas, geothermal resources, or freshwater resources.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>5. Prior to commencing disposal operations, the Applicant shall run a cement bond log, and provide a copy to UIC to verify the well is cased and cemented in compliance with Statewide Rule 13 (related to Casing, Cementing, Drilling, and Completion Requirements), in such a manner that the injected fluids will not endanger oil, gas, geothermal resources, or freshwater resources.</td>
</tr>
</tbody>
</table>

STANDARD CONDITIONS:

1. Injection must be through tubing set on a packer. The packer must be set no higher than 100 feet above the top of the permitted interval.

2. The District Office must be notified 48 hours prior to:
   a. running tubing and setting packer;
   b. beginning any work over or remedial operation;
   c. conducting any required pressure tests or surveys.

3. The wellhead must be equipped with a pressure observation valve on the tubing and for each annulus.

4. Prior to beginning injection and subsequently after any work over, an annulus pressure test must be performed. The test pressure must equal the maximum authorized injection pressure or 500 psig, whichever is less, but must be at least 200 psig. The test must be performed and the results submitted in accordance with the instructions of Form H-5.

5. The injection pressure and injection volume must be monitored at least monthly and reported annually on Form H-10 to the Commission's Austin office.

6. Within 30 days after completion, conversion to disposal, or any work over which results in a change in well completion, a new Form W-2 or G-1 must be filed to show the current completion status of the well. The date of the disposal well permit and the permit number must be included on the new Form W-2 or G-1.

Note: This document will only be distributed electronically.
7. Written notice of intent to transfer the permit to another operator by filing Form P-4 must be submitted to the Commission at least 15 days prior to the date of the transfer.

8. This permit will expire when the Form W-3, Plugging Record, is filed with the Commission. Furthermore, permits issued for wells to be drilled will expire three (3) years from the date of the permit unless drilling operations have commenced.

9. The operator shall be responsible for complying with the following requirements so as to assure that discharges of oil and gas waste will not occur:

   a. Prior to beginning operation, all collecting pits, skimming pits, or washout pits must be permitted under the requirements of Statewide Rule 8.

   b. Prior to beginning operation, a catch basin constructed of concrete, steel, or fiberglass must be installed to catch oil and gas waste which may spill as a result of connecting and disconnecting hoses or other apparatus while transferring oil and gas waste from tank trucks to the disposal facility.

   c. Prior to beginning operation, all fabricated waste storage and pretreatment facilities (tanks, separators, or flow lines) shall be constructed of steel, concrete, fiberglass, or other materials approved by the Director or Director’s delegate. These facilities must be maintained so as to prevent discharges of oil and gas waste.

   d. Prior to beginning operation, dikes shall be placed around all waste storage, pretreatment, or disposal facilities. The dikes shall be designed so as to be able to contain a volume equal to the maximum holding capacity of all such facilities. Any liquids or wastes that do accumulate in the containment area shall be removed within 24 hours and disposed of in an authorized disposal facility.

   e. Prior to beginning operation, the facility shall have security to prevent unauthorized access. Access shall be secured by a 24-hour attendant, a fence and locked gate when unattended, or a key-controlled access system. For a facility without a 24-hour attendant, fencing shall be required unless terrain or vegetation prevents truck access except through entrances with lockable gates.

   f. Prior to beginning operation, each storage tank shall be equipped with a device (visual gauge or alarm) to alert drivers when each tank is within 130 barrels from being full.

10. Form P-18, Skim Oil Report, must be filed with the Commission in Austin by the 15th day of the month following the month covered by the report.

11. If the facility will have staff on-site for periods of time necessitating bathroom accommodations, these accommodations must be designed, installed, and maintained by a person licensed to do so and the accommodations must comply with all applicable local, county, and State health regulations.

Provided further that, should it be determined that such injection fluid is not confined to the approved interval, then the permission given herein is suspended and the disposal operation must be stopped until the fluid migration from such interval is eliminated. Failure to comply with all of the conditions of this permit may result in the operator being referred to enforcement to consider assessment of administrative penalties and/or the cancellation of the permit.

This Permit was issued by the Railroad Commission of Texas on April 9, 2019, pursuant to a final order signed in Oil and Gas Docket No. 08-0309600.
