

# Public Education Sample Only

The operator must maintain a record of the public education program. See 49 CFR §192.615 for further information.

Natural gas is odorless in its natural state. Odorant was added to let you perceive if any gas is escaping.

Gas leakage may occur from faulty appliances, loose connections, service lines inside or outside your home, or from gas mains. Leaks can be dangerous and should be dealt with promptly by experts.

IF YOU EVER SMELL GAS -- even if you do not use it in your home -- take these precautions promptly:

1. Call your local Gas Company.
2. If odor is very strong and you are indoors, go outside.
3. Do not turn any electrical switches on or off.
4. Do not light matches, smoke, or create any other source of combustion.

However slim the chances of danger, it doesn't pay to take needless risks. At the first sniff of gas, play it safe. Call us!
